## SHIFTING INTO OUR NEW CHEMICAL STRUCTURE

Crystalai channels the breaths of consciousness of Oraphim Dolphins through Cosmic Wave Files

If we, in our present chemical state, tried to enter into the frequency or the chemical structure of the real star system that is hydrolaise based, we would pollute that system. They would have to wear gas masks. We smell like methane gas or rotten eggs in their systems. We would presently stink up the joint. This is why they have waited so long to be able to visit our planet. We have been a toxic system to other star systems.

We are presently returning to our elemental structure that is normal in a star system. Our physical elements from the elemental chart are now uniting with the elements from the spiritual elemental chart into the set of elements that are a part of any normal solar system. Our system is converting water and air into hydrolaise. The new earth and those on it will be a part of this star system that is hydrolaise based. We are now becoming a normal eternal breathing system. We are becoming immortal. We are becoming normal. A carbon based system is a dying system. A hydrolaise based system is a Christic based immortal system.

When damage happens so a solar system or sun or planet that natural ascension process of accreting frequency and then going up in density each time is broken. Then the planetary system gets stuck in a time warp wherever it lost the ability to accrete frequency. Our system has fallen into that category over a period of millions of years. We've been in a system that has not been able to do natural symbiosis for a very long time.

This is the first time in many millions of years that our system is able to become normal. This is why everyone in our universe, our galaxy, our solar system, and many other solar systems are celebrating now.

Most systems (the planet, universe, galaxy, star, beings, animals, plants) have the solar symbiosis cycle. When a star breaths it draws energy in and when it exhales it sends energy out.

When we breathe, we send energy out. A living system sends energy up and out to the top of its poles and out to all of the planets and suns in its system. There is a breathing circulation within and between all planets and suns in that system where solar currents go out of the top of the sun and they get picked up by stars around it gives off energy around it and picks up energy from those around it on a horizontal plane.

There is a natural solar symbiosis cycle with an eternal life solar system. In such a system all Merkabas are spinning at the right speeds and everything is exchanging energy through Prana in natural crystal order. Around each Merkaba is a chariot of fire with electromagnetic fields that plug into the next level up. Our body works similar to this Natural Flow System.

A natural conversion process is hydrolaise. The light body builds on this Template. The light body is a breatharian body that breaths hydrolaise.

Hydrolaise is key to an intricate breathing process that stars use. It is like our process of breathing that keeps cellular process going where we emit carbon dioxide, but it is closer to the photosynthesis process that plants do. The natural prana exchange cycle has to do with bringing in spirit body and progressively re-spiritualizing matter through prana exchange. Building charge that allows you to move forward in time by re-creating your spiritual body frequencies through the Eiradonis.

The Conversion process involves taking in certain things from the air that have to do with the oron crystals release and bringing it down from the higher air and down into the Earth and into the body. There is a breathing process that is literally breathing light and it allows for this conversion of various things including hydrolaise in the body that sends parts of the converted energy from hydrophase back into prana seed so you can keep the flows open.

The conversion process sends part of the light energy into the blood like oxygen circulates in our bodies and it releases back into the atmosphere a form of the hydrolaise that then goes through its conversion in the air where some of it becomes water and some of it becomes lighter ( a gas) that goes into the air.

The frequencies that have been coming in for the past year have been brought here to jump start this hydrolaise conversion in our bodies.

As it kick starts, we can begin to take more than just oxygen from the air. Very light plasma is coming in. It is a form of air born hydrolaise. It is releasing now in the spanner gates and coming down in our atmosphere that will create a process for us. If we don't use it. It will evaporate and loose charge.

There is always a natural relationship between the Christic Beings and the star they lived on where their natural bio-process would give back something the star

needed for its natural process. So it was always a natural symbiotic relationship. The solar symbiosis process is a process by which emissions coming from the central sun send the solar wind- electrons, protons and things like that.

There are supposed to be certain things in the atmospheric layers. Some would be from the choronosphere, some would be below the choronosphere.

Those things are called ORONS (oxygen bound with Helium) the elemental manifestation they pick up solar charge – natural emissions from the central sun and they store them for a while and after they densify a bit they come down in certain areas.

We have genetic time codes in our body called complete Spiritual Body, Adrogynous Body, Complete Body or which means male and female in the original God Language. The true meaning of male and female is a certain crystalline structure within the body. The spiritual physically manifests within the body as etheric dust memory that directly interfaces with the organ system in our natural circulatory system.

The Frequency Shift Codes on the Ascension Kit, Super Frequencies Kit and Cosmic Kit all hold the golden dust memory of our Starry Brother's Consciousness that will transform us into Avatars.

When this crystalline system begins working in our bodies (as it does when the frequencies are absorbed into the skin and into the consciousness) we become fully awakened Avatars on this planet.

We will begin activating the Crystal Dust memory or no pain, no time, no death very soon. We will become free of all implants and miasms that we picked up as we reincarnated in this solar system from the original Tara. The new incarnating race line will be soon be the Rainbow Race line - 6th generation humans. This race line will be fully awakened Avatars.

Namaste,

Crystalai
