

So Much to Feel and Do.

by Izabella ✨

~~

Understanding the Love of spirit will help every soul on your planet lay down the perceived need to bicker over differences that no longer have to keep you apart.

-

You're Love at your very core, and no Earthly difference can take this away from you or convince you that you're separate from each other forever. Indeed you're not, and in fact, you maintain a strong connection with each other in every moment.

-

When you can understand the strength of the connection you share with each other, you can build upon it and work together to help bring your planet into the Light.

-

Your ability to feel and radiate a good vibration is growing, even when it doesn't seem to be so, and we'll recommend letting yourselves rest when you feel it's necessary because you have so much still to feel and do. When you let yourselves take the necessary time and energy to rest, the result can be increased motivation when the time comes for you to resume your various efforts for the Earth's ascension.

-

It'll also benefit you immensely to know that even when you feel as if you aren't doing much for the Earth's ascension, your presence on the Earth is heralding much more change than you'd readily believe. We mention this often, and we do

so because we feel it's important for you to understand that holding and anchoring the Love vibration is potent work in and of itself.

-

You have so much work to do for the betterment of the planet, dearest awakening starlights, and we ask you to see the importance and value of your presence on the Earth, because the majority of souls on your world have been lost in the mucky waters of unawareness and have been temporarily unable to perceive of something better.

-

Your presence on the Earth is helping lighten the collective vibration, and is helping more people become aware that a reality of Love and bliss exists just beyond their conscious understanding. This reality is yours to open up to, and your effort to do just that will continue to bear fruit as your perception continues to refine and deepen.
