

TELEPATHY, RELIGION & CHAKRAS

“There is a light that shines beyond all things on earth, beyond us all, beyond the heavens, beyond the highest, the very highest heavens. This is the light that shines in our heart”.

– Chandogya Upanishad

Telepathy is a universal phenomenon. It is the natural ability of the human being to directly transfer the thoughts from one person (sender) to another person (receiver) without using any artificial methods. It is instinctual, rather beyond the use of the five physical senses – sight, hearing, touch, taste and smell. It deals with transferring subtle energies from one living being to another without physical contact. The term ‘living being’ not only mean a living person, but also the souls without a physical body. Most of us must have tried it in our college days. Youngsters of all generation will keep trying this, whispering “look at me” ... look at me...”, although they wouldn’t be very sure of its credibility!! **Believe in natural miracles, but not in spiritual gimmicks and magic.**

(Image-1: Telepathy)

The Physical, Emotional or Mental vibrations radiates from the brain or nerve centers. E.g. A love thought originates from heart & heart chakra, processed in brain and then transmitted. This vibration flows out in all directions through the Energy Body. This is like controlling our TV with a remote control. The media of transferring vibrations is the cosmic field similar to a wireless communication system. The principal seats of these radiations are usually brain, several great junctions of nerves and associated energy centers (chakras).

Related to telepathy is Distance Healing, wherein a person residing pole apart is treated by the healer. The healer is not healing the physical body of the patient, but the energy body, which is

omnipresent. As the energy body is healed, the physical body automatically gets cured. Can you smell something? Yes, if distance healing is possible, black-magic is also very much possible. Black-magicians should remember that the evils will rebound to them with a multiplied force when the victim becomes powerful. All these are possible only because we are all part of the cosmic field.

Now the question is how we all become a part of cosmic field?!

We have a natural unique server that interconnects all of us, called as ‘The Inverted Tree of Life’ in spiritual terms.

(Image-2: The Inverted Tree of Life)

Every living being is connected to one single source of eternal light through an *invisible cord*. Grand Master Choa Kok Sui reconfirms that the soul of a person is located at 30.5 cm above his/her head. This soul chakra works as a hidden video camera that records all our deeds. It further extends high and high to an eternal source of light by means of Spiritual Cord. (Sutra Atman in Sanskrit, Sutra means thread). Spiritual Cord is the divine light that passes right

through the center core of the physical body. In between the eternal light and the physical body lie the Soul Chakra and the chief higher souls in the Moon Sphere & the Sun Sphere. The higher souls are called by different names in different languages as given in the chart below.

UNIVERSAL	HINDU	CHRISTIAN	ISLAM
Eternal Light	Parabrahma	Jehovah	Allah
The Sun Sphere	Maheshwara	The Father	AL-Muqtadir
The Moon Sphere	Vishnu	The Son	AL-Wadud
Incarnated Soul	Brahma	The Holy Spirit	AL-Khaliq

(Image-3: The Higher Souls)

Whatever the names the higher souls are known as, the spiritual essence is identical in every man. All the Holy Saints mentioned these facts.

Fifteenth chapter of the Bhagavad-Gita states that the man is an inverted tree; its roots are up in the air and branches & fruits below.

The Holy Bible says, in the midst of the street of it (center core of the body), and either side of the river (Mercy & Severity or Female & Male), was there the tree of life, which bare twelve manner of fruits (Revelation 22:2).

The Holy Qur'an says, And they ordered naught else than to serve Allah, keeping religion pure on him, as men by nature upright, and to establish worship and to pay the poor- due. (Part 30-600).

Thickness of the spiritual cord differs from man to man depending upon his/her spiritual inclination and positive or negative deeds (Karma). A man with a thin spiritual cord is more inclined to crime because his connectivity with the higher soul is distracted by the invisible evils. **Once the size of spiritual cord becomes more than the head, he/she becomes a Real Guru. Spiritual Cord is encoded with “Permanent Seeds” that determine the fate of a person.** These seeds are like a computer storage disk containing pattern and design of the body, mind, spirit, health, wealth, sexual ability, etc. activities of the person. E.g. Physical Permanent Seed (Sath in Sanskrit), which is located in the heart chakra and physical heart is responsible for, design and pattern of physical & energy body. The Mental Permanent Seed (Chith in Sanskrit) located in the crown chakra and the pineal gland determines the mental ability or consciousness.

(Image-4: Mental Permanent Seed)

The Emotional Permanent Seed (Anandam in Sanskrit) located in the Solar plexus Chakra and in the liver is responsible for the emotional pattern of a person. Similarly, there are many more seeds those serve various purposes. **These seeds are the “fruits” mentioned by the Holy Saints. In other words, these seeds bestow the different needs of life.** Health of the seeds depends upon the size and cleanliness of the chakras or energy centers.

Energy Centers or Chakras

Chakras are the whirling energy centers of the energy body through which a great amount of energy is absorbed from the cosmic field by the physical body. Chakras also serve to expel the used energy. We not only obtain energy from the food, but also receive energy from the cosmic field. **If we possess clean chakras**

around our mouth, we will get good food. Similarly a clean sex chakra can fetch good sex as well. This is why Lord Jesus said, “What is coming out from the mouth is more important than what is going in”. He doesn’t indicate the words spoken, but the clean energy around mouth. Another Bible statement, “blessed are those who are poor in their soul..” doesn’t mean “all the poor are blessed”. It means one will be blessed if they are clean in their soul. Poor are not blessed, they are the sinners!

(Image-5: Chakras)

Chakras interpenetrate and extend beyond the visible physical body in a conical shape from nerve centres. Just as the visible physical body has vital and minor organs, the energy body has major, minor and mini chakras. The chakra rotates clockwise and anticlockwise at 180° alternately at a rapid speed. Clockwise rotation draws in fresh energy and anticlockwise rotation releases the used energy. The amount of energy drawn in and released is more or less equal. The entire process is repeated without our awareness.

(Image-6: Location of Chakras)

There are 12 major chakras, including the Soul Chakra. Major chakras are about three to four inches in diameter. They are like power stations, which control and energize the major and vital organs of the physical body. Major chakras are located over the major glands or internal organs. Minor chakras are about one to two inches in diameter. Mini chakras are smaller than one inch diameter. Minor and Mini chakras control and energize the less important parts of the visible physical body. Besides these, there are Micro chakras at every pore of the physical body. Cleaning the chakra is easily possible by the [Ornament Therapy](#).

Universal Wide Net

The natural way of communication amongst the inhabitants of the entire Universe is called the Universal Wide Net or UWN. Here, the channels of communication are the energy cords and the receivers are the chakras. A man with a bigger 'Crown Chakra' can receive information on any subject directly from the cosmic field. Take a look at the history; **none of the great inventors were university scholars or engineers. The term, Engineering is**

derived from a Greek word “ingenium”, which means “inborn talent”. The sciences have originated from such great men, having inborn talents. The “salaried scientists” with a blocked upper station can seldom invent anything useful to the humanity.

(Image-7: Meditation on UWN)

We are familiar with World Wide Web (www) wherein artificial satellite, Network Access Point (NAP), Network Service Provider (NSP), Regional Internet Service Provider (RISP) and Personal Computer (PC) are involved to send receive messages. In the case of UWN the eternal source of light is the satellite, higher souls are NAP, NSP, RISP, and the soul chakra is the PC. One can receive information directly and materials indirectly through the UWN.

Now the reader may think, “Then why don’t you use UWN to publish this article instead of using www”?!

I could have done that, but who would receive it? The sender as well as the receiver should have the same frequency. To receive a verbal or written message from a Mobile phone, it is inevitable to have a mobile phone or an equivalent instrument at the other end. Having a mobile hand set alone is not sufficient; it should be switched ‘ON’, it must have been activated by the service provider and importantly, both the sender and receiver must be within the network area. Same is the case with telepathy.
