MAPPING THE WORLD GRID

by

David Hatcher Childress
What is the World Grid? How can it be it mapped? What does it do? Why should we be concerned about it? What does it have to with anti-gravity?

In my many travels around the world in search of lost cities and ancient mysteries I have often wondered if there was some link connecting many of the ancient megalithic sites. Some years ago I discovered that there was no such thing as a coincidence. If the placement of ancient sites was no coincidence, what then was the overall organizing principle for the carefully laid out world wide pattern?

Are megalithic sites laid out on a grid? What is a grid anyway? According to my large and trusty Webster's dictionary, a grid is "a network of uniformly spaced horizontal and perpendicular line, specifically one used for locating points (as on a map, chart or aerial photograph) by means of a system of coordinates."

In other words, we are speaking about an intelligent geometric pattern into which, theoretically, the Earth and its energies are organized--- and possibly in which the ubiquitous ancient megalithic sites are also positioned.

What we are speaking of is fundamentally different from longitudinal and latitudinal lines that we are so familiar with from conventional geography. Proponents of the Earth Grid theory suggest that the grid lines are actually of a more basic nature than the more arbitrary, later conventions of cartography.

However the familiar image of the Earth as a globe girded in a lattice of longitude and latitude lines helps us understand what an Earth Grid, based on more primary energy lines, might be like. I say "energy lines" particularly, because one of the most consistent observations readers will encounter in this book is that the geometric pattern of the Earth Grid is energetic in nature. And that this Earth energy, organized into a precise web, was once, and can be again, the source of a free and inexhaustible supply of power, once empowering older civilizations of high technological achievement. Most Grid theorists state confidently that this Grid technology can be reclaimed again---today.

While UFOs are a very controversial subject, which may contribute to its perennial popularity, some theorists claim that there is a fundamental relation between UFO phenomenon and
Mapping the **World Grid**, was popular in the Middle Ages and many techniques are still used by the dowsers of today.
magnetic-vortex-gravity anomalies in the Grid. This subject will be discussed in the book.

Furthermore, gravity is as complex a subject as UFOs and the World Grid. Ask your average man on the street if he knows what gravity is—most likely he will say, "Of course! Everyone knows what gravity is. That's what keeps my feet on the ground!"

Even though gravity is an apparent physical principle defining life on Earth, it is still beyond the understanding of even the most intelligent scientist. No one has yet satisfactorily explained gravity. Is gravity a manifestation of energy from the Earth, connected with the Grid? If so, can we use certain points on the Grid to master gravity? Are UFOs defying the Earth's gravity field, using some sort of anti-gravity? These are all pressing questions. Perhaps by observing UFO phenomena, we can deduce certain engineering principles in operation in the Grid.

Already the Grid seems to implicate two fundamental realities of physical life: gravity and energy. In the pages that follow, you'll be treated to some of the most advanced and exciting theories on the World Grid.

Contributors to this volume approach the Grid from diverse professional and philosophical points of view. The result is a compilation of views (the first, and possibly definitive) of the Grid that spans the poetic to the mathematical.

For example, professional anthropologists Bethe Hagens and William Becker's chapter, "The Planetary Grid System," gives a thorough overview of the geometry and geography of a unique World Grid model they call "EarthStar". Bruce Cathie, author of four books on the harmonics of the World Grid, presents a fascinating mathematical probe into the Grid incorporating Einstein's Unified Field Theory; Cathie comes up with some most surprising conclusions.

Richard LeFlors Clark, Ph.D., discusses gravity vortex areas around the Earth that have been exploited either secretly by governments or by amateur scientists for the purposes of levitation and anti-gravity. He warns that you may become "permanent space debris" if you wander into one of these areas at the wrong time!

Richard Leviton presents the Grid as an interactive spiritual workshop for the purposes of aligning human with planetary energies through the "megalithic temple." The Earth Grid is seen as a living hologram of the organization of the solar system, intricately linked with the life and destiny of human beings.

Harry Osoff discusses the controversial and totally
Creating a grid is essential in any map making.
mysterious U.S. Navy "Philadelphia Experiment", and relates it to the Grid structure and governmental research cover-ups. He thereby strengthens the view of secret governmental research into the areas of anti-gravity and the World Grid. Then Barbara Hero gives a musician's understanding of the Earth in her chapter, "International Harmony Based Upon A Music Of Planetary Grid Systems."

Other topics in the book include discussions of the electrical genius Nikola Tesla and the "Star Wars" plan, the mysterious Oregon Vortex, acoustic levitation of stones, and more. Nor do we take ourselves so seriously that we can't relax and have a little laugh from time to time. Thus, the back of the book has chapters on anti-gravity patents, Newspaper Headlines, The Anti-Gravity File and even Comix.

What are we to make of all this seemingly wild conjecture? The reports of our Grid theorists certainly go against the grain of modern scientific views. And they draw upon information which is often times subjective at best, and certainly controversial. Grid theories challenge the very basis of our physical world view. Nor do they all agree with each other. However, major innovations in science often come from seemingly "crackpot" speculation. I leave it to the readers to decide which theories fit best into their own reality structure.

Personally, now, as I continue traveling around the world, I regard with a more thoughtful eye the complex of ancient temples, cities and mounds. While I may not agree with, or totally understand, all of the theories presented in this book, each one has illuminated for me in a special way the reality that the Earth is a unified living planet, and that we as humans have a special and responsible place within this total environment.
From the book, MAGNETISM AND ITS EFFECTS ON THE LIVING SYSTEM by Albert Davis and Walter Rawls, Jr. Here we see how the Earth's Magnetic Field creates an electro-magnetic grid around the earth. What does this grid have to do with the earth's gravitational field?
R. Buckminster Fuller did a great deal of work on the world grid. He copyrighted his "dymaxion" map in 1946.
Pages from Fuller's U. S. patent covering the Dymaxion map. Science referred to this as "the first cartographic patent to issue from the U. S. Patent Office."
Buckminster Fuller defines a sphere (a) as "a multiplicity of discrete events, approximately equidistant in all directions from a nuclear center." The discrete points of such a system can be inter-triangulated. The tetrahedron (b), the octahedron (c), and icosahedron (d) are the only possible cases of omni-equilateral, omni-triangulated finite systems. Pictured at (e) are the 15 great circles developing from rotation of the icosahedron in respect to the 15 axes inter-connecting opposite midpoints of the icosahedron's 30 edges. The 120 resulting right spherical triangles represent the maximum unitary subdivision of a one-radius-system.
The belief that our Earth has a basic harmonic symmetry is very ancient. Socrates told his pupil Simmias: ‘My dear boy, the real earth viewed from above is supposed to look like one of those balls made out of twelve pieces of skin sewn together.’ Some 3000 years later, in the 1960s, three Russian scientists had the idea of re-examining the globe to see if any pattern should emerge linking significant places in history; it did. After several years’ research in Moscow, they published their findings in Khimija i Zhizn', the popular science journal of the USSR Academy of Sciences, entitled: ‘Is the Earth a Large Crystal?’

Drawing from their combined experience of history, engineering, and electronics, they decided that there was nothing in theory to have prevented a lattice-work pattern – a ‘matrix of cosmic energy’, as they put it – being built into the structure of the Earth at the time it was formed, whose shape could still be dimly perceived today. Komsoon's Pravda, the official Russian journal for the younger generation, followed up the idea with a suggestion that Earth had begun life as a crystal, and that only slowly did it mould itself into the spheroid it is today.

According to their hypothesis, the crystal can still be seen in twelve pentagonal slabs covering the surface of the globe – a dodecahedron. Overlaid on this are 20 equilateral triangles. The entire geometric structure, they claim, can be seen in its influence on the sitting of ancient civilizations, on earth faults, magnetic anomalies, and many other otherwise unrelated locations, which are placed either at the intersections of the grid, or along its lines.
Planetary Grid System

The Planetary Grid System shown on the reverse side was inspired by an original article by Christopher Bird. "Planetary Grid," published in New Age Journal, #5, May 1975, pp. 36-41. The hexakis icosahedron grid, coordinate calculations, and point classification system are the original research of Beth Hagem and William S. Becker. These materials are distributed with permission of the authors by Conservative Technology Intl. in cooperation with Governors State University, Division of Intercultural Studies, University Park, Illinois 60465. 312/534-5000 x2455. This map may be reproduced if they are distributed without charge and if acknowledgement is given to Governors State University (address included) and Mr. Bird.
Earth crystalline energy grid

The so-called Russian Grid, treating the earth as if it were a gigantic crystal.

Note similarities in grid concepts with this computer model of a carbon molecule.
David Zink’s map of megalithic sites and other features from his book *The Ancient Stones Speak*, (Dutton, 1979).
The Planetary Grid System:
Some of the significant features of the major grid intersections: (1) Giza, the Great Pyramid; (3) Tyumen oil field, USSR; (4) Lake Baikal, USSR, many unique plants and animals; (9) Hudson Bay, present location of north magnetic pole; (11) northern British Isles, Maes Howe, Ring of Brodgar, Callanish; (12) Mohenjo Daro—Rama Empire culture; (13) Xian Pyramids, largest in the world; (14) southern Japan, "Dragon's Triangle," great seismic activity; (16) Hamakulia, nearby lies Hawaii, scene of high volcanic and earthquake activity; (17) the sophisticated canal civilization of Cibola; (18) Bimini, the site of huge "man-made" walls underwater, discovered in 1969, the date that Edgar Cayce had predicted that evidence of Atlantis would be discovered; (20) Algerian megalithic ruins; (21) megaliths at Axum, the Coptic Christian center in Ethiopia; (25) Bangkok and Ankor Wat; (26) Sarawak, Borneo, site of ancient megalithic structures; (28) Pohnpei Island, Micronesia, site of the megalithic city of Nan Madol; (35) Lima, Peru, boundary of the Nazca Plate, Pisco, the Candlestick of the Andes & the Nazca Lines; (40) Gabon, West Africa, natural atomic reactor in operation about 1.7 million years ago; (41) Zimbabwe with its ancient mines & structures; (44) the Maralinga Atomic Test Site, which also has megalithic ruins; (47) Easter Island and its megaliths; (62) German underground Antarctic base?
The ten "vile vortices" originally taken from Ivan T. Sanderson. At these ten areas, theoretically, magnetic-gravitational anomalies take place. Nicholas R. Nelson, in his book, Paradox (1980, Dorrance & Co. Ardmore, Penn.), believes that these vortex areas are entrances to other dimensions. Such "doors" to other dimensions would account for strange disappearances and mysterious vanishings.
More illustrations from *Paradox*, Nelson sees the earth as an Icosahedron. Below is an enlargement of the Bermuda Triangle vortex area, one of the supposed "vile vortexes".
Here we see how other dimensions or parallel worlds can connect with the earth, theoretically at the ten hypothetical vortex areas of the earth.
This illustration is from the book *Genesis de la Cultura Andina* (Genesis of the Andean Culture) by Carlos Milla Villena, published in Peru. It shows the "grid line"-mathematical relationship of the megalithic remains of Tiahuanaco in Bolivia, with those in Cuzco, Peru and Vitcos, brief capital of the Incas in exile, as well as the point of entry into Peru that Pizarro and his conquistadors took during their conquest. Also on the grid line is Cajamarca, where the conquistadors captured the Inca Atahualpa and so sealed the fate of the Inca Empire. Were the Incas, or perhaps an earlier culture aware of the world grid?
These refraction photos are the closest visualization that science can give with respect to the name of atomic substance, which appears to be patterns of geometrized light-energy. From Robert Lawlor's *Sacred Geometry* (1982)
by William Becker and Bethe Hagens

The Planetary Grid: A New Synthesis
The experience of life in a finite, limited body is specifically for the purpose of discovering and manifesting supernatural existence within the finite."

Attributed to Pythagoras

Introduction

We've entitled our current exercise in planetary grid research "A New Synthesis" — and indeed we hope it is. All that may be new about our work is that we have simply found a unique blend of the previously "unblended" ideas of others. Those others are true visionaries in the areas of unexplained earth phenomena, human history, discovery, and the art-science of geometry (earth measure). Over the last year and six months, we've received literally hundreds of letters from researchers all over the globe — who are seeking a comprehensive explanation for a continuum of phenomena and events which traditional science emotionally rejects as "impossible," "hallucinatory," and/or "unquantifiable." Yet the events continue to be catalogued, with many reports suppressed or labelled "fraud" by orthodox scientists. Worldwide networks of questioning theorists persist and grow with each report. We will try to mention as many of our correspondents as we can within the text of this article. Several contributors, listed at the end, have truly transformed our view of this work.

In 1200 A.D., a new energy began to move within the cultures of the West. After centuries of obedient reflection within the established order of Roman Christianity, the spirit of individualism and exploration began to emerge. The 14th century great plagues of Europe, in which one fourth of the Continental population had died — with three out of four persons afflicted, had awakened in the West the archetypal imperative to "control Nature or die!" By the 15th century, Leonardo da Vinci and the multi-disciplined geniuses of the Renaissance had rediscovered the lost scientific principles of pre-Christian Greece and Rome, and had invented the "view point" of the individual within their perspective drawing and painting systems. Paintings and public murals now began to put the individual at the center of a "world view" which, for the first time in centuries, conveyed the notion that through individual effort and analysis, the person — the viewer — could come to order and "control" the often hostile natural environment.

This "individual point of view" (perspective view point on "horizon") required "detached awareness" (standing distant from that which is viewed) and a consummate dedication to visual detail and analysis in order to "render an in-depth perspective." The writing and journalism of today still ring with the Renaissance archetypes.

Now it is 500 years later, and Leonardo's manifest symbol of individual view point and detachment has brought us to viewing video discs of the earth as seen from the moon. It has also brought us to the uneasy conclusion that our pre-Renaissance imperative to control Nature (literally "that which is born") or die has ushered us into a technological malaise where most of our man-made "natural" control systems are in crisis — especially those systems which exploit, pollute, or dramatically disturb the biospheric processes of the earth.

Just as the perspective pictorial systems of the Renaissance artists "brought into focus" the unspoken cultural archetypes of their time, we feel that the current network of planetary grid researchers (of whom we are a part) may be on a similar path toward developing a unifying symbol of a new earth: a paradigm as transcendent over our passing "Iron Age" as the Renaissance was over the Dark Ages. What may make the proposition even more fascinating is the parallel analogy that — just as the driving force behind the creative energies of the Renaissance was the rediscovery of Greco-Roman science/philosophy; so with our planetary grid theorists, the driving force behind most research efforts is the continuing flow of evidence, both physical and metaphysical, that the existence of Pre-Egyptian civilizations — some with highly advanced technologies — is now no longer speculative, but a necessary assumption for developing any comprehensive archaeological treatise. We believe that the planetary grid is an ancient model that brings control through

These stones on display at the Ashmolean Museum in Oxford, England suggest a life of creative intellectual synthesis for the Neolithic craftsmen who crafted and "wrapped" them with leather thongs.
comprehensive understanding and not through detached myopic analysis/manipulation. The contemporary video artist/philosopher Dan Winter expresses the idea beautifully. 'Our destiny is to encounter our embracing mind with increasing intimacy and resonance. We awaken to a love life, in which personal love expands to planetary love — through this touching new body of mindfulness. A new body of mind crystalizes among us.'

**Planetary Grid Researchers: Prehistoric to Present**

The oldest evidence of possible planetary grid research rests within the Ashmolean Museum of Oxford, England. On exhibit are several hand-sized stones of such true geometric proportion and precise carving that they startle the casual viewer. Keith Critchlow, in his book *Time Stands Still* gives convincing evidence linking these leather-thonged stone models (see illustration #1) to the Neolithic peoples of Britain — with a conservative date of construction at least 1000 years (ca. 1400 B.C.) before Plato described his five Platonic solids in the *Timaeus*.

And yet, here they are — the octahedron, icosahedron, dodecahedron, tetrahedron, and cube all arrayed for comparison and analysis. Other multi-disciplined archaeological researchers like Jeffrey Goodman and A.M. Davie have dated the stone polyhedra to as early as 20,000 B.C. and believe they were used as projectiles or "bolas" in hunting and warfare. Davie has seen similar stones in northern Scotland which he attributes to the early art of "finishing the form" of crystalline volcanic rocks which exhibit natural geometry. H.C. dates these artifacts to at least 12,000 years before Plato (ca. 12,400 B.C.). Critchlow writes, "What we have are objects cleanly indicative of a degree of mathematical ability so far denied to Neolithic man by any archaeologist or mathematical historian." In reference to the stones' possible use in designing Neolithic Britain's great stone circles he says, "The study of the heavens is, after all, a spherical activity, needing an understanding of spherical coordinates. If the Neolithic inhabitants of Scotland had constructed Maes Howe (stone circle) before the pyramids were built by ancient Egyptians, why could they not be studying the laws of three-dimensional coordinates? Is it not more than a coincidence that Plato as well as Ptolemy, Kepler, and Al-Kindi attributed cosmic significance to these figures." Yet another historian, Lucie Lamy, in her new book on the Egyptian system of measure gives proof of the knowledge of these basic geometric solids as early as the Egyptian Old Kingdom, 2500 B.C.

We agree, in general, with all the above researchers that the crafting of sophisticated three-dimensional geometries was well within the capabilities of Pre-Egyptian civilizations. With the concept that knowledge of these geometries was necessary to the building of stone circles and astronomical "henges" — we also agree — and would add that we have evidence that suggests that these hand-held stones were "planning models," not only for charting the heavens and building calendrical monuments, but were also used for meteorological study; to develop and refine terrestrial maps for predicting major ley lines of telluric energy; and, in conjunction with stone circles, were used to construct charts and maps for worldwide travel long before the appearance of the pyramids.

Take another look at the five Neolithic stones. Notice the placement of points on not only completed intersections where hongs connect — but on the "open corners" where thongs might be added. The central figure, the dodecahedron, has all twelve centers of its pentagonal faces marked with points for further "wrapping" — as with the cube figure to the far right. Its corners are defined similarly by marked open points. Now note the tetrahedron, the second figure from the right. Its four vertices or "horns" have already been bisected by a second array of thongs defining another tetrahedron overlapping the first at midpoints. It is our contention that these stones were not wrapped and marked with leather to facilitate their use as "bolas" or projectiles. The stones and their varied nets are too delicate and complex to have been used as hunting and warfare shot. Their appearance struck us initially as ritual objects similar to the decorative reed spheres found in Southeast Asia; or as religious symbols such as the mysterious bronze and gold spheres found in France and Vietnam — which some say depict the ancient text of the *Tao Te Ching*. It may well be that all of these hand-held objects served similar planning and mnemonic functions for the people who treasured and crafted them. (See illustration #2)

![Illustration #2](image)

Gold and bronze figures exhibiting twelve facets and twenty "horns" have been unearthed in France and Vietnam. Vietnamese war veterans recognize them as sacred Taoist objects marking acupuncture points.

Viewing the stone polyhedra together, we can only conclude as Keith Critchlow does — that their intended use was for the study, comparison, and analysis of spherically determined systems of geometry. Given the apparent use of these stones as "planning models," and given the apparent "extra wrap" of thongs on the tetrahedron — consider the result if the Neolithic craftsman of these forms had decided to discover the ultimate in delineated spherical geometry models, a single sphere upon which would be combined all the wrappings and points of all five solids.
The most direct route to such a figure is as follows: Take the icosahedron wrapping pattern and combine it with the existing pattern of points and thongs on the dodecahedron. The combination of figures provides a form composed of 15 "great circles" which intersect at 62 predicted common points. (See illustration #3)

Illustration #3
The Neolithic craftsman could easily have created this beautiful polyhedron — which requires the overlap of a dodec and icosahedron. Fifteen "great circles" or "equators" of leather thong create the 120 Polyhedron.

This figure, which synthesizes the dodecahedron and icosahedron with its 120 triangles, was not only known to the Greeks but to other civilizations much earlier. We believe that its geometry can be applied in two forms: the "girded sphere" or marked stone used for mapping, dowsing, or geometry (earth measure); and the armillary sphere or "celestial basket" used as an astronomical device to measure time via the solstices and daily sunrises. The armillary sphere casts a shadow on the captured stone within its framework (see illustration #4) — thus echoing the ancient analogy "As above, so below."

Returning to the creation of our ultimate spherical model, the second step would be to take the other figures — cube, tetrahedron, and octahedron — and lay out their line arrays over the existing 62 point pattern. You will find that not only is the 62 point system of vertexes compatible with the icosahedron and dodecahedron — but that all the leather thong patterns of all the polyhedral stones are precisely "mappable" over those same 62 vertexes. In fact, our surprised craftsman would soon discover that all five stone arrays can be overlapped one upon the other with different corner matchings until a beautiful polyhedron with 121 "great circles" and 4,862 points has been developed. This is the ultimate single sphere pattern which houses all five Platonic solids within multiple orientations (see illustration #5). This is the same form that was used by R. Buckminster Fuller for his domes and in our research, we have called it the Unified Vector Geometry (UVG) 120 Sphere. We consider it the key component in our proposed "new synthesis" of planetary grid research.

Plato's description in the Timaeus of a cosmology based on the five regular volumes (tetrahedron, octahedron, cube, icosahedron, and dodecahedron) echoes Pythagorean teaching regarding the manifestation of the infinite within the finite. Plato postulates a metaphysics in which the four elements of Greek science — earth, air, fire, and water — are associated with four of the five solids. He mysteriously reserves his description of that most noble form used by the Creator to fabricate the universe as "a certain fifth composition." Tradition relates the cube to earth, tetrahedron with fire, octahedron with air, icosahedron with water, and the dodecahedron with the universe or "prana/aether." Because he had written that, "The earth viewed from above, resembles a ball sewn together from twelve pieces of skin," we believe he related the dodecahedron to Gaia, the living planet earth. We also propose that Plato's mysterious "fifth composition" is more complex than the dodecahedron — but based upon it. We suggest that Plato's most noble framework for building the universe is a form which unifies and supports all the forces operating simultaneously within the five
Pythagorean Cosmic Morphology

©Becker-Hagens 1984
The world's oldest map, which Richard J. "Dick" Benson dates to 6018 B.C., depicts the elegant theory of mathematics embodied in the planning of the city of Cairo. The megaliths shown are (C) Cheops, (K) Kephren, (M) Mikerinus, and (S) Sphinx. Benson's work may well provide a helpful, radically new framework for historical linguistics as well as uncover a lost simplicity in the art and numbers of geometry.

Regular solids, the four primary elements, and the earth (Gaia) itself — the Unified Vector Geometry 120 Sphere. We further contend that this sphere is the pattern upon which the ancients built their armillary spheres, which to this day are used to cast shadows for reading the solstices and equinoxes.

Contemporary researchers like Donald Cyr and Sir J. Norman Lockyer, experts in archaeoastronomy, have again and again detected in the site layouts of ancient stone circles and cities, a circular plan of radiating lines diverging from sacred centers at angles of 22 +, 11 +, 46 +, 90, 120 and 180 degrees. These radiating lines, it was found, consistently align with standing stones, stone circles, and sunrise/solstice marking points on mountain peaks and crest "notches" surrounding the site. A related set of angles in the Megalithic landscape, 23 1/2 and 47 degrees, is equally regular but does appear to relate to celestial phenomena of the common variety. In many cases, these and the other angles link one sacred site to another miles distant. The basic triangle in our Unified Vector Geometry (UVG) 120 Sphere exhibits just these angles, at intervals strangely correspondent with those found by Lockyer, and Cyr and others.

Plato had travelled extensively while making notes for the Timaeus. His visit to Egypt would have brought him in touch with the historian/planners of the city of Cairo. Engineer/geomter Richard J. "Dick" Benson believes that Cairo is possibly the most ancient surviving example of a precise geometric site plan based not only on the angles discovered by Cyr and others but on angles which connect sites across continents and which — again — are almost eerily similar to those in the UVG 120 Sphere. (See illustrations #6, #7)

Donald Cyr is encouraging the use of a simple Halo Sighting Template to be superimposed on maps of ancient sites in order to detect alignments that may indicate "hidden halos" — atmospheric events that were almost certainly a part of the daily life of Megalithic man. This sort of research will require the cooperation of compartmentalized scientists in astronomy, geology, archaeology, and other disciplines — but may recreate a holistic approach to Gaia that supported the lifestyle of the ancients.

The U.S. Navy has analyzed the Pin Reis map and determined that it is a correct circular grid projection from Cairo. The half diamond (outlined by grid points 37, 19, 20 and 38) which contains the complete construction infill of the original map shows a superficial, though perhaps indicative, resemblance to two Basic Triangles of the UVG system we propose.
The Expanded Cartography of Admiral Piri Reis
Could Plato have avoided in the Timaeus a direct reference to the simple dodecahedron as his framework for universal creation because he was still searching for "a certain fifth composition" which would satisfy the magnificent site plan of Cairo that Berossus' map implies? Or was he restricted by a secret vow to the Pythagorean Brotherhood not to reveal to the world the true form of Pythagoras' compound polyhedron, which held all the solids within its form and had been used in the global grid and armillary sphere "planning models" for Cairo and other sacred cities?

Since Plato, history has lightly sketched what seems to have been a sub rosa quest for a Cairo-centered mapping system, which would "square the circle" and/or show the way to the Holy Grail. (Interestingly, a 13th century writer named Wolfram described the Grail as a "precious stone fallen from heaven") Curious artifacts like the Pin Reis map, dated 1523 A.D., but believed to be a copy of an ancient Greek original, show "wind rose" lines converging on Cairo with angular divisions of 22 + and 11 + degrees (see illustration #8). Could this map have been an extension of the site lines and solstice/sunrise markers which encircle ancient Cairo? Viewed "from above," the major points on the Piri Reis map so nearly approximate points on our UVG 120 Sphere that we have included a sketch using our geometry and Piri Reis' lines which attempts to complete the missing portion of the world map the Admiral originally drew.

The Piri Reis map and another unique document, the Buache map of 1737, contribute much toward our contention that early, possibly Pre-Egyptian civilizations possessed mathematical, astronomical, and geophysical skills equal to those in this confusing "Iron Age." Both maps possess highly accurate and unique views of the continent of Antarctica not known, supposedly, before the International Geophysical Year of 1958. (See illustration #9) The Piri Reis map was found in Istanbul in 1929 and is said to have been copied from a map originating in the library in ancient Alexandria. The Buache map of 1737 is said also to be the result of copying ancient Greek maps. Both maps astonishingly depict Antarctica's true land masses through their icy cover — and with several as dates, such land masses were not invented until 1958. Even if the maps are complete frauds, they still predict Antarctica's true profile thirty years early. The matter of maps which can't exist — but do — is a kind of continuing corollary avenue of research compatible with Unified Vector Geometry. The maps of the so-called mythical continents of Mu and Pan (as described in the channelled Outpug, A New Bible in the Words of Men in the writings of controversial scientist/philosopher Sir James Churchward; and in revelations of the Lemurian Brotherhood to the Lemurian Fellowship in Ramona, California) were all made long before the geophysical year studies and the contemporary pioneering ocean cartography of Marie Tharp and Bruce Heezen (see illustration #10). Notice the remarkable patterns of mountain ridges running 270 around Hawaii; the flat "plain" to the northeast; the boundary through the western quarter of the United States and Canada which marks the division between the Pacific Plate and the North American shield. Whether or not these continents existed is a less important question than how accurately the maps mesh with the best contemporary scientific knowledge. The correspondence is very close.

Returning to the maps of Piri Reis, Buache, and the ancient sea kings, what kind of planning models would an ancient mariner need to construct such maps? Ivan Sanderson, researcher into the unexplained, asked such questions in the 1960s and 70s — and with several associates, he set out to "square the circle" and/or show the way to the Holy Grail by taking full advantage of modern communication technology and statistical data analysis. His success was startling. His 1972 article in World magazine, "The Twelve Devil's Graveyards Around the World," plotted ship and plane disappearances worldwide, focusing attention on 12 areas, equally spaced over the globe, in which magnetic anomalies and other energy aberrations were linked to a full spectrum of strange physical phenomena (see illustration #11).

Highest on Sanderson's statistical priority list was a lozenge-shaped area east of Miami, in the Bahamas, on the western tip of the infamous Bermuda Triangle. This area's "high profile" of strange events, Sanderson concluded, was mostly due to the enormous flow of air/sea traffic in the area. Other zones of anomaly, though less familiar, were equally rich in disappearances and space-time shift occurrences. A pilot flying with passengers near the Hawaii zone suddenly found himself in a "dead zone" without instruments and unable to communicate beyond the cockpit. After flying some 350 miles, the "phenomenon" lifted and the pilot found that tower officials had seen no measurable time had elapsed between the beginning of his "dead zone" experience and its end.

Another area of continuing disappearances and mysterious time-wars is the Devil's Sea located east of Japan between Iwo Jima and Marcus Island. Here events have become so sinister that the Japanese government has officially designated the area a danger zone. Sanderson theorized that the tremendous hot and cold currents crossing his most active zones might create the electromagnetic gymnastics affecting instruments and vehicles. His theory is now being balanced against several.

These same areas, in the pattern of an icosahedron, have been mapped out in the Keys of Enoch (1977) by J. J. Hurtak but
Illustration #11
The lozenge-shaped anomalies of electro-magnetic aberration were identified by Ivan Sanderson in the late '60s and were the impetus for a worldwide reinvestigation of practical whole earth geometry. A source of confusion has been the location of equally spaced points zig-zagging the globe 36° from the equator. This is not point latitude but rather the angle of incidence with the equator (as shown above).

Illustration #12
In his tour de force The Book of Knowledge: The Key of Loom, a meta-linguistic code document of linguistic-cybernetic information, Dr. J.J. Hurtak proposes areas of artificial (above) and natural (below) time warps areas used for contact by the Brotherhood. Numbers reflect planetary grid coding points we have adopted that duplicate the original Russian system.

In his tour de force The Book of Knowledge: The Key of Loom, a meta-linguistic code document of linguistic-cybernetic information, Dr. J.J. Hurtak proposes areas of artificial (above) and natural (below) time warps areas used for contact by the Brotherhood. Numbers reflect planetary grid coding points we have adopted that duplicate the original Russian system.

are explained as natural time-warp contact areas used by the Brotherhood. It is not unreasonable metaphysical theory to assume a pulse to the universe, an electromagnetic heartbeat which makes time appear to go backward and ahead — for planes of existence to manifest and disappear. What better spots for contact than Sanderson's? (See illustration #12)

Ivan Sanderson and his energetic colleagues are surely the contemporary rediscoverers of what has come to be called the "Planetary Grid" — so named by Christopher Bird in an article which appeared in the New Age Journal of May 1975. Bird's writing brought to light that a truly "morphogenetic" worldwide research effort, involving earth/human origins and grids, had taken off parallel to and as a result of Sanderson's work. Bird wrote about three Russian researchers (Nikolai Goncharov, a Muscovite historian; Vyacheslav Morozov, a construction engineer; and Valery Makarov, an electronics specialist) who had published an article entitled "Is the Earth a Large Crystal?" Their work, supportive of and following immediately on Sanderson's, had outlined a worldwide grid of points nearly identical to Sanderson's 12 and had added 50 more. These occurred where Sanderson's global icosahedron overlapped the Russians proposed combination of icosa and dodecahedron. These new lines and points, in conjunction with Sanderson's, now matched most of the earth's seismic fracture zones and ocean ridge lines as well as outlined worldwide atmospheric highs and lows, paths of migratory animals, gravitational anomalies, and even the sites of ancient cities.

The tradition established by the Russians with the overlapping icosa/dodecahedron grid has been adopted by almost all grid researchers with the exception of New Zealand's Captain Bruce Cathie who is working with the cubeoctahedron (Fuller's vector equilibrium model, briefly discussed in the next section of this article). Among the rest, there are some common themes in the predictive science of the grid and some dramatic divergences. Those involved in what might be thought of as "classic geometries" use the model to predict physical events and measurable phenomena in the tradition of Ivan Sanderson: Athelstan Spilhaus (faults, seismic activity, continental drift); J.J. Hurtak (time warps, evidence of paraphysical grid line connections among pyramids in the Americas); A.M. Davie (coincident events). Another branch of theory centers in harmonics. Bruce Cathie is meticulously charting the courses of phenomena grouped under the title of "UFO." Michael Helus has undertaken a universal theory of harmonics that he calls "Astrosonics" and is attempting to develop a practical health technology for people to get "in tune" with Gaia by reactivating the harmonics of the cosmic time and place of their birth. He believes that planetary grid harmonics can and will be manipulated if we do not develop a responsible stewardship for this profound and powerful resource. John Sinkiewicz has developed a theory not unlike that of Donald Cyr — that we may be making an enormous mistake if we assume that "Nature" is natural, that it's always been like this — with wild climate swings, tornadoes, pole wobble, and the like. Sinkiewicz believes the earth energy grid is out of alignment, is no longer anchored at the north and south poles, and that New Age spiritual communities around the world are gradually rediscovering the new grid and building their sacred sites in accordance to activate it. Ray Stoner, working with shamans among the Central American and North American Indians, has gone a step further and is searching the museums and ruins for potential pieces of the grid "power system" he believes was once in operation around the world and centered in the pyramids. His is potentially the most politically revolutionary theory since so many key "artifacts" (such as the unusual stone yoke shown in illustration # 13) are found in the museums and collections of the very wealthy.

Illustration #13
Archaeologists hypothesize that "stone yokes" such as this one on display at Chicago's Field Museum were worn by Mayan athletes during their strenuous and violently competitive games. These yokes measure approximately 24" by 18" and are about 4" in width. They appear to be carved from solid granite and weigh perhaps several hundred pounds. Ray Stoner has noticed a resemblance to magnets, even down to carvings of heads facing opposite directions on the two poles. In our opinion, the object is incomplete, perhaps requiring some sort of attractive base plate.
The work of both Stoner and Sinkiewicz provide something of a bridge to the work of the dowsers, notably Christopher Bird (who dowses for information); Terry Ross (former President of the American Society of Dowsers who practices a kind of dowsing of manifestation for needy Third World countries); and the thousands of dowsers here and in Europe who are slowly uncovering a transcontinental network of lines based on a kind of sixth sense of the flow of Gaia and the "key" of the land. This same type of work has been carried on in China and Japan for thousands of years as Geomancy — the identification of archetypes of the tiger and the dragon in the landscape, and the siting of buildings and their functions with respect to balancing these forces with the flow of underground water and cosmic energy. (See illustration #14) A branch of dowsers in this country (including Tom Bearden, Ken MacNeill, Toby Grotz, and Walter Baumgartner) are pushing the politics of grid research into the development of practical "free energy devices" that will be decentralized, affordable, and supportive of personal freedom.

A New Synthesis: Predictions and Speculations

In 1983, upon first seeing a drawing of the Russian planetary grid in Moira Timms' book *Predictions and Prophecies*, we immediately recognized the work of R. Buckminster Fuller — who had spent a lifetime developing his models and theory of "nature's comprehensive building system." There before us, adapted from Chris Bird's article, was a drawing of an "incomplete" geodesic sphere — in fact, the exact sphere upon which Fuller had based his geodesic domes and much of his theory of synergetic geometry. With the simple addition of 60 lines which connected the vertexes of Sanderson's icosahedron to the vertexes of the added Russian dodecahedron we had duplicated the Neolithic craftsman's model and established Fuller's 15 "great circle" polyhedron as a key link in the chain of grid ideas. After locating Bird's original article and finding the Russian work in *Chemistry and Life*, a USSR science...
Illustration #16
The UVG 4/30 Diamond centers on EarthStar will provide, we believe, the most fertile zones for research into the ancient history of the earth because they appear to be so geologically stable. In addition, there is a surprisingly full history of advanced cultures in these areas already established: the complex of Alexandria/Cairo/Jerusalem (point 1); a possible nuclear waste storage area postulated by Jalandris in Gabon (point 40); the People of the Four Corners (point 13); the sacred lands of the Hopi (point 17); the sacred lands of the Australian aborigines (point 44); the vast complex of megaliths and stone circles in the British Isles (point 11); the extraordinary Ugansk Bay Eskimo art complex (point 9); the ancient splendor of Amazonian cities now buried in vegetation (point 36); the Argentine Tafi megaliths (point 48); the contemporary site of major Soviet defense research (point 5); and the nearly unmatchable biological splendor of the Galapagos Islands (point 34).

Becker-Hagens EarthStar®

magazine, we went into what many researchers, writers and artists call "curiosity/compulsion syndrome." Everything we seemed to hear, see, read, and even eat related "in some way" to the planetary grid. Three months after glancing at that Russian drawing, our library had totally changed, cardboard and store-bought globes littered our tables, and we were driving to Washington, DC, to meet with Chris Bird.

Since that time nearly a year ago, a cascade of information from friends, students, co-researchers, and others has brought us to this current presentation.

We propose that the planetary grid map outlined by the Russian team Goncharov, Morozov and Makarov is essentially correct, with its overall organization anchored to the north and south axial poles and the Great Pyramid at Gizeh. The Russian map, however, lacks completeness, in our opinion, which can be accomplished by the overlaying of a complex, icosahedrally-derived, spherical polyhedron developed by R. Buckminster Fuller. In his book "Synergetics," he called it the "Composite of Primary and Secondary Icosahedron Great Circle Sets." We have shortened that to Unified Vector Geometry (UVG) 120 Sphere, because of the form's elegant organization of 121 "great circles" running through its 4,862 points. We use the number 120 due to its easy comprehension as a spherical polyhedron with 120 identical triangles — all approximately 30°, 60 and 90 in composition. All other forms within our Unified Vector Geometry use shape names and numbers which refer to the quantity of smallest UVG Basic Triangles within a given form — and the number of named forms in the UVG 120 Polyhedron or Sphere. Thus, when we refer to our "Pac-Man" pentagons which appeared in our first planetary grid map, you should know that we also call them UVG 10/12 Pentagons, because our Basic Triangles create each pentagon and there are 10/12 pentagons in the UVG 120 Sphere and Polyhedron.

In our commercially available EarthStar foldable globe/map, we use the UVG 4/30 Diamond (or rhomb). Within this diamond are 4 Basic Triangles, and there are 30 diamonds in the UVG 120 Polyhedron and Sphere (see illustrations #15, #16). This figure permits not only easier assembly of the UVG 120 Polyhedron (in the form of the rhombic triacontahedron) than our pentagon-based hexakis icosahedron, but also permits easy orientation to the four compass points when working with the globe or map (see illustration #17, and chart).

And now we come to our most fascinating discovery of all — the predictive utilization of the Basic Triangle. It is this figure which we knew to be the result of multiple mappings of all five regular Platonic solids on the surface of a sphere or combined polyhedral form (icosahedron and dodecahedron) like the hexakis icosahedron (or rhomb). Within this diamond are 4 Basic Triangles, and there are 30 diamonds in the UVG 120 Polyhedron and Sphere (see illustrations #15, #16). This figure permits not only easier assembly of the UVG 120 Polyhedron (in the form of the rhombic triacontahedron) than our pentagon-based hexakis icosahedron, but also permits easy orientation to the four compass points when working with the globe or map (see illustration #17, and chart).

Illustration #17 (See page 63)
The geometry of EarthStar is the rhombic triacontahedron projection method developed by R. Buckminster Fuller. We have continued to use the numbering system originally published by Russian researchers.
Planetary Grid Projection

Rhombic Triaccontahedron

AC = 1400 mi.
BC = 2200 mi.
AB = 2600 mi.
BASIC TRIANGLE
Unified Vector Geometry (UVG)
Illustration #18

Within the Basic Triangle's 30, 60 and 90 degree angles (whose lines and vertexes define 120 of those triangles, 62 major grid points, and 15 major great circles) are arrayed 45 intersection points and 16 lines which manifest 106 minor great circles and 4800 minor points over the face of the globe (UVG total is 4862 points). By noting the three numbers for the Basic UVG Triangle followed by a single number for a minor grid point (example — Oxford, England falls near 2-11-20/2 on our European maps); two numbers for a minor grid line (example — Italy's boot heel is defined by Basic Triangle 2-1-20/43-28 minor line).

On September 1, 1983, in the pre-dawn sky, a 747 jumbo jet is cruising over the last island in the Aleutian chain. The Korean pilot is relaxed and having coffee as his autopilot is switched onto "Red Route 20," the standard course set for all airliners out of Anchorage to avoid coming within 25 miles of Russian territories north of Japan. At 3:38 a.m. Japan time, the pilot radios that his position is 115 miles south of Hokkaido Island in northern Japan. Ground radar, however, locates the plane 115 miles north of Hokkaido and well into Soviet airspace. At 3:27 a.m., a garbled distress call goes out from the plane — the last message to be sent from KAL 007. Glance at our illustration of the path of the plane on the UVG 120 Sphere and imagine this scenario. KAL 007 crosses planetary grid point 6, approximately 1800 miles east/southeast of Anchorage, Alaska about 1:00 a.m. Thursday, September 1, 1983. The positions of the sun and moon begin bringing enormous energy into the vector line which stretches from the tip of the Aleutian chain to the Mongolian/Soviet mainland west of Sakhalin Island. (See illustration #19). Silently, without alerting Captain Chun the pilot, the geo-compass in the autopilot's guidance system is slowly pulled 22.24° off its corrected north bearing, altering the course of the plane by that amount while simultaneously beginning to energize and speed up the magnetic odometer in the plane's computer navigational system. A fractional addition of a mile is added to each actual mile travelled at an accelerating rate. As the crew and passengers talk about the festivities ahead in Seoul, other smaller aircraft appear behind the 757 airliner. No communication takes place because the pilots of the smaller aircraft are never given international radio frequencies for fear they will defect. Then an explosion, and another, thunder into the ears of the crew. Captain Chun begins his radio distress call, but in four short minutes the lives of all 269 aboard are gone. Compare the above to the flight of KAL 902 out of Paris, bound for Anchorage. The date is April 20, 1978. In the pre-dawn sky over grid point 11, in northern Scotland, the 707's guidance system compass begins to read to an energized line running up from the Bermuda Triangle. Captain Kim Chang Kyu, a veteran KAL pilot, doesn't notice the bearing of his plane changing slowly to 82.25° off his near polar great circle route. The plane moves onto an infill grid line over Greenland. By the time the plane moves into the next basic grid triangle, a passenger notices that the Arctic sun which had been on his right is now on his left. Before he can alert Captain Kyu, a Russian missile slams into the fuselage, killing two passengers and forcing the plane to land on a frozen lake south of Murmansk. As Russian troops appear on the shore, Captain Kyu apologizes to his passengers saying that he had felt something had gone wrong with his compass before the Russian planes had appeared.

Illustration #19

An activation of the grid system appears responsible for the demise of two modern jetliners dependent upon computerized navigational systems. On September 1, 1983, KAL 007 left Anchorage (A) on an intended flight to Seoul, South Korea (K). It was diverted down a minor grid line to a crash sight near Sakhalin Island (S). KAL 902 left Paris (P) bound for Anchorage (A) on April 20, 1978 but was diverted down a minor grid line and shot down near Murmansk (M) in the Soviet Union.

Both incidents, KAL 007 and KAL 902, were based on pre-dawn crossings of major grid points (6 and 11) by sophisticated aircraft which then, unbeknownst to their crews drifted off their programmed course and followed minor grid lines until shot down by uncommunicative Russian pilots.

We predict that there will be other incidents such as these occurring in the future, and not just off the Russian coastline. We feel that incidents such as these help pinpoint the evidence about which Ivan Sanderson theorized in 1972 — that there is a predictable physical pattern of energy events working through the system Chris Bird called the planetary grid.

The "predictable physical pattern" was discovered in quite a different context from earth energy research. While discussing the physical structures which support his theories of geometry (in SYNERGIA, B. R. Buckminster Fuller presented evidence that the micro-photography of balloon skin layers has, under near ideal conditions, produced visible patterns identical to our UVG 120 Sphere surface structure. As interior gas molecules ricochet off the inner surface of the balloon, they manifest their kinetic energy in "great circle" patterns of "shortest distance" frequency. If the ambient temperature of the balloon's exterior can be delicately balanced and equalized — the pattern of the UVG 120 sphere can become visible.

Given that the earth's original formation was based upon the clustered gravitational packing of quadrillions of vibrating cosmic dust particles and gases, in the early eons of our solar system — we feel the analogy of the balloon skin is strongly comparable to the lines of vectorial energy we hypothesize are transiting the earth's surface. Our Basic UVG Triangle reveals
Illustration #20

Buckminster Fuller's configuration of electromagnetic band widths (small sphere) is a hidden master pattern in the UVG 120 Sphere. The similarity to hand-held decorative reed spheres from Southeast Asia is further evidence that such "planning models" have been in common use throughout human history. "If you could only see the reams of tracing paper which spill out of the drawers in my office," writes A.M. Davis. "I have been doing the same exercise with electromagnetic band widths for years. To forecast an event in the Catastrophe Theory, this principle must be used. Whether on a Planetary scale or down to full Earth surface scale of fractions of inches, it is basically the same theory...I have done experiments (with band widths of frequency tunability) in the lab and found the same experiences as reported in the Bermuda Triangle and UFO incidents. This experiment is too dangerous to repeat, and Edinburgh University has agreed to a ban on all attempts to re-enact the experiments. It is potentially lethal. The theory of this phenomenon was known to Attistotle...It is definitely TIME-SPACE-COLOUR-HARMONY syndrome in content, and therefore obeys a numerical law of nature to allow forecasting the event."

A 120th section of these energy lines — and we think that it is totally predictable to find detailed physical manifestations of these lines, particularly on continental land masses.

A possible piece of supporting evidence comes from the Vail/Cyr canopy theory — which proposes a more equalized world climate during the Megalithic period (see footnote ?). If the global climatic ambience were more regularized than it is today, it is possible that grid energy manifestations were also more visible and potentially more available for applied use. Extending the speculation back further in time, the deluge myth round in the myths of virtually all cultures can perhaps be traced to some (Atlantean?) technological endeavor that caused a partial and devastating collapse of the canopy. Before this collapse, the poles may well have been free of ice (hence the existence of maps such as Piri Reis and Buache). Polar ice caps may have formed relatively rapidly in the period of climatic disequilibrium. In this light, Cyr's Megalithic canopy theory is correspondent with our own findings in analyzing Megalithic sites. We have documented in the illustrations of Ireland, Britain, and Europe which follow; a patterned interface of man-made constructions, dating to the Megalithic period, which correspond to our proposed "infrastructure" for the icosahedro/dodecahedral planetary grid. New evidence that we are just beginning to analyze and which includes patterns of mounds within the central United States and the curious "lines" of the Nazca area of Peru, exhibits the same close correspondence. This proves to us that past cultures have been aware of, and attuned to, the energies of the UVG 120 Sphere.

A second analogy to earth's processes we feel comfortable with is the Russian crystal earth concept, whereby coalesced volcanic matter which formed the earth settled initially into a crystal for (UVG 120 Polyhedron). The Russians theorize that with rotation and centrifugal redistribution of molten surface material, the earth soon took on its spherical form but retains the deep crystal structure and its predictable manifestations. One of these is based on the principle that crystal edges and vertexes carry most of the thermal, structural, and electromagnetic energy events developing from within and imposed upon the surface material. Satellite cameras and infrared/radar intruments have already documented thermal/structural energy developments along the globe's UVG 120 Polyhedral edges. It remains for traditional science to develop instruments as sensitive as an experienced dowser's "earth sense" before the full spectrum of the earth's electromagnetism can be tuned like a "crystal set" radio to a wide range of frequency band widths. (See illustration #20)

It is clear to us that Megalithic peoples knew all that we now know about the planetary grid and then some. The stones which they so carefully placed upon ley lines were used to communicate with anyone else linked via common telluric energy flows. (See illustration #21) These energy flows are being mapped today.

Illustration #21

Unobstructed minor grid energy lines focus into a Basic Triangle corner in the British Isles, which have probably the largest clustering of megaliths in northern Europe. Stone circles are indicated by dots.

Illustration #22

Both ley line hunters and dowsers have wondered at the persistent site line-ups of ancient megaliths and more recent sacred constructions (cathedrals, capital cities, shrines, etc.). The diamond-pattern line superimposed on our map shows a transcontinental system of energy ley lines published by Golin Bloy an experienced dowser in Europe. Most of the line has been confirmed by dowsing. The correspondence with the UVG 120 Sphere is apparent. In Triangle 11-20-2, we find Oxford (2); North Sea oil deposits (4-5-6); Rotterdam (9); Hameln, village of the Pied Piper (17); Berlin (13); Chartres (17); Alta Mira (24); Frankfurt (19); Barcelona (35); Cordoba (32); Hamburg (12); and Lourdes (line 24-36). In Triangle 20-2-1, we find Athens (10); Delphi (19); and Assisi, home of St. Francis (43).
Illustration #23

"The tree can be understood as representing the chakras in the body of universal man, the Anthropos...Adam Kadmon. Sacred anatomy = sacred geography. There would be a number of connected patterns of 'trees/men' covering the surface of the globe which, depending upon the scale or application, might correspond to the 'root races' or 'sub-root races' or perhaps even the 12 tribes of Israel (mankind). As there are ever finer gradations of 'trees' within the Sefirotic Tree, the 'extended trees' would create chains and great circles woven across the sphere like the electromagnetic band widths of frequency tunability." Communication from Robert Gulick in Englewood, Colorado.

Footnotes
1. Let us pray that another plague (AIDS, cancer, heart disease...) will not be necessary in completing this scenario.
2. Taken from 'Cultured Notes Among Friends on The Crystal's Dance' by a publication from Crystal Hill Farm, 9416 Sandrock Rd., Eden, NY 14057.
3. Jeffery Goodman is a highly controversial, free-thinking independent archaeologist and author (We Are the Earthquake Generation: The Genesis Mystery) who was among the earliest pioneers of "psychic archaeology." His current work focuses on health and crystals.
4. We want to thank Robert Cowley of the Research into Lost Knowledge Organization (RILKO), 8 The Drive, London N11 2DY (England) for introducing us to A.M. Davie of Ailse Scotland. In our long, enjoyable correspondence with Mr. Davie, we have found him to be a gifted scholar of ancient languages and cultures, a keen observer of coincidence.

Illustration #24

L. Taylor Hansen, in a little known book entitled He Walked the Americas, presents over thirty years of research documenting the presence of a white-robed fair-skinned man known throughout the mythologies of the Americas (among many other names) as The Lord-of-Wind-and-Water, Tah-co-mah, or Kate-Zahl, the Prophet. The map shows the path of his pilgrimage, beginning in the western ocean, circling the major American grid points, and ending in the eastern ocean horizon. It is possible that "Jesus Christ" is our surviving mythology of sacred pilgrimages on the "Gizeh Crystal."
6. Curiously, "armilla," the root in armillary sphere—has the meaning of, "iron ring," and "golden coronation bracelet."

7. Donald Cyr, editor of *Strangelove Tomorrow* and his friend Lawrence W. Smith have championed and greatly expanded the ideas of Isaac N. Vail since their high school days in the 1930s. As an archaeoastronomer, Cyr's notion is that much can be gained in understanding past civilizations if we do not make the uniformitarian assumption that things (such as climate) have always been roughly as they are now. The Vail/Cyr 'Canopy Theory' supposes that during the Megalithic period, a layer of ice crystals formed over the earth at a height of about fifty miles. This could have produced something like the greenhouse effect—a mild, relatively windless climate with the atmosphere at the dew point—over most of the earth, with spectacular halos around the sun and moon. The light of the sun shining through the ice crystals would have been so brilliant that it would have been impossible to gaze at it directly. Because of the optics of light refraction through the ice crystals, however, each halo edge would fall 22 degrees from the center of the sun—with a less common, but equally regular secondary halo occurring 46 degrees from the center. This glorious sky phenomenon could have given man the world over a predictable common unit of measure. A related effect of the canopy may also help explain the seemingly phenomenal knowledge of astronomy among the ancients. Joe Jochmans (writing as Jalandris) received an honorary doctorate for his interpretation of Genesis based upon canopy and other earth energy effects. He claims that the canopy may have magnified the light from the stars and planets and made them appear closer and much easier to view with the unaided eye than is possible today. His other fascinating theory is that the Megalithic canopy was preceded by an even larger more magnificent canopy that ultimately collapsed—producing the great deluge and rain of forty days and forty nights that is recorded in the sacred tradition of virtually every culture on earth.

8. Sir J. Norman Lockyer, writing in the early part of this century, was perhaps the first contemporary archaeoastronomer — having discovered significant alignments between megaliths and celestial bodies. His work was largely rejected, as were his very humanitarian politics that echo his British predecessor Alfred Russel Wallace, though it forms the base for later work sponsored by Alexander Thom.

9. Dick Benson's work, formally presented in June of this year to the U.S. Psychotronics Association meeting in Atlanta, holds the promise of a unified field of lettevans and numerals. His "World's Oldest Jesus II Map" is reported to give not only a glimpse of the complex geometry employed by the ancient planners at Cairo but to hint at the sophistication and refinement of Benson's work. One of his most exciting archaeological discoveries is a virtually identical "site plan" based on the pyramids at Teotihuacan in Mexico.

10. "Morphogenetic fields" were introduced by British biologist Rupert Sheldrake in another controversial book, *A New Science of Life: The Hypothesis of Formative Causation,* suggested for burning by *New* magazine in Britain. The theory is complex, implying that once something comes into existence (an idea, a gene code, a chemical structure...) it exerts a specific cosmic niche, sends a kind of formative energy throughout Gaia, and makes its appearance quickly and with increasing ease throughout the world. Currently the Tarrytown Group in New York is offering a prize of $10,000 for the best experimental design to test Sheldrake's theory.

11. Over the past year and a half, students in anthropology and environmental planning at Governors State University have undertaken the tedious, not-yet-computer assisted task of checking the fantastic claims of the Russian visionaries. (Several students, among them Penny Fick, Tim Donovan, Jay Rick, Denis Chapman, John Lerch, and Mary BoyaJean, have put in far beyond the required time and effort and have been brave enough to criticize and question almost everything!) In general, the students' work has involved the translation of data from various atlases and sourcebooks from their Mercator, conical and spherical projections to the hexakis icosahedron and rhombic triacontahedron that we use for standardizing data. For the most part, the Russian claims hold up but are substantially overgeneralized—particularly with respect to electromagnetic aberration.

12. EarthStar is printed in full color on heavy cardstock. 17 1/2" x 11". Over the past year and a half, students in anthopology and environmental planning at Governors State University have undertaken the tedious, not-yet-computer assisted task of checking the fantastic claims of the Russian visionaries. (Several students, among them Penny Fick, Tim Donovan, Jay Rick, Denis Chapman, John Lerch, and Mary BoyaJean, have put in far beyond the required time and effort and have been brave enough to criticize and question almost everything!) In general, the students' work has involved the translation of data from various atlases and sourcebooks from their Mercator, conical and spherical projections to the hexakis icosahedron and rhombic triacontahedron that we use for standardizing data. For the most part, the Russian claims hold up but are substantially overgeneralized—particularly with respect to electromagnetic aberration.

13. There are many people whose contributions, insights, and encouragement have been essential in keeping us so absorbed in this research — especially Tim Wilhelm, Robert Warth, Robert Galick, Edwin Wright, John Mitchell, R. Gary Smith, Robert Lawlor, Jose A. Arguelles, the Rev. Dorothy Leon and L. Taylor Hansen.

</table>
Waves of gravity pour from an extraordinary (and imaginary) cosmic accident—a head-on collision of two black holes approaching from left and right. Kenneth Eppley and Larry Smarr used a computer to calculate and draw contours of the variable curvature of space that constitutes the radiation. Such a collision would convert about a thousandth part of the rest-energy of the black holes into gravity waves. (Photo L. Smarr and K. Eppley)

Sound frequencies in this experiment cause random particles to assume geometric patterns. From Robert Lawlor's *Sacred Geometry* (1982)
THE EARTH GRID, HUMAN LEVITATION
AND GRAVITY ANOMALIES

Knowledge of the Earth Grid or "crystalline Earth" is very ancient and has been utilized by a number of civilizations. The pyramids and ley lines are on the power transfer lines of the natural Earth gravity Grid all over the world. The Earth Grid is comprised of the geometrical flow lines of gravity energy in the structure of the Earth itself.

While the subject of the Earth Grid has by now been covered in a considerable number of publications, one point in the Grid, marked by a long and strange history, at the eastern tip of Lake Ontario, is worth special mention. Most interesting here are two individuals, living one hundred years apart, who were both directly affected by this same Earth Grid point. These men were Daniel Home, the 19th century psychic, and Wilbert Smith, the 20th century scientist.

Daniel Home is the world famous levitator of the 19th century who lived in this Lake Ontario Grid point area. The period from 1820 to 1850 was apparently very active for this Grid point as many of the crowned heads of Europe and many noted scientists and world dignitaries visited Home and verified his feats of levitation. It is speculated that the Lake Ontario region may have acted as a bioelectric triggering device conducive to Home's psychic development.

Meanwhile in the 20th century, because of numerous aircraft crashes in the Lake Ontario Earth Grid area (known as the

About the author

Richard Lefors Clark, Ph.D lives in San Diego and is one of the world's best known alternative energy, anti-gravity and World Grid researchers. His articles have appeared in a large number of journals and newsletters over the years. Correspondence and requests for his free newsletter may be directed to:

Marysburgh Vortex, and regarded as "the Other Bermuda Triangle" and "the gateway to oblivion on the eastern end of Lake Ontario"), the Canadian National Research Council and U.S. Navy began Project Magnet in 1950 to investigate the area's magnetic anomalies and possible magnetic utility. This has been the only known official governmental research program into the Earth Grid system. A considerable number of planes and ships had mysteriously vanished from this region, while many UFO sightings were reported, and other bizarre and unearthly phenomena were noted. (For more information, refer to Hugh Cochrane's *Gateway to Oblivion*, Avon Books, NY)

Wilbert Smith, a Canadian communications engineer in the Department of Transportation, was director of the team of scientists involved in this project. Project Magnet was later officially terminated when the results became too sensitive for the two governments, as the research seemed to touch upon top secret UFO data. Afterwards Wilbert Smith designed several inexpensive gravity devices, such as the Anti-Gravity Proximity Detector, the Magnetic Deflection Detector, and the EMF Collapse Collector.

Smith's speculations are most intriguing. He noted large and sometimes mobile gravity anomalies all over the Lake Ontario area. He noted areas of "reduced binding" in the atmosphere above the Lake; the areas were described as "pillar-like columns" a thousand feet across and extending for several thousand feet up into the atmosphere. Moreover, they were invisible and only detectable with sensitive equipment. Peculiarities in gravity and magnetism were noted inside these columns, possibly related to a reduction (or weakening) in the nuclear binding forces holding matter together; the nuclear binding forces seemed stronger in the north and weaker in the south. Some of these mysterious columns appeared to be mobile changing location over time.

Smith theorized that when the weakened nuclear binding forces encountered matter under stress (such as an airplane in flight) the forces holding matter together ceased to exist, exactly along the lines of maximum stress, and the material disintegrated resulting in aircraft disasters. Later theorists suggested that ionization of the air within these columns could generate luminous anomalies, and that increasing energies could make rocks and other dielectrics in the immediate area appear to rise from the ground into the air.

It was also proposed that deep Earth-caused gravity stresses produced the strange atmospheric columns. In a gravity-structured Earth which is part of a gravity universe,
that is the mildest form of truthful statement possible. On a planet so determined by gravity, this would be only one of many such gravity-magnetic anomalies present on the Earth Grid. And underlying many of the magnetic peculiarities observed around the Earth is the special principle of diamagnetism, the root of anti-gravity. First we'll see this principle at work in the local context of human-induced levitation.

**HUMAN DIAMAGNETISM GRAVITY ANTENNA LEVITATION**

The principle of diamagnetism which underlies human-induced levitation and anti-gravity vortexes on the planet can be demonstrated simply in what I call the human gravity antenna. Diamagnetism (explained below) is essentially a magnetic-neutral zone existing between a north and south magnetic field, which can be exploited for purposes of levitation. As I will indicate below, there are many such "magnetic flow reversal points" on the Earth marked by Grid points.

An arrangement of five human beings can be used as a quadruple gravity antenna to perform levitation of the central person. The weight of the central person, the levitatee, does not matter nor is the lack of strength or size of the four levitators important. What is important is the form of the quadropolar positions around the central levitatee (See Diagram 1). Here are a few pointers to keep in mind.

First, the levitators should be positioned 45 degrees off the magnetic compass direction of north, south, east, and west for maximum effectiveness. Second, alternation of male and female sex of the levitators adds to the gravity antenna's power. Third, the hand stack on the head of the central levitatee by the levitators should not have like-gendered (male/male, female/female) hands touching. Fourth, there's no need to think of anything—just hold the hands stacked on the levatee's head for a count of ten. On the tenth count remove the stacked hands quickly and place one finger each on the four corners of the chair. The person in charge of counting says "lift" and up goes the levitatee. Now let's examine this phenomenon I like to call "Party Levitation" in more specific and practical detail.

To do Party Levitation you will need five people, one to be levitated—henceforth to be called the levitatee—and four to do the levitating—henceforth to be called the
Diagram 1

Party Levitation in action

Diagram 2

Human Quadropolar Gravity Antenna
levitators. The levitatee sits in a chair and the four levitators stand around him so that they form a square. One levitator should stand to the levitatee's left, and just behind his shoulder. Another levitator should stand in front of him and to his left, close to his left knee. The other two should stand on the right side of the levitatee's body and in similar positions.

Now the object of Party Levitation is to make the levitatee's body so light in weight that the four levitators can lift him several feet into the air using a single finger each. If the experiment is performed properly none of the levitators will feel the slightest resistance to their efforts. It will be as if the levitatee's body has lost its weight entirely.

While the levitatee is sitting, the four levitators surround him in the manner indicated and place their hands, one atop the other, on his head, as if they were healing him by the laying on of hands.

The person who is going to float must sit relaxed in a straightbacked chair with his legs together, his feet on the floor, and his hands in his lap. The other four participants now stand two on each side of the seated party, one at each shoulder and one at the knee. Instruct all four to extend their arms and place their closed fists together, closed except for the forefingers which should be extended and touching each other along their lengths as shown. The person nearest the seated man's left shoulder is now asked to place his two extended fingers, palms downwards, beneath his left armpit. Likewise, his opposite number inserts his forefingers beneath the right armpit, and again the other two respectively beneath the seated man's knees.

Now invite the four assistants to lift the man in this position, using only these extended fingers. However hard they try, it is impossible. As soon as you have registered their inability to do so, ask them to stack their hands alternately, one on top of the other on the man's head, in such a way that no person has his own two hands together, and then to exert a steady pressure downwards. As they keep this up you count to ten. On the count "nine", they must withdraw their hands quickly from his head and resume their earlier positions with their extended forefingers. On the count of "ten" they must try again to lift the man with those fingers alone. This time he will go soaring into the air with no difficulty whatsoever.

Diamagnetism And Levitation
Accomplished at Earth Grid Points
Now, kind reader, reconsider Party Levitation and perhaps do the experiment again but this time have no central person (levitatee). Instead use the heaviest chair you can find. Just stack the hands, touching on the top of the massive chair back and lift (levitate) the heavy chair. Next, place hundreds of pounds of "dead" weight (heavy books) on the chair seat and still levitate it easily with four weak children lifting. What is happening here?

You have created a small, short-duration diamagnetic levitation vortex which is identical in function to the Earth's big, permanent diamagnetic levitation vortexes at such places as Coral Castle, Florida, or Alice Springs, Australia.

Now, reconsider the diagram of the four persons levitating the massive chair. As humans they are the "mighty four" of the four cardinal compass points. Each one of the four is an energy lobe around the central object to be levitated. If I call any one of them north, you can call the others, turning counterclockwise, west, south, and east (See Diagram 2). Try doing the levitation with only three people, positioned off-center to the appropriate 90 degree spacing. We know that both the exact number and pattern of the human levitator element, but not their exact size or physical strength, are critical to the levitation. Also we know that inanimate weight levitates as easily as animate through using a human diamagnetic vortex. We might try a piano or even a Volkswagen in place of the chair.

The remarkable thing about Party Levitation is that it works anywhere on the Earth's surface, whereas the equivalent big, permanent Earth Grid diamagnetic levitation vortexes all have fixed geographic locations (e.g., southern Florida or central Australia).

Whether it's on the surface of the Earth, or within the human sphere of the four levitators, the mechanism for levitation or anti-gravity is identical. In either case there are four energy lobes or directions. The north-south axis elements are usually called magnetic and the east-west axis elements are called diamagnetic.

Levitation is produced by diamagnetism existing on the surface of the Earth, (or near it). Diamagnetism operates at 90 degrees from magnetic, but in three directions, and not flat and two-dimensional on a sheet of paper as usually drawn. If magnetism flows in the plane of the Earth's surface, then diamagnetism flows straight up. And straight up is the direction that we call levitation or anti-gravity.
Sculpture symbolic of the moon and planets, constructed by Edward Leedskalnin at Coral Castle, Florida. With elementary tools and equipment this Latvian immigrant created artifacts whose construction defies "logical" explanation.
In the accompanying diagram (See Diagram 3) Coral Castle's location is shown as Earth grid point #18. The west lobe is what pulled Florida down and opened the Keys area up. The east lobe is the Bermuda Triangle. Coral Castle will be referred to throughout this chapter, so a few words here of introduction to this impressive project are necessary. Coral Castle is a marvellous demonstration in stone and coral of many hidden principles of magnetics, designed and built in southern Florida by the "amateur" scientist Ed Leedskalnin in the 1930s and 1940s. This coral-based temple/residence includes stone furniture, a Moon pond, a North star telescope, a precise Sundial, and other features of exact astronomical alignment.

Look at the larger map of the Earth grid (See Diagram 4) and see the diamagnetic (east-west) lobes of Earth grid point #18 in southern Florida. The tip of the Yucatan and the Mexico/Texas coastline clearly show the west diamagnetic lobe shape of Earth grid point #18. The famous Bermuda Triangle is the east diamagnetic energy lobe of Earth grid point #18 (in season).

One thing we will immediately note is that the east-west diamagnetic lobes of #18 look like a horizontal "bow tie". This happens to be another descriptive name for what is now called in the magnetic sciences a Bloch Wall. The Bloch Wall is central to our understanding of diamagnetism, gravity vortexes, and levitation.

A Bloch Wall is a neutral center region at the junction of two magnetic poles (north/south). (See Diagrams 5, 6, 7) It is thereby a "magnetic flow reversal point" and is also known as a "diamagnetic vortex point". The Bloch Wall is the point of division of the circling vortex, or spin, of the electronic magnetic energies of the north and south poles. The negative energy pole and north pole magnetism spins to the left: the positive energy pole and south pole magnetism spins to the right. The point of zero magnetism and no-spin, and also the point of magnetic reversal where the two spin fields join, is the Bloch Wall.

We have two antithetical elements (polarities) meeting and generating a third element, the Bloch Wall, which is a weak pressure (gravity) generator. The south pole is the source and the north pole is the sink. The individual pole energy rotations are three component vectors and the conjunction (Bloch Wall) is a tensor. The resulting "Broken 8" figure is a two dimensional concept of a quadropole pattern. We can visualize it as the spin 2, circularly polarized, gravity wave force field source.
Diagram 4
Earth Grid Model
(after Francis Hitching data, *Earth Magic*, 1978)

A, B, C: The plate push pressure north along #58, 48, 35, and 18 hits at New York (Brookhaven) at the cross pressure from #19. This causes the New England Vortex and the Bermuda Triangle.

A, B, C, + D: The plate push pressure centers on the California fault line at San Diego and causes the Southwest Vortex.

E: The plate pressure coming north from #54 bows up the cross pressures from #43 and #45 and down pressure from #14 to cause the Alice Springs/Pine Gap, Australia area; #12 and #16 are pressure top sides.

F: The pressure center point at Lop Nor, China, is between the points #12 and #14 and #43; Grid Points #41 and #45 push from below.

G: The minor pressure center point at Sinai is between points #20 and #12, with up pressure from #41; the plate breakup and slide pressure just below it has made Sinai useless now.

H: Las Vegas, Nevada, and Phoenix, Arizona (Superstition Mountain) as center of #16, #17, and #18; the push comes from A. below.

I: Amchita Island on #6, centered between #14 and #16, plate bucking pressure #5 and #33).

Two antithetical force fields, the magnetic and the electric (two vector force fields) meet and generate gravity, a neutral center force field and simple two vector system (tensor). We can state this slightly differently by saying the conjunction of two dipolar generated force field vectors (magnetic and electric) generates a quadropole force field, or gravity. Gravity, as a quadropole source, radiates in a circular 360 degrees polarization pattern, taking two cycles; thus a "spin 2" characteristic exists for gravity, and therefore gravity waves have twice the spin of electromagnetic waves.

The lack of polarization in the gravity field explains why it cannot be neutralized. As a neutral center force element, gravity cannot have polarities by definition. But it is still just as basic a generated force as the polarized forces of the magnet or the electric fields. The electric field, as well as the magnetic field, has a neutral center effect that is also a gravity wave field source. The two polarized main antithetical force fields (magnetic and electric) are triadic in themselves, as polarization by definition requires, and thus they are both gravity field sources.

In all electromagnets the Bloch Wall is actually external to the unit (See Diagram 8). The Bloch Wall, the neutral center gravity wave source, is now in the gap between the magnet faces. In terms of the electromagnetic spectrum, the point of $10^{12}$ Hertz is marked as gravity, while below this is radar, radio, and standard EM frequencies; above it are infrared and optical energy frequencies. This is Nature’s neutral center in the radiant energy spectrum where Her standard design triadic system demanded it be placed. $10^{12}$ Hertz is the frequency of radiated gravity (See Diagram 9).

In terms of the Earth Grid, where the Bloch Wall of gravity wave field source exists, certain physically anomalous events can take place—such as spontaneous levitation.

The Earth's diamagnetic flow field hits a reversal Bloch Wall area (south to north), at these special anomaly points like southern Florida or central Australia. The Equator Line is merely a myth for geographers and fools. The magnetic reversal areas of south to north magnetism flow are near the Tropics of Capricorn and Cancer; and these "spaced out" anomalies seem to alternate positions around the globe.

The best calculation I've arrived at indicates that there are within the Earth Grid a total of 20 magnetic reversal points, with 10 nearly on the Tropic of Capricorn and 10 magnetic reversal points nearly on the Tropic of Cancer. The two sets of ten points are offset almost equally from each

other going around the globe; the northern set is roughly midway between the southern set (See Diagram 10).

The planetary distribution of these magnetic reversal points is indicated on the accompanying map. On the large Earth Grid map the northern magnetic reversal points are near #16, 17, 18, 19, 20, 1, 12, 13, 14, and 15 from left to right near the Tropic of Capricorn. The southern magnetic reversal points are near the Tropic of Cancer near Earth grid #46, 47, 48, 49, 50, 41, 42, 43, 44, and 45. The grid map has to be shifted leftward in the South to space it more nearly correct. The North is closer to true. The resulting Earth grid map puts #44 between #13 and #14, for example.

This is the real magnetic flow reversal pattern on the Earth such that above #44 is the northern magnetic flow reversal point (Bloch Wall). This has a beautiful bow tie of diamagnetic energy flows that can be clearly seen as the east and west coastlines of Australia. The plate push from below forced the diamagnetic bow tie up some but it is still very usable.

Why haven't we known about the existence of these 20 magnetic-gravity anomaly points on the Earth Grid before? A compass points North-South anywhere, and so, hiding facts and using the myth of the Equator's magnetic polarity was expedient for our cunning "masters"—the "power elite" who control this planet. The reason for hiding it is obvious: If you knew this truth then you would know that Coral Castle, Giza, Alice Springs, etc., were Bloch Wall (bow ties) or Diamagnetic Vortex Points. Extraordinary things can be done at these diamagnetic bow tie reversal points, such as levitating extremely heavy objects (building Coral Castle and the Great Pyramid of Giza) and launching (secretly) the real, massive space ships and probes (as at Alice Springs, Australia, and Lop Nor, China, for example).

Official knowledge of the considerable utility of many magnetic-gravity anomaly points on the Grid has taken obvious precedence over any concerns for public safety. If the officials warned the fools in planes and boats to stay out of the Bermuda Triangle at certain times, then ordinary citizens would know too much of their secret knowledge. If you are in the wrong place on the wrong day in the Bermuda Triangle you will be a permanent piece of space junk some 20,000 to 75,000 miles out in space.

The Bermuda Triangle off the Florida coast, when active, is a powerful diamagnetic levitator. Usually the Earth contains the energy flow, but with extra stress from the Sun, Moon, and
temperature factors, it ruptures upward and levitates anything over the "blow" points. Smaller ruptures will levitate anything under about 500 pounds—such as people—but not the ships they are on.

The magnetic energy flows encounter the Bloch Wall, or bow tie reversal, at these grid locations on Earth. Nature uses the exact same method in a small permanent bar magnet for magnetic polarity reversal. The Bloch Wall is just a great deal larger and much more powerful when operating on the Earth.

Didn't anyone ever wonder why there were no Bloch Wall effects on the mythical Equator? If all the Bloch walls for South to North magnetic polarity reversal were at the Equator, no one would have ever crossed it. That is why Nature designed the criss-cross mesh reversal system for polarity reversal. And that is why there are Earth Grid points where the unusual diamagnetic systems exist. These points work extremely well, facilitating the construction of places like Coral Castle or the Great Pyramid or aiding the functions of secret space programs—which are all only large-scale versions of our Party Levitations, using natural Earth diamagnetism as a levitator force.

The principles of diamagnetism clearly explain the reasons behind the exact location of secret or publicly-known exploitations of magnetic-gravity anomalies on the Earth Grid. The "knot" top (north) on the "bow tie" magnetic reversal in a simple bar magnet reversal is the prime location to stage a major gravity-defying feat such as Coral Castle, the Great Pyramid, or an Alice Springs/Lop Nor space program (The Lop Nor desert is where the Chinese space program and nuclear testing is centered). The center area of the Bloch Wall (the bow tie's knot) is the steadiest and strongest magnetic (north) point, which is where Leedskalnin put Coral Castle, the Egyptians put the pyramids, somebody put the Easter Island statues, and where the governmental elites put the Alice Springs/Lop Nor sites.

The inventions and researches of the insightful Austrian scientist/naturalist Viktor Schauberger demonstrate the principles of diamagnetism on a small scale of polarity reversals operating in a simple bar magnet. His levitations are diamagnetic systems using water flows. Diamagnetism is the product (or effect) of a flow polarity reversal, like the Bloch Wall of the magnetic flow. Some waterfalls and streams have natural flows of diamagnetism or flow reversal effects. Schauberger simply built artificial water flows with internal powerful reversals in flow energy. These are simply a tubed
version of a Bloch Wall system.

The Schaubberger water levitators are all continuous type devices for anti-gravity effects. The trout fish, after which Schaubberger named his water turbine, senses the coldest area in a waterfall for levitating up it. The waterfall's central spiralling cold flow is an anti-gravity effect area where the energy is driven out (reversed) to directionalized momentum as a natural anti-gravity system. A waterfall's center registers as a zero (or under) on a stressed gravity detector due to the reversed anti-gravity momentum. Schaubberger copied this natural design of spiralling cold water flow for levitating system, in his logging flumes and turbines.

Schauberger's implosion turbines interrupted the water suction flow by a special shutoff valve, thus creating a reactive back-pressure force in the same direction as the implosion turbine. This reactive back-pressure force is the lifting (discharge cycle) or levitating action (directional momentum) of these types of devices. The Schaubberger water turbines were used as the levitators in his versions of the German World War II Project V-7 Fighter aircraft.

Thus both Victor Schaubberger and Edward Leedskalnin, the builder of Coral Castle in Homestead, Florida, wrote about and demonstrated magnetism and the mechanism of levitation applying natural Earth Grid principles of diamagnetism. (Editor's Note: Refer to Living Water-Viktor Schaubberger and the Secrets of Natural Energy, by Olof Alexandersson, Turnstone Press Ltd., Wellingborough, England, 1982. Also: Magnetic Current, Edward Leedskalnin, Homestead, FL, 1946)

Leedskalnin had two secrets. First, he knew where, in terms of the Earth Grid, to build Coral Castle. Second, he knew how to do Party Levitation all alone. Try to figure that one out!

Leedskalnin could levitate huge pieces of coral by using the center of mass for the needed slight uplift launching pressure. In Party Levitation, the four outside levitators are lifting the center of mass from the outside edges. If three of the four levitators were to step back at the end of the count of ten hand-stack (charge cycle) and the one remaining levitator would then quickly bend down and reach under the chair to the center of mass and use only two fingers to push upward, then the center man in the chair will levitate. Leedskalnin used a stick or board to push upward at the exact center of mass of his coral slabs to levitate them.

Two of the humans (180 degrees apart) in the Party Levitation scenario are "seen" by Nature as diamagnetism
sources. The four people are a small, temporary Earth grid point as far as Nature is concerned. Thus the Bloch Wall reversal effect, or diamagnetism, is created and thus levitation of the central area object results. Schauberger put the mechanism in water tubes and Leedskalnin played alone with his massive stones, but in either case, it is exactly the same process of diamagnetic levitation.

We must remember Leedskalnin was working on a Diamagnetic Earth Grid Point, so all mass objects in that area are always "charged" and easily lifted at their center of mass by a slight upward pushing pressure. Incidentally, due to the shifts in the north and south magnetic poles, Grid Point #18 is now inside Homestead Air Force Base; thus Coral Castle could no longer be built where it is now located.

Here are some additional comments on the subject of anti-gravity, or levitation. The reason for the weight of a mass in a gravitational field is the counterpush of the two masses' gravity radiations. As humans we push more powerfully on the Earth via our stress body than the Earth pushes on us. The total of the two pushes of gravity is so-called weight. If we lose gravity (stress push) by radiating it, as in the Party Levitation central element (levitatee), we push less. As our push (gravity) decreases, the Earth's push-effectiveness on us increases. This is "weight loss" or levitation, which is really just letting the Earth push us away. It is not the total quantity of the masses that counts but the effective local gravity field's relative strength.

For example, in the fire hose there is a decrease in the gravity (push) of the water. Thus the Earth pushes the water away, or in other words, the "weight loss" carries further. The circular (quadropolar) pattern of the whirling fire hose nozzle radiates (relieves) some of the water's gravity (stress). It's important to note that Schauberger's designs are based on this kind of water stress (gravity) control.

Levitation (weight loss) control is generally stress lowering via radiation, using gravity's natural characteristics. It works on either organic or inorganic mass, as gravity is the same for both. Think of it as the resultant pushes of two radiating sources, taken locally (These are "near field" design problems). Humans are locally a more powerful source of gravity than the Earth because we push down on it. But as we lose gravity (stress push) power, the Earth pushes us away.

Here are two final observations in this regard. The forms of self-levitation or single operator induced human levitation appear to be hypnotic trance-state "shut downs" of the human
body's gravity (stress) generation. Inorganic object levitation, if it is possible, is the "shut down" of the gravity (stress) generation of the object itself. Theoretically this object levitation is possible (as suggested by Coral Castle, pyramids, etc.).

A general theory of levitation systems must cover all of the various methods known to exist. This means there is a common factor among the diverse approaches of Earth Grid, Party Levitation, Dean Drives, Hooper/Over-Unity Electrical Generators, and Schaubergers devices. The common factor is the **Zero-Spin Energy Transfer**, or the flowing of the nonspin energy. This nonspin energy is a neutral center type of energy flow related to the Bloch Wall phenomena and is the cause of the various types of levitation.

In the Earth Grid Magnetic Reversal Points the straight-up, diamagnetic energy flow is a nonspin energy flow. This energy flow is exactly halfway between counterclockwise (north) and clockwise (south) flow and therefore it has no spin. Thus the Bow-Tie Knot levitation energy is a nonspin energy flow.

In Party Levitation the four levitators drain or temporarily stop the spin energy flow around the levitatee or the inanimate objects. Thus they create a very temporary nonspin energy center which easily levitates.

The Dean Drive type devices cross-cut or dump energy during the Critical Action Time that is, in fact, a nonspin energy. Mechanical as it is, the Dean Drive can generate directionalized momentum (nonspin energy flow) and therefore can be used as a levitator system.

The electromagnetic collapsing field reversals of Hooper or Over-Unity Generators, generate a nonspin energy flow for short periods during each cycle of operation. Any energetic flow reversal generates some nonspin energy flow. Therefore, electrical coils reversals generate some nonspin energy flow and can be used as levitator devices.

Schauberger energetic water flow systems are reversed by valving, identical to the electrical coil systems. Therefore the Schaubergers turbines generate some nonspin energy flow and can be used as levitators.

In a universe of basically spinning energy and particle systems, this nonspin energy has very powerful effects. The nonspin energy is the neutral center force field, belonging to neither side of a generally polarized universe. As such, it is reacted with and repelled very strongly by all energy and particle systems. By the generation of nonspin energy flows and
the directional vectoring of these flows, we can design most powerful levitating devices.

If Nature follows rules, which She does, then all we need do is understand Her methods then apply them. Since diamagnetism is a reaction vector at the reversal point of an energetic flow system, all levitation methods must be similar in Nature.

**Vortex-Gravity Research Areas Strategically Sited on Earth Grid Points**

A most interesting pattern of vortex-gravity research exists in the United States and Canada. The pattern is a counterclockwise vortex with four turning points or main centers/corners. The four main centers of vortex research are the extreme southern California area (San Diego and vicinity), northern Idaho (Coeur D'Alene area), northern New York State (Hudson River/Montreal area), and northern Georgia (See Diagram 11).

This box-shaped pattern bows both inward and outward as it widens in the North-South axis, which is made of the two-bowed continental coastlines and the major interior mountain ranges on each coast, with a center at Kansas City (Ellsworth). On the western vortex flow the bowing widens and follows the Pacific Ocean coastlines on one side and the Rocky Mountains on the other side going southward. On the eastern vortex flow the bowing widens and follows the Atlantic Ocean coastline on one side and the Catskill/Appalachian Mountains on the other side going northward. The east-west vortex flows are relatively straight and narrow between the coastal vortex flows, to complete the general description of the box shape. (Consult the Earth Grid maps below to see these patterns clearly)

Another interesting aspect of the Eastern vortex flow is that "pressure" flexing out of the southern Caribbean Ocean coming north against the flow produces the anomalous Bermuda Triangle and Lake Ontario phenomena. Once this Earth Grid energy vortex flow gets pushed over or across or into water, massive spontaneous levitation phenomena will occur. The vanished planes, ships, and people often reported are actually thousands of miles out in space from the vortex-gravity toss. NASA knows this fact.

Schauberger’s water vortex-gravity levitators are based on the same effect (though on a small scale) as the Bermuda
Diagram 12

Worldwide Gravity Vortex Research Areas Plotted on the World Grid
Triangle/Lake Ontario phenomena. The old Eldridge (Philadelphia Experiment) data recounts side-effects of the vortex-gravity phenomenon. The Bermuda Triangle is a slanted out push of the north-south gravity-bucking flows, and Lake Ontario is a focussed slanted in push of the north-south gravity-bucking flows. This is because the Atlantic coastline's land shape acts as an optical lens system to these bucking-gravity flows.

The location of these special vortex-gravity regions makes them most appropriate sites for specialized research (See Diagram 12). Government vortex-gravity research would have to be at Brookhaven, Long Island and Los Alamos, New Mexico, under the disguise and security of supposed atomic research. Brookhaven is the best location due to the land fall pinch on the Hudson River flow. International governmental vortex-gravity research would have to be at Alice Springs/Pine Gap in Central Australia, because of the Earth Grid requirements and again under the disguise of atomic research.

From the above data, it can easily be seen that the geographical shape of the United States (coastlines, mountains) is not accidental. Kansas City (Ellsworth) is a midway point and Las Vegas is directly centered as #16, 17, and 18. Moreover, the pressure sources from South America flowing northward to buck the natural Earth Grid flows in the North America vortex also help produce the Bermuda Triangle and Lake Ontario phenomena.

Note the accompanying maps. Australia's map shows why Alice Springs is used for gravity research—note how the MacDonnell Mountains turn 90 degrees to run east-west against the pressure flow above Alice Springs. Australia's very shape gives away the pressures that have been applied to it. The bowing pressure from the Arctic area is obvious in the shape of the Aleutian Islands, but Amchita Island right on Grid Map point #6 is the best for gravity research. It has plate push pressure on either side of it as well.

Ed Leedskalnin understood completely that the exact location is critical for building such a structure as Coral Castle. But how did he know exactly where Mother Nature would allow him to site this marvellous example of levitational engineering? Quite simply, he observed Nature, which is all it takes to have true knowledge of the natural forces of Earth.

Nature's Gravity Vortex Center pulled Florida counterclockwise around some 90 degrees to its vortex center
like a gate-leg table. The Gravity Pull Center Vortex energy also pulled counterclockwise on the southern end of Florida itself. On the map of southern Florida I have drawn the opening arc and the exact Gravity Pull Center, which is at maximum some 10 miles on either side of the physical center, but strongest in the maximum counterclockwise position of North. Draw a triangle from where the Florida Keys start to where they stop to see the Gravity Vortex Pull Center point. The land's end, at Key Largo, is exactly as far south from the Gravity Vortex Pull Center as Coral Castle is directly north. This is what Leedskalnin saw on his maps.

The specific site location for Coral Castle and Homestead A.F.B. in southern Florida is situated at the maximum Gravity Pull Vortex Center position (counterclockwise or north). The distance from the Vortex Center is measured by using "land's end" at the South to tell you where the maximum equal point location straight North (maximum counterclockwise) of the Vortex Center is.

All that Leedskalnin had to do was "see" what the maps were telling him, because Nature draws vivid, exact pictures of Her forces for those who have eyes to see them. Then Leedskalnin simply used this Gravity Pull Vortex Center to levitate the huge blocks of native coral into place to make his Castle. A five year old could stack up automobiles in that general area. Once the operation of the Mother Earth's gravity system is known, then engineering artificial systems is simple.

The patriarchal scientists of the cunning and stupid varieties who study gravity at these locations will fail because they all hate Nature, the female, and reality. Whereas "simple" men who like Nature and only observe Her thereby accomplish great things—witness Schaubeger and Leedskalnin. The control attitude of patriarchal religions or secular humanism cannot force Nature with their writings, equations, and bulldozers to do anything. If you really want to engineer Nature's systems and forces, you must adore Nature, the female, and reality, an attitude which is the total inverse of the present patriarchal/scientific system.

Our newfound awareness of the geopolitical importance of certain diamagnetic Earth Grid Points introduces the subject of Earth Grid Wars.

The "Three Floridas" (Florida, Korea, and Vietnam) are still critical Earth Grid points after two bloody wars(See Diagram 13). The "boost shock-point" to this triangle is Libya. The Caribbean Plate has more recently seen a triangulation.
attempt that ended in military invasion. The Caribbean Plate triangle shock-wave system was to have been Grenada-Cuba-Nicaragua. The next try in this general area is absolute control of the Chilean Earth Grid point. The Union of South Africa's Grid point is critically necessary for control of both Europe and Australia. The Phillipines position on the major fault/plate system is pivotal to control of both Australia and Japan in the Pacific Basin. The Soviets already have secured and activated the site in Afghanistan.

Now, read again about the targeted countries in the daily newspapers and figure out who is currently winning the Earth Grid Wars. However, a truly expert knowledge of the Earth Grid system with a true understanding of Mother Nature's ways could still reverse this bleak picture of geopolitical control through command of Earth Grid locations.

A discussion of the Grid would be incomplete without some commentary on the Earth Grid Shifts. The Earth's magnetic poles do not completely shift (reverse or flip). Only the Earth's Bloch Wall Magnetic Reversal Anomalies move positions in both the northern and southern hemispheres to balance the Earth. The Bloch Wall anomalies were much further north some 10-15,000 years ago, at the time of their last estimated major movement. This Bloch Wall Magnetic Reversal area movement is caused by the Earth's expansions and possible contractions, land mass weight shifts, and changes in the Sun.

The so-called deluge and glacier phenomena are really caused by the massive ocean/sea tides and levitation effects at these times of balancing by the Earth Bloch Wall Anomaly position movements. There were no deity-caused floods or Ice Age glaciers; there were only the Earth Grid Magnetic Reversal Anomaly movements. These movements would have been Earth-shakingly impressive to observe; later they were recalled in myth and religious lore worldwide. Moreover, our knowledge of the Earth Grid mapping system enables us now to plot major geopolitical, meteorological, and geological anomalies and disturbances with reference to possible magnetic-gravity coordinates (See Diagram 14).

Did we really think that a dynamically changing fly-wheel/gyro-like Earth sphere, at about 1000 miles per hour spin rate, didn't need or didn't have a correctional balance system? If it were not for the 20 movable locking points, or what we now call Earth Grid Magnetic Reversal Anomalies, this Earth would tear itself apart (See Diagram 15). Meanwhile all we humans can do with this perfectly elegant design of Mother Nature is to use it as the grounds for yet another stupid war of
Diagram 14

Geopolitical, Meteorological, and Geologic Anomalies Plotted on the Earth Grid

- 'Vile Vertices'—ten areas of violent magnetic and climatic disturbances spread symmetrically round the globe, according to the investigator Ivan T. Sandersen. They include the Bermuda Triangle (page 215) and are said to be places where phenomena are concentrated: 15, 18, 20, 12, 14, 47, 49, 41, 43, 45.

- Valencias—geometrical lines are said to follow the edges of the lithospheric plates, where volcanic activity takes place.

- Magnetic anomalies—said to overlap with the vertices of the polygons.

- Meteorology—centres of cyclones and anti-cyclones at the moons of the grid, giving birth to hurricanes, whose paths then follow the ribs of the grid, so many prevailing winds and water currents.

- Earth faults—the mid-Atlantic underwater ridge lies between 10 and 37.

- Solar radiation—maximum amounts of solar radiation (map page 45) are received at 13, 35, 41.

- Atomic explosions—1,700 million years ago, a spontaneous atomic reaction based on U-235 occurred at 40.

- Mineral ores—mineral deposits are concentrated along lines of grid that coincide with edges of continental plates; oil deposits are found at intersections (e.g., Tynem oil field at 3).

- Space photographs—photographic data collected by US and Russian satellites have recently made the map of the world more accurate, and confirm some of the oddities suggested by the grid: a 'fault-line' from Morocco to Pakistan is marked by the line from 20 to 12; Gemini spacecraft have shown circular geological structures 200–300 kilometres in diameter located at 17, 18, and 20.

- Soil content—lack of certain elements in soil at 3 and 4 has led to a freak evolution of plant life; at 4 (Lake Baikal) three-quarters of plants and animals are unique.

- Bird migration—birds overwinter (page 55) at 13, 20, 41.

- Ancient civilizations—people unconsciously orient their early centres at key intersections: Egyptians (1), Indus Valley (12), Mesopotamia (11), Peru (43), Easter Island (47), northern Mongolia (4).
Note: The numbers on the map are Earth Grid Point reference coordinates; see Diagram 4). U.S. has access or control of the four prime sites (Alice Springs, Easter Island, San Diego, Brookhaven, New York).
conquest and control. The asteroid belt could easily be the result of some other planetary group like our own that held a disastrous Earth Grid war. If we rip the "buttons" off this Lady's blouse, we'll find out instantly why raping the Earth is such a fatally bad idea.

Excentric spiralling: (centrifugence)

Concentric spiralling: (centripetence)
MATHEMATICS OF THE WORLD GRID

By

Bruce L. Cathie
DEFINITIONS OF TERMS

Harmony and harmonic etc. as defined by the Britannica World Standard Dictionary:

1. HARMONY: A state of order, agreement, or completeness in the relations of things, or of parts of a whole to each other.

2. HARMONIC: Producing, characterised by, or pertaining to, harmony,
   (a). Music: Pertaining to a tone whose rate of vibration is an exact multiple of a given primary tone.
   (b). Mathematical: Derived from, or originally suggested by, the numerical relations between the vibrations of the musical harmonies, or overtones, of the same fundamental tone: Harmonic functions.
   (c). Physics: Any component of a periodic quantity, which is an integral multiple of the fundamental frequency.

In this book I discuss the fundamental harmonies of the vibrational frequencies which form the building-blocks of our immediate universe; and those of the theoretical anti-universe which modern scientists have postulated as existing in mirror-like image of our own. I theorise that the whole of physical reality which is tangible to us is formed from the basic geometric harmonies, or harmonics, of the angular velocities, or wave-forms, of light. From these basic harmonies, or resonating wave-forms, myriad other waves are created which blend in sympathetic resonance, one with the other, thus forming the physical structures.

Einstein stated that the geometric structure of space-time determines the physical processes. I theorise that space and time manifest from the geometric harmonies of the wave-motions of light. The fundamental harmonic of light, in free space, in geometric terms being an angular velocity of 144,000 minutes of arc per grid second, there being 97,200 grid seconds to one revolution of the earth.

When physical matter is manifested in the universe the wave-forms of light from which it is formed are slowed down fractionally in order to release the energy required for the formation process. This is demonstrated by the unified harmonic equations in Chapter One. It was found that to calculate the values of harmonic wave-forms that have sympathetic resonance it was possible to disregard zeros to the right, or left, of whole numbers and extract the values direct from the mathematical tables.
My interest in the increasing UFO activity in the New Zealand area led me to the discovery that the surface of the world was crisscrossed with an intricate network of energy grid lines. I began my research in 1965. The information in this chapter regarding the structure and mathematical values built into the system will consist of material condensed from my first three books plus the findings derived from my recent research up to early 1982.

In a general way I was convinced that UFOs were actively engaged in a survey of the earth for some definite reason. I felt that their visits were not haphazard; they were not just on casual sightseeing tours. Quite a number of investigators around the world had come to the conclusion that the sightings were beginning to form a pattern. At this period, however, this pattern was so complex as to defy any definition, or solution. By the correlation of sightings small sections of track had been identified, and some saucers had been seen moving along these set paths. Some of these had hovered over certain spots at set intervals. But these bits and pieces of tracklines were so scattered around the surface of our planet that it was quite impossible to fit them together into any semblance or order.

I was certain that if an overall pattern could be found and plotted, it might be possible to establish the reason behind UFO activity. I considered that the pattern would be geometric if these things were intelligently controlled, and that if somehow I could find the key to one section then I might solve the rest by duplication and inference.

I had sighted a number of unidentified objects in the sky over a period of several years, and by correlating two of these with other data I was eventually able to construct a grid system which covered the whole world.

One of the sightings was in 1956. I was a DC3 co-pilot crewing a flight from Auckland to Paraparaumu. It was about 6pm, conditions were calm, and there was unlimited visibility. We were just south of Waverley at 7000 feet when I saw this object at an extremely high altitude in the east. I drew the captain's attention to it and together we watched it travel in a curved trajectory from east to west across our track until it disappeared in a flash of light at about 10,000 feet in the area of D'Urville Island. It appeared to travel across New Zealand in the vicinity, or slightly to the north, of Cook Strait, and it was so large that two streaks, similar to vapour trails, were seen to extend from either side of its pale green disc.

When about halfway across the Strait a small object detached itself from the parent body and dropped vertically until it disappeared. It looked almost as if the main disc was at such a high temperature that a globule had dripped from it. I thought about this later and decided that if that were so, the small object would also have a curved trajectory in the direction of the parent body. But this was not so; it detached and dropped vertically down at great speed. There could be only one answer for this action; the small body must have been controlled.
Calculations at a later date proved this UFO to have been between 1500—
2000 feet in diameter. A report in a Nelson newspaper on the following day
described an explosion at a high altitude to the north of the city. The shock-
wave broke windows in some local glasshouses.

The other sighting occurred on 12 March 1965. This was the best and most
interesting of them all, and from then my investigations were pressed on with
all speed until they culminated in my present findings.

I had always expected to see UFOs in the sky, and that was where my
attention was usually focussed. When I was flying I was alert and ready to
analyse any object sighted from the aircraft. I never expected to find a saucer
landing at my feet and so far this has never happened. This sighting however,
was different from all the others because I observed it lying under thirty feet of
water.

I was scheduled to carry out a positioning flight from Whenuapai,
Auckland's main airport at the time, to Kaitaia. Departure was at 1 am and
as no passengers were involved and the weather was perfect, I decided to fly
visually to Kaitaia along the west coast. An officer from the operations
department was on board and this was a good opportunity to show him some
of the rugged country to the north. (I must stress that air-traffic regulations
were strictly observed during the flight).

On leaving Whenuapai I climbed to clear the area and when approaching
the southern end of the Kaipara Harbour, just north of Helensville, I dropped
to a lower altitude to have a better look at anything in the flight path. The tide
in the harbour was well out, and the water over the mudflats and estuaries was
quite shallow.

I suppose we were about a third of the way across the harbour when I
spotted what I took to be a stranded grey-white whale. I veered slightly to
port, to fly more directly over the object and to obtain a better look.

I suppose a pilot develops the habit of keeping his emotions to himself. As
far as I can remember I gave no indication of surprise, and I said nothing as I
looked down. My "whale" was definitely a metal fish. I could see it very
clearly, and I quote from the notes I made later.

A. The object was perfectly streamlined and symmetrical in shape.
B. It had no external control surfaces or protrusions.
C. It appeared metallic, and there was a suggestion of a hatch on top,
streamlined in shape. It was not quite halfway along the body as
measured from the nose.
D. It was resting on the bottom of the estuary and headed towards the south,
as suggested from the streamlined shape.
E. The shape was not that of a normal submarine and there was no
superstructure.
F. I estimated the length as 100 feet, with a diameter of 15 feet at the widest
part.
G. The object rested in no more than 30 feet of clear water. The bottom of
the harbour was visible and the craft was sharply defined.
Inquiries made from the navy confirmed that it would not have been possible for a normal submarine to be in this particular position, due to the configuration of the harbour and coastline.

An American scientist checked this spot on the harbour with a depth-sounder in September 1969. He informed me afterwards that a hole had been detected in the harbour bed approximately one eighth of a mile wide and over 100 feet deep, which I consider would indicate some activity had been carried out in this position some five years previously. I published the scientist's report in my second book.

I had a further key to the puzzle in April 1965. My wife saw an advertisement in the local paper seeking members for a UFO organisation called New Zealand Scientific and Space Research. I contacted this organisation and found that a vast amount of information had been very efficiently compiled. Material had been collected from twenty-five different countries over a period of twelve years. I was invited to study the information at leisure.

Amongst this mass of data I discovered the reports of a UFO that had been seen from several different localities in both islands of New Zealand on March 26 1965. People in Napier, New Plymouth, Palmerston North, Wanganui, Feilding and Otaki Forks in the North Island; Nelson Coast Road, Blenheim and Westport (Cape Foulwind) in the South Island, had all reported sightings.

It was decided that I try to plot the track of this UFO. From the considerable amount of information available I found that the maximum variation in the times of sightings from all areas was 15 minutes. Most reports gave the time as 9.45pm. This proved that the object must have been very large and at a high altitude during the greater part of its trajectory.

There was nothing of any great significance or originality in these accounts, and they followed the pattern of many other sightings. However from the mass of detail supplied by so many different people over so wide an area, it was possible to plot the track of the object with reasonable accuracy. I started work on a Mercator's plotting chart, and after several hours of checking one report against the other, and calculating possible elevations and trajectories, I felt I had refined the plot sufficiently to draw in the final track of the object, or objects. The result is shown on map I.

The track began about seventy nautical miles north of New Plymouth, passed just over to the west of Mt Egmont, and finished at D'Urville Island. When first seen the altitude would have been about 30,000 feet curving down on a flight path to somewhere around 10,000 feet when it disappeared.

Some time after those sightings on 26 March 1965 I had another look at the plot I have made. I could find no flaws in my thinking, but I needed more information. As I was to discover many times later, the clues were quite obvious, but I was not then sufficiently expert in realising their significance.

In point of fact this first trackline was to be the starting point of a whole string of discoveries of which I have yet to find an end.

I pored over that plot for a long time before it suddenly occurred to me that the track appeared to be in line with the position where I had sighted the unidentified submarine object, or USO, on 12 March 1965. On extending the
line back I found it was in line with the sightings of 26 March. I was positive there had to be a connection — but to prove it was a different matter.

I checked my report files again and found that on 2 March some fishermen just north of the coast of New Plymouth had seen a large object plunge into the sea and disappear. They thought it was an aircraft and reported the incident to the appropriate authorities, but no aircraft or personnel were missing. I checked this position on the map and found that it also fitted the established trackline. Was this connected with the USO of 12 March, and could the two sightings be of the same object, sighted twice in ten days? Could it be working slowly up this track carrying out some project on the sea bed? I tucked this thought away for future reference and carried on with the search.
It was some days later that I remembered the UFO I had seen in 1956. This object was similar and, most significant of all, both objects had apparently travelled at 90° to each other, and finished in the same grand all-illuminating flash in the area of D'Urville Island.

If these objects were bio-controlled, how could anyone explain such coincidences? No two meteors or other natural phenomena could coincidentally carry out similar manoeuvres, travel at 90° to each other, and both decide to end their existence at the same point in space, within nine years of each other. Also, in both cases, objects had been seen to emerge from the parent bodies. Was this irrefutable evidence that they were intelligently controlled vehicles?

I plotted the track of the 1956 UFO on the map at 90° to the north-south line. I realised that I had no definite proof that they were at exactly 90° to each other or that the 1956 track was not a few miles north or south of this position — still, I had to start from somewhere, and I would assume this to be correct unless and until other evidence proved me wrong.

Two track lines at 90° meant little on their own. If I found several at 90°, I might have something — a grid perhaps? These two lines hinted at this, and I believed that if I could solve the system of measurement, then I had two ready made baselines to work from.

Once again I went to the UFO files and found that a Frenchman by the name of Aime Michel had been studying UFOs for a number of years and had found small sections of tracklines in various areas of Europe. Saucers had been seen hovering at various points along these tracklines, and Mr Michel had observed that the average distance between these points was 54.43 kilometres. By itself this was only a small grain of information but, like a starting gun, it set me off again.

Using the Kaipara Harbour as a starting point, I marked off the 54.43 kilometre intervals along the trackline I had found. I was disappointed when I was unsuccessful in obtaining an even distribution of positions to the D'Urville Island disappearing point. I checked and re-checked, but nothing worked out. I slept on the problem, and at some time during the night inspiration turned up the wick; once more the light grew bright.

I remembered that a great number of sightings had occurred around the Blenheim area. Even before the advent of ordinary aircraft in New Zealand, this area had been visited by UFOs. I had read about them in old copies of the local papers, and many recent sightings suggested again that this area had something special about it.

So I dragged out my map and extended the trackline until it cut a 90° coordinate from the town of Blenheim. The distance from this point to the Kaipara position I found to be exactly 300 nautical miles, and one nautical mile is equal to one minute of arc on the earth's surface. Could it be that the rough interval of 54.43 kilometres discovered by Michel was, in fact, an interval of 30 nautical miles when corrected? If so then this interval could be evenly spaced along my trackline ten times. Was this the system of measurement used by the UFOs? There was no proof, of course, but it seemed a reasonable assumption. A minute of arc is a measurement which could be applied to the whole universe.
University personnel and others in the academic field attacked me repeatedly over this issue. They maintained that degrees and minutes of arc were arbitrary values set up by the ancient mathematicians and that therefore my calculations were meaningless. I finally found proof of my argument in the works of Pythagoras. As my research progressed I discovered that the harmonic of the speed of light in free space had a value of 144. If this was divided by 2, to find the harmonic of one half cycle, or half-wave, the answer was 72. If this value was then applied to the Pythagoras right-angled 3, 4, 5 triangle and each side was extended in this ratio then the figure had sides of 216, 288 and 360 units. The harmonic proportions thus derived were equal to:

\[
\begin{align*}
216 &= 2\times108 = \text{the number of minutes of arc in a circle.} \\
360 &= 360 = \text{the number of degrees in a circle.} \\
288 &= (144 \times 2) = 2C, \text{ where } C = \text{the speed of light harmonic.}
\end{align*}
\]

It appeared from this that the harmonic of light had a very definite relationship with the geometry of a circle, and that the early mathematicians were fully aware of the fact. This will become clearer as you read through this book.

The fifth interval of 30 nautical miles from the Kaipara position coincided with the position off the coast of New Plymouth where the mysterious object had plunged into the sea. The plotted points of disappearance of the two large UFOs at D'Urville Island did not quite match up with the ninth interval, but this did not worry me unduly as I expected that a small percentage of error must be expected in my original plot. I readjusted this position to the ninth interval, and carried on the search to see how many other sightings I could fit into this pattern.

The results exceeded my expectations. I found that by using units of 30 minutes of arc latitude north-south, and 30 minutes of arc longitude east-west, on my Mercator's map, a grid pattern was formed into which a great number of UFO reports could be fitted. I eventually had a map with sixteen stationary and seventeen moving UFOs plotted on grid intersections and tracklines.

Having satisfied myself that my reasoning and plotting were not false, I considered that I had good proof that New Zealand, possibly other countries, and probably the whole world, were being systematically covered by some type of grid system.

In my first book I demonstrated that the main grid pattern consisted of grid lines spaced at intervals of 30 minutes of arc (latitude and longitude). In my second book I probably confused the issue a bit as I stated that the east-west grid lines were spaced at 24 minutes of arc. This was due to the spacing being measured in nautical miles, or values in minutes of latitude. The actual length of a minute of longitude varies mathematically from one nautical mile at the equator, to zero at the north and south poles.

The value of 30 minutes of arc in terms of longitude in the New Zealand area happened to be an average of 24 nautical miles, which can be confusing those readers who are not familiar with map scales.
Reference to the grid structure will therefore be stated from now on in minute of arc values only, for latitude and longitude, to minimise confusion.

I subsequently discovered that the grid lattice could be further divided. It is now evident that the grid lines in the main system are spaced at intervals of 7.5 minutes of arc north-south, and east-west. The importance of this will prove itself when compared with the rest of the calculations in this book. There are 21,600 minutes of arc in a circle, and when this is divided by 7.5 we get a value of 2880. The grid lattice therefore is tuned harmonically to twice the speed of light (288), as will be shown in other sections.

It appeared that I had found a section of geometric grid pattern in the New Zealand area. I now had to form some theory of construction for the whole world. I could then possibly fit the New Zealand section into it.

By drawing a series of patterns on a small plastic ball I finally found a system which could be used as a starting point for a global investigation. (The basic pattern is shown in diagram 1).

I was sure I was on the right track, but now I had to super-impose this pattern on the world globe. It was essential that I find a point position somewhere on the earth upon which to orientate the geometrical pattern. I finally came up with an item of news that gave me a very important clue on how to proceed.

On 29 August 1964 the American survey ship *Eltanin* was carrying out a sweep of the sea-bed off the coast of South America. A series of submarine photographs was being taken of the area by means of a camera attached to a long cable. A surprise was in store when these photographs were developed. On one of the points, in marvellous detail, was an aerial-type object sticking up from an otherwise featureless sea-bed.

This object appeared to be metallic and perfectly symmetrical in construction. The array consisted of six main crossbars with small knob-like ends and a small crossbar at the top. Each cross looked to be set at angles of 15° to the others, and the whole system stood about 2 feet in height. The position where this object was found was given as latitude 59°08’ south, longitude 105° west.

As this bit of ironmongery was situated at a depth of 13,500 feet below the surface, I was certain that no human engineers had placed it there.

Scientists may be able to descend to those depths in specially constructed bathyspheres, but I don’t think they could work as deeply as that on a precision engineering problem. In view of my earlier sightings in the Kaipara Harbour, I was willing to accept that the aerial-type object had been placed there by an un-identified submarine object, or USO.

Since this photo was taken there has been a determined attempt by the scientific world to label this object as nothing more than a plant of some sort. A journalist friend and I managed to visit the *Eltanin* during one of its few visits to New Zealand and when we discussed this object with some of the scientists on board, the comment was that it was classed as an artefact. This was before the great hush-up but, regardless of that, I believe that the mathematical proofs will show without doubt that the object is artificial, and most probably an aerial of some sort.
An "OOPART". Photographed on the sea-bed at a depth of 2,500 fathoms, 1,000 miles west of Cape Horn, by US survey ship *Hacious*, whose officers are close-lipped about it. "It's a marine organism," maintained an *Hacious* officer in Auckland in 1968. Pressed further, he admitted: "But it still looks like an artifact to me!"
DIAGRAM 1

Showing relationship of grid structure to the geographic poles. Each of the two grids has a similar pattern, the interaction of which sets up a third resultant grid. The poles of the three grids are positioned at three different latitudes and longitudes.

C, D, E, F = Corner aerial positions of grid polar square. Similar to aerial discovered by the survey ship *Elgin*.

J - K = Polar axis.

A = Geographic pole
B = Grid pole

Distance C - G - D = 3600 minutes of arc.
Distance C - H - D = 3418.6069 minutes of arc.
Distance C - I - D = 3643.2 minutes of arc

\[
\begin{align*}
(3600 - 3418.6069) & = 181.39308 \\
(181.39308 \times 4) & = 725.57233 \\
\sqrt{725.57233} & = 26.93045 = 26\text{.}93045\text{ harmonic.}
\end{align*}
\]
DIAGRAM 2

Showing the relationship of a grid polar square to the geographic pole. Each grid has a similar pattern. The pole of each grid is set at a different latitude and longitude.

A = Geographic pole
B = Grid pole

C
D
E
F

B—C = 2545.584412 minutes of arc
B—D = 2545.584412 minutes of arc

A—B Grid "A" = 1054.4 minutes of arc
A—B Grid "B" = 994.4 minutes of arc
A—B Grid "C" = 864 minutes of arc (residual grid)

DIAGRAM 3

Showing the relationship of grid polar squares A, B, and C. The polar squares are oriented in reciprocal positions around both the north and south geographic poles.

A: Grid pole "A": 1054.4 minutes of arc from geographic pole
B: Grid pole "B": 994.4 minutes of arc from geographic pole
C: Grid pole "C": 864 minutes of arc from geographic pole

D: North geographic pole
E, F, G, H, Polar square "A"
I, J, K, L: Polar square "C"
M, N, O, P, Polar square "B"

Q: Longitude 105 degrees west
R: Longitude 97.5 degrees west
S: Longitude 90 degrees west
The form of this aerial-like structure also fitted in with the general pattern of the grid as I had envisaged it on the plastic ball. The six main crossbars denoted the radiating points of six or twelve great circles which form the main structure of the grid.

I centred the grid on the position of the object found by the \textit{Elmam}, and the 180° reciprocal of this in Russian Siberia, lining the whole thing up with the section I had found in New Zealand. I found the system to be lined up very closely with the magnetic field of the earth. The equator of the grid followed very closely the line of zero dip around the world. (That is, the positions on the earth's surface where a magnetic compass needle has only a horizontal and no vertical component).

In my first two books I discussed the methods I used to line up the system and calculate the first estimates of the grid pole positions, and the major focal points of the grid similar to the \textit{Elmam}"aerial" placement.

The reciprocal position of the \textit{Elmam} "aerial" is at latitude 59° 08' north, longitude 75° east, in Siberia. I calculated the length of the diagonal of what I call, for simplicity, the "polar grid square" and found it to be 5091.168825 minutes of arc long. I plotted a track from the Siberian position through the north geographic pole and measured off this distance to locate another corner "aerial" of the polar square. (Square is not technically the right word to use as the four sides are formed by sections of small circles which are in different planes to each other. When the "polar square" areas are transferred from the surface of the earth sphere on to a flat plane such as a map, then a perfect square is formed with sides 3600 minutes long and diagonals of 5091.168825 minutes of arc).

In my first two books I stated, in error, that the sides of the "polar squares" were formed by sections of GREAT circles 3600 minutes of arc long, instead of SMALL circles. The great circle distance between these points is in fact 3418.606915 minutes of arc, which is very confusing to any investigator attempting to reconstruct the grid. I apologise to my readers for this error, which was caused by my lack of access to calculators during my earlier research. In the grid pattern there are actually two small-circle segments, and one great circle segment connecting each of these points which form the polar squares. Each of the segments has a different path over the earth and some trickly calculating is necessary to ascertain the true length. Although I used the wrong term in my earlier publications, the actual calculations derived from the grid system are not altered in any way, and still stand the test of time. Over the last few years I have slightly refined the values I demonstrated previously, derived from a mixture of practical and theoretical studies. I have now set up what I see as a completely theoretical system, discovered by working entirely by calculator. Time will prove how close my calculations are. I have no doubt that 1, and others, will continue further to perfect the system as more facts come to light.

Once I had established this first base line I found it quite easy to construct the main skeleton of the grid over the whole surface of the earth.

As my work progressed I found that there were in fact two similar grids, interlocked with each other. The poles of the grids were spaced at different distances from the north geographic pole, and this arrangement set up a series of geometric harmonics which were directly related to the speed of light, mass, and gravity. The interaction of the two grids created a harmonic resonance which, in turn, formed a third resultant grid.

After ten years of work and correlating information I have now calculated.
theoretical positions for the three grid poles in the northern hemisphere which are very close to my original estimate. Reciprocal positions will give similar values for the southern hemisphere.

Grid pole (A) = Latitude 72.4266°/longitude 90° west 1054.4 minutes of arc from the north pole.

Grid pole (B) = Latitude 78.4266°/longitude 105° west 694.4 minutes of arc from the North Pole.

Resultant grid pole (C) = Latitude 75.6°/longitude 97.5° west 864 minutes of arc from the North Pole.

The diagonal of the "polar square" of 5091.168825 units can be broken down into a series of values:

\[
\begin{align*}
5091.168824 / 2 & = 2545.584412 \\
2545.584412 / 7.5 & = 3.39411255 \\
3.39411255^2 & = 11.52 \\
11.52 / 8 & = 1.44 \text{ (speed of light harmonic)} \\
2545.584412^2 & = 6480000 \\
\text{Reciprocal of } 2545.584412 & = .03928371
\end{align*}
\]

The harmonic value of 3928371 is of extreme importance as it has a direct relationship with the earth's magnetic field. The harmonic 648 was also shown, in my earlier books, to have many interesting associations. In particular the harmonic table for temperature.

The many other harmonic factors, centred around the "polar square" corner "aerial" positions, form a series of complex mathematical associations, and this can be left for those who wish to carry out their own research. If I can show how to construct the main "bones" of the grid my part of the job will be complete. I have found it impossible, so far, to plot the fine grid structure of lines 7.5 minutes apart, over the whole world, because of the complexity of such an exercise. (A full computer programme would be necessary and I do not have the finance required for such an undertaking).

So far I have confined myself to the New Zealand area, with the small section of finely-spaced grid lines that I originally discovered. Over the years I have been able to plot into this map a great many interesting facts which indicate activity by various scientific groups. This has helped me to gradually build up my own knowledge of the system.

My nosiness has not gone unnoticed — as evidenced by the constant probing of interested parties endeavouring to find out the extent of my discoveries. I hope that in the near future the international combines involved in this advanced research will make known to the public the vast amount of scientific knowledge they have acquired. Possibly this will only happen if and when a world government has been set up to control the scientific wonders.
which are now within our reach. Enough is known already to make most of our energy and transport systems obsolete — which may explain why the facts are being suppressed?

I have been able to check activity in other parts of the world by applying harmonic calculation to certain positions of latitude and longitude. It is not necessary to use the grid structure, and such, for some types of calculation once the harmonic process is understood. Eventually, when the whole grid has been plotted, the work will be much easier.

In my second book I stated that the first glimmerings of how true space travel might be achieved came to me when I uncovered the clues that led me to the UFO grid which laces about our globe.

I was aware that my calculations were not precisely accurate — in the strict mathematical sense — but I could see that the system was based on space-time geometries, and at least there was the best possible support for this: none less than the theories of Einstein.

Somewhere, I knew, the system contained a clue to the truth of the unified field which, he had postulated, permeates all of existence. I didn't know at the time that this clue had already been found by scientists who were well ahead of me. I know now that they must have understood something of the grid system years ago. They knew that Einstein's ideas about the unified field were correct. What's more, for many years they had been carrying out full-scale research into the practical applications of the mathematical concepts contained in that theory.

We were told that Einstein died without completing his equations relating to the unified theory. But in more recent times it has been said that he did in fact complete his work but that the concepts were so advanced that the full truth was not released.

The only way to traverse the vast distances of space is to possess the means of manipulating, or altering, the very structure of space itself; altering the space-time geometric matrix, which to us provides the illusion of form and distance. The method of achieving this lies in the alteration of frequencies controlling the matter-antimatter cycles which govern our awareness, or perception, of position in the space-time structure. Time itself is a geometric, just as Einstein postulated; if time can be altered, then the whole universe is waiting for us to come and explore its nook and crannies.

In the blink of an eye we could cross colossal distances; for distance is an illusion. The only thing that keeps places apart in space is time. If it were possible to move from one position to another in space, in an infinitely small amount of time, or "zero time", then both the positions would coexist, according to our awareness. By speeding up the geometric of time we will be able to bring distant places within close proximity. This is the secret of the UFOs - they travel by means of altering the spatial dimensions a round them and repositioning in space-time.

I decided to concentrate specifically on three harmonic values which appeared to have a close relationship with each other. Previously I had shown this connection and had truthfully pointed out that I did not know why the relationship was there at all.
The harmonic values which occupied my full attention:
1703 - This was the four-figure harmonic of 170,300,000,000, which is the expression in cubic minutes of arc of the mass, or volume, of the planet earth, and its surrounding atmosphere.
1439 — A four-figure harmonic of 143,900 minutes of arc per grid second, representing the speed of light in grid values.
2640 — This figure expressed in minute of arc values is built into the polar portion of the grid structure, as a geometric coordinate.
I found that when I matched these values harmonically the results were as follows. Zeros to the right-hand side can be ignored in this form of harmonic calculation:

\[
\begin{array}{c}
1703 \\
-264 \\
1439 \\
\end{array}
\]

In other words the difference between the harmonic of mass and the harmonic of light was the harmonic of 264 (or 2640).
It was apparent that if my calculations were more accurately worked out it should be possible to find out just what the 2640 figure referred to.
After more calculation the following terms were found:

17025 Earth mass harmonic
-2636 Unknown harmonic
14389 Speed of light harmonic

Checking through some five-figure mathematical tables, I found to my surprise that 2.6363 is the square root of 6.95 (from the 1-10 square root tables). In harmonic calculation decimal points as well as zeros to the right or left of a figure can be ignored; so it could be said that the square root of 695 was 2636. I could perceive from this the first steps necessary to solve the elusive equation. I had established that 695 was the harmonic reciprocal of the speed of light, or 1/1439 subject to the accuracy of my calculations at the time.
It was now possible to substitute algebraic values - although obviously a computer would be necessary to solve the true values to extreme accuracy.

17025 (earth mass)
-2636 square root of speed of light reciprocal
14389 (speed of light)

If \( C = \text{The speed of light, and} \)
\( M = \text{Mass} \)

Then \( M = C + \sqrt{1/C} \)
I had the first part of a unified field equation in harmonic values. To take the next step I first had to go back to Einsteinian theory, particularly the famous equation $E = MC^2$, where $E$ is energy, $M$ is mass and $C$ the speed of light.

Einstein declared that physical matter was nothing more than a concentrated field of force. What we term a physical substance is in reality an intangible concentration of wave-forms. Different combinations of structural patterns of waves unite to form the myriad chemicals and elements which in turn react with one another to form physical substances. Different wave-forms of matter appear to us to be solid because we are constituted of similar wave-forms which resonate within a clearly defined range of frequencies — and which control the physical processes of our limited world.

Einstein believed that $M$, the value for mass in the equation, could eventually be removed and a value substituted that would express the physical in the form of pure energy. In other words, by substituting for $M$ a unified field equation should result which would express in mathematical terms the whole of existence — including this universe and everything within it.

Einstein maintained that the $M$ in his equation could be replaced by a term denoting wave-form. I had found a substitute for $M$ in terms of wave-forms of light. So the obvious step, to me, was to replace Einstein's $M$ with the values of $C$ found from the grid system. The results are as follows:

\[
\begin{align*}
\text{Einstein} & \quad E = MC^2 \\
\text{Cathie grid} & \quad M = C + \sqrt{i}/C \\
\text{Therefore} & \quad E = (C + \sqrt{i}/C) C^2 \quad (\text{Harmonic equation I})
\end{align*}
\]

I now had a harmonic unified field equation expressed in terms of light — or pure electromagnetic wave form — the key to the universe, the whole of existence: to the seen and the unseen, to forms, solids, liquids and gases, the stars and the blackness of space itself, all consisting of visible and invisible waves of light. All of creation is light.

It was now necessary to refine my calculations and attempt to discover a way to practically apply this initial equation.

The equation is that from which an atomic bomb is developed, by setting up derivatives of the equation in geometric form, the relative motions of the wave-forms inherent in matter are zeroed, and convert from material substance back into pure energy.

This explained the workings of a nuclear explosive device, but it still did not yield the secret of space-time propulsion. The grid system which I discovered by the study of the movement of unidentified flying objects was harmonically tuned to this basic equation, yet a UFO does not disintegrate when it moves within the resonating fields of the network.

There had to be an extension of the equation which so far I had missed that would produce the necessary harmonics for movement in space-time.
In the polar areas of the grid the geometric values of some of the coordinates appeared to be doubled up. The coordinate of 2545584412 was doubled in the diagonals of the polar squares, with all of its associated harmonics and other factors appeared to be doubled when the pattern was projected onto a flat plain.

I reasoned that a way to check this idea was to increase the values of C in the equation, and observe the changing harmonic of E to see what relative values might emerge. I thought at the time that a direct antigravitational harmonic might become evident, but my recent research has proved this line of thought to be incorrect. In terms of mathematical values I found what I was hunting for in the form of two more equations. In the case of one of the equations I erroneously believed that the derived harmonic value related to the reciprocal of gravity. I know now that what I had hold of was an equation related to the magnetic field of the earth.

The earth being simply a huge magnet, a dynamo, wound with magnetic lines of force as it coils, telescopically counted to be 1257 TO THE SQUARE CENTIMETRE IN ONE DIRECTION AND 1850 TO THE SQUARE CENTIMETRE IN THE OTHER DIRECTION (EDDY CURRENTS), indicates that natural law has placed these lines as close together as the hairs on one's head.

The spectroscope shows that there is an enormous magnetic field around the sun, and it is the present conclusion of the best minds that magnetic lines of force from the sun envelop this earth and extend to the moon, and THAT EVERYTHING, NO MATTER WHAT ITS FORM ON THIS PLANET, EXISTS BY REASON OF MAGNETIC LINES OF FORCE. This I agree with, according to my own research. We are taught in our schools and universities that the magnetic field passes through one magnetic pole, then through the body, and out the other magnetic pole. I disagree with this explanation. I believe that the magnetic lines of force enter the body at the poles, then carry out a looped path through the body before passing out the opposite poles. The flow is not in one pole and out the other, but in both poles, and out both poles, although the field intensity both ways is unbalanced.

If we can visualise one line of force so that we can trace out its path we can form an analogy by imagining it to be similar to a piece of string. First of all we make a loop in the piece of string. Now imagine it being fed through a fixed position with the loop remaining stationary relative to a fixed point. With the length of string as the axis we can now make the loop revolve in a path which is at 90° to the movement of the string. The loop in fact would trace out a spherical-shaped form in space.

The lines of force of the magnetic field would form a lattice, or grid pattern, due to the spin of the planetary body. A good analogy would be an ordinary machine-wound ball of string. The length of string has taken on the form of a ball, and at the same time has formed a crisscross pattern. If we again visualise this as a physical body being formed in space then we can now imagine a small vortex being created at all the trillions of points where the lines of force cross each other in the lattice pattern. Each vortex would manifest as an atomic structure and create within itself what we term a gravitational field. The
gravitational field in other words is nothing more than the effect of relative motion in space. Matter is drawn towards a gravitational field, just as a piece of wood floating on water is drawn towards a whirlpool. The gravitational fields created by the vortexual action of every atom would combine to form the field of the completed planetary body.

The world grid that I speak of is the natural grid that is formed by the lattice pattern of the interlocking lines of force.

The unbalanced field of 1257 lines of force per square centimetre in one direction and 1850 in other does not tell us very much in itself. But if we use the information to calculate the field strength over an area which has a harmonic relationship with the unified fields of space, and if the basic information is correct, we should find some mathematical values of great importance.

At the time of writing my last book I was not aware of the extreme importance of the values at that stage of accuracy. I was close enough to see how they fitted into the equations, but a further fine tuning was necessary to reveal the knowledge locked within these two simple numbers.

The basic unit for harmonic calculation is the geodetic inch, or one seventy-two thousandth of a minute of arc; one minute of arc being 6000 geodetic feet. If we take the values 1257 and 1850 lines of force per square centimetre and calculate the field strengths for one square geodetic inch, the field density is 8326.71764 and 12255.08864 lines of force respectively. The fields being in opposition to each other. The combined field density is equal to 20581.80628.

Allowing for very slight variations in the conversion factors the difference in field strengths (12255.08864 minus 8326.71764) is equal to 3928.371. We could say that the resultant field density one way is equivalent to field 'A' minus field 'B', or 3928.371 lines of force. This value I found to be the harmonic reciprocal of the grid coordinate 2545.584412.

The combined field strength of 20581.80628 lines of force can be harmonically associated with several other interesting facts, to be demonstrated in other sections of this book.

We can now formulate another equation in order to demonstrate the association of the earth's magnetic field with the speed of light.

Harmonic equation 2

Field \((A - B) = (2C + \sqrt{1/2C}) (2C)^2 = 3928.371 \) harmonic

Where \(C = 144000 - 90.9345139 = 143909.0655\)

The reduction in light speed of 90.9345139 minutes of arc per grid/sec. creates a very interesting factor, because:

\[
\begin{align*}
90.9345139 &= \frac{3928371}{432}
\end{align*}
\]
The reduction in light speed is therefore equal, in harmonic terms, to the resultant field strength divided by the radius of spherical mass. In this case the radius being the distance, in minutes of arc, from the earth's centre to the average height of the atmosphere. (432 being a harmonic of 4320 minutes of arc).

In my last book, "The Pulse of the Universe", I had shown this reduction to be equal to three times the gravity acceleration harmonic as the values matched very closely within the accuracy of my work at that time. The relationship with gravity is still there but not so directly obvious.

We can now formulate a third equation by inserting the value for the speed of light at the earth's surface. By mathematical conversion this was found to be 143795.77 minutes of arc per grid second, where one grid second was 1/97200 part of the time taken for one revolution of the earth.

\[
2693645 = \sqrt{2C - \sqrt{\frac{1}{2C}} \cdot (2C)^2}
\]

Where \( C = 144000 - 204.23 = 143795.77 \)

In my third book I had again used the gravity factor as the basis for the reduction, making the value equal to 6G. I feel that this new approach based on extended knowledge is the more correct one, although, as above, the gravity factor is not so obvious. I believe that there is yet another factor in the light reduction process to be found but this will require further research.

The research will be extended until all the answers are in but the results appear to back up my belief that as the harmonic of light is fractionally decreased, the energy which is released is converted to form physical matter.

From this we can get a glimmering of how an unidentified flying object is able to create a series of resonating frequencies which alter the physical properties within and around it, thus causing a change in the space time frames of reference in relation to the earth or other planetary body.

As I have stated in my previous publications, natural law is not erratic. The universe does not rely on chance to manifest within itself the physical substances which we perceive and call reality. A very strict ordered system of mathematical progressions is necessary to create the smallest speck of matter from the primeval matrix of space.

During my years of research into the complexities of the earth grid system I have gradually built up a picture in my mind of the possible geometric combinations necessary to form matter from resonating, interlocking wave-forms.

Matter and anti-matter are formed by the same wave motions in space. The waves travel through space in a spiralling motion, and alternately pass
through positive and negative stages. Matter is formed through the positive stage, or pulse, and anti-matter through the negative pulse.

Each spiral of 360° forms a single pulse. The circular motion of an electron about the nucleus of an atom is therefore an illusion. The relative motion of the nucleus and electrons through space gives the illusion of circular motion. The period during the formation of anti-matter is completely undetectable, since obviously all physical matter is manifesting at the same pulse rate, including any instruments or detectors used to probe atomic structures.

The period or frequency rate between each pulse of physical matter creates the measurement which we call time, as well as the speed of light, at the particular position in space of which we are aware, at any given moment.

If the frequency rate of positive and negative pulses is either increased or decreased, then time and the speed of light vary in direct proportion.

This concept would explain time as a geometric, as Einstein theorised it to be.

A rough analogy of physical existence can be made by reference to a strip of motion picture film. Each frame or static picture on the film strip may be likened to a single pulse of physical existence. The division between one frame and the next represents a pulse of anti-matter. When viewed as a complete strip, each frame would be seen as a static picture — say one at either end of the strip — then the past and the future can be viewed simultaneously. However, when the film is fed through a projector, we obtain the illusion of motion and the passage of time. The divisions between the static pictures are not detected by our senses because of the frequency, or speed, of each projection on the movie screen. But by speeding up or slowing down the projector, we can alter the apparent time rate of the actions shown by the film.

To continue this analogy: our consciousness is the projector. The conscious part of our individuality passes from one pulse of physical matter to the next within the framework of the physical structure which we term our body, thus giving the illusion of constant reality, and the passing of time.

It is logical to assume that we have a twin stream of consciousness on the anti-matter side of the cycle, which in fact creates a mirror-image of our own individual personality. (This postulate has already been put forward by scientists). The frequency of manifestation of both streams of consciousness, that is, the plus and the minus 'I am', would position our awareness of the illusion of reality at a particular point in space and time. In other words, if the frequency of pulse manifestation is altered, even fractionally, our awareness of reality, in the physical sense, will shift from one spatial point to another. In fact, we would travel from one point in space to another without being aware that we had traversed distance in the physical sense. This would be space travel in the truest sense.

Let's look at another analogy: we can consider a simple spiral spring as representing the wave motion of an electron through space. Every second 360° spiral of the spring represents the path of the electron in physical matter, while the opposite applies to anti-matter.

The theory outlined above explains why light has been described as being caused by both a wave motion and a pulse. Both explanations are correct.
A pulse of light is manifested when the energy level of the atomic structure is altered by outside influences (theory of Max Planck). In the physical plane, the electron of the atomic structure appears to jump from its orbit. According to my belief, the electron does not jump orbit. But this is the illusion we obtain, since we are not equipped to perceive the path of the electron during the anti-matter cycle. What actually happens is that the radius of the spiralling motion is increased or decreased in order to absorb or release the energy imparted to, or removed from, the atomic structure. If the energy is imparted, then the electron must extend orbit in order to maintain balance in the system; and vice versa. Light, or any other radiant energy above or below light frequency, is therefore manifested by undetectable changes in the radius of the spiral motion of the electron during the anti-matter cycle.

If this hypothesis is correct, movement from one point in space to another point, regardless of apparent distance — in other words, true space travel — is completely feasible. By manipulating the frequency rate of the matter-anti-matter cycle, the time and speed of light can be varied in direct proportion to any desired value.

All the mathematical evidence amassed so far indicates that the maximum number of individual elements to be found in the universe will be 144. Each of these elements will have, in theory, six isotopes, which will make up a completed table of separate substances numbering 1008. An isotope is an atom of the same element which has a different nuclear mass and atomic weight.

Mathematically, the progression would create 144 octaves of separate substances giving a theoretical value of 1152. The difference between the total number of substances (1008) and the harmonic value in octaves (1152) would be 144, the light harmonic.

Once the precipitation of physical matter has occurred, the buildup of substances takes place according to a very well ordered mathematical sequence. Light-waves, guided seemingly by superior intelligence, form intricate interlocking grid patterns which graduate from the simple to the more complex, as the elements from hydrogen at the lower end of the scale, to element 144, come into being.

When we think of reality we must think of mass in relation to any physical manifestation, and the smallest particle of physical matter that we are aware of is the electron. Therefore electron mass must be the starting point in our quest for a feasible theory to explain the structure of matter.

The average radius of action of the electron around the atomic nucleus must also have a constant harmonic value in order to set up a system of expanding spheres which encompass the structure of each element. As the number of protons in the nucleus increases with the buildup of each element, the spherical space which houses the electron shell must expand to accommodate an equal number of electrons. Although the protons and electrons are nothing more than extremely concentrated wave-forms, we consider them as physical particles in order to build up a picture of our model. As each electron cloud, or shell, expands outward from the nucleus, we find that it can accommodate only eight electrons. The shell is then filled up and
another expansion must take place in order to form a new shell or harmonic-zone, which again builds up to a maximum of eight electrons. As the magnitude of the harmonic resonance intensifies, heavier and heavier elements are produced until we reach a maximum of 144 elements. The light harmonic is then equal and the cycle has been completed. The whole series is a repetition of octaves of wave-forms forming more and more complex structures.

In my earlier work I had assumed that the harmonic radius of the atom was equal to the mass ratio of the proton and electron. I now realize that although I was on the right track, the theoretical mode demonstrated was partly in error. This necessitated another search into the physics books and I now feel that the following calculations based on the experimental values are getting close to the truth.

It would be logical to base the harmonic interaction on the geometric structure of the hydrogen atom. If harmonic equivalents can be derived from the basic values established by experimental physics, and remain within the laid down tolerances, then almost certainly a new theory should be evident. Especially if the harmonic values closely match those found in the unified equations previously demonstrated.

The distance given between the electron and the proton in the hydrogen atom is approximately $5.3 \times 10^{-11}$ metre. (Physics Part 2, Halliday& Resnick) I have discovered that a value of:

$$5.297493 \times 10^{-11}$$ metre fits in very neatly with the previously established harmonic terms. If we convert this value into its geometric equivalent, then:

$$5.297493 \times 10^{-11} \text{ metre}$$

$$= 17.15150523 \times 10^{-11} \text{ geodetic feet}$$

$$= 205.8180628 \times 10^{-11} \text{ geodetic inches}$$

The radius of the hydrogen atom is therefore very obviously tuned to the harmonic value of 20581.80628, which is the number of magnetic lines of force per square geodetic inch. The diameter of the hydrogen atom would be, 411.6361256.

If we calculate the circumference of the atom in terms of harmonic geodetic feet then:

$$17.15150523 \times 10^{-11} \text{ geodetic feet radius}$$

$$= 34.30301 \text{ harmonic diameter}$$

$$= 107.7660 \text{ harmonic circumference}.$$  

Now if we allow spacing on this circumference for eight electron positions we have:

$$107.7660 \text{ divided by 8}$$

$$= 13.47 \text{ units}$$

But an electron has only half a spin value; the other half taking place during the anti-matter cycle, so:

$$13.47 \times 2 \text{ to allow for the double cycle},$$

$$= 26.94$$

Allowing for the accuracy of the conversion factors etc. would make the harmonic geometries of the hydrogen atom comply fairly closely with the geometric energy value derived from the unified equation (2693645). A
computer program set up for curved geometry should, in theory, show a perfect match.

We can now use the hydrogen atom as a base line to form a theory regarding the formation of the complete atomic table of elements. I believe that the harmonic radius of 205.8180628 units would remain constant throughout the whole range of elements. The orbits of electrons in all substances taking up harmonically spaced positions to the power often. In other words by shifting the decimal point to the right or left of this basic harmonic, the orbital radius of all electrons can be calculated. (See diagram 5).

This would apply to the whole range of 144 elements and their isotopes. Physical reality, as we perceive it, being manifested by the concentrated interlocking of harmonic wave-forms, which are built up progressively from a foundation of fundamental wave-packets.

The square of the diameter of the hydrogen atom (4116361257) is equal to the harmonic of mass at the centre of a light field, 1694443. This value also shows up in the cycle of element formation due to the introduction of neutrons into the atomic nucleus. It is stated in the physics books that the maximum number of neutrons that can be contained in the atomic nucleus is 1.6 times the number of protons. The theory of harmonic formation agrees with this. If the ratio of protons and neutrons in the basic element is taken as 1:1 then as each isotope is built up due to the introduction of neutrons we have the mathematical progression of 1:1, 1:1.1, 1:1.2, 1:1.3, 1:1.4, 1:1.5, 1:1.6, for the element and the six isotopes; then as the harmonic increases to 1:1.694443, and above, towards 1:1.7, we get the formation of the next higher element. The cycle would then repeat itself.

The rest mass of the proton is given as $1.67252 \times 10^{-27}$ Kg, and a mass ratio of 1836 is laid down for the proton and electron. I believe that the harmonic values approach those found in the unified equations when the atomic structure is accelerated towards the speed of light. According to Einstein the mass increases, and I believe the mass of the proton increases towards the 1694443 harmonic. If the energy level is built up above this point a condition would be reached where a change in physical state would occur. That is, the harmonic would be approaching 1.7 to 1.7018, the surface mass harmonic for an atomic structure, and a change would be triggered.

A gravitational connection with mass becomes evident when the normal gravitational acceleration is converted into grid equivalents. The physics books state that gravity acceleration varies according to latitude on the earth's surface, and also with altitude, or distance from the centre of the earth. The variation at sea level from 0° to 90° latitude is equal to 32.087829 feet/sec² to 32.257711 feet/sec².

I decided to calculate the grid gravity acceleration at latitude 52.8756° which is 37.1244° from the geometric pole. The reciprocal harmonic of this position (371244) is equal to 2693645. The interpolated standard gravity acceleration at this latitude is 32.194417 feet/sec².

The grid time factor I discovered has stood up to scrutiny over the years and is based on 27 periods for one revolution of the earth. Normally we use 24
periods of one hour each. The 27 periods, I call 27 grid hours. A grid hour is slightly shorter than a normal hour, and is divided into sixty grid minutes, each of which is equal to sixty grid seconds.

Therefore for one revolution of the earth we have a standard time of 86,400 seconds as against a grid time of 97,200 grid seconds. The ratio is 8:9.

So: 32.194417 x 6000 x 8 = 28.2407167

\[ \frac{6080}{9} \]

If this acceleration factor is multiplied by 6 then:

\[ 28.2407167 \times 6 = 169.4443 \]

1694443 harmonic = \((C + \sqrt{1/C})\) Where \(C = 143000\) minutes of arc per grid/sec.

So harmonically, gravity acceleration is equal to:

\[ \frac{C}{6} \]

At the centre of a light field, forming spherical mass.

As my own research has shown me that physical reality is manifested by the harmonic nature of light, it appears logical that a vehicle constructed to the principles of harmonics will be required to set up the space-time fields necessary. If this is so, then the first criterion will be that the vehicle must resonate in perfect harmony with the complete table of elements in our physical universe. If it does not, then it would be more than probable that any element or particle of matter not in harmonic resonance within the vehicle structure, or payload, would be left behind when the space-time field was activated. The results would be embarrassing, to say the least!

It would be impractical to construct a vehicle made from an alloy of the whole range of 144 elements in the theoretical atomic table. Apart from this, such an alloy is no doubt a physical impossibility.

The clue which suggests a method of overcoming this problem is the way matter is built up in octaves of wave-forms. If an octave of elements could be combined, which would set up a resonating field tuned to all the elements in the table, and the unified fields of space then, maybe, we would have a method of crashing the time barrier.

I put forward the following proposal for consideration. If an octave of elements is the answer let us make a selection from the theoretical table of elements of 144. If we divide 144 by 8 we get divisions of 18 units, therefore we will select each of the elements we require, 18 units part, as follows:

- Atomic number 18: argon
- Atomic number 36: crypton
- Atomic number 54: xenon
- Atomic number 72: hafnium
- Atomic number 90: thorium
- Atomic number 108: X
- Atomic number 126: Y UNDISCOVERED ELEMENTS
- Atomic number 144: Z

Total number 648
It can be seen that the total harmonic value of the atomic numbers of the combined elements is 648. The square root of this number is 25.45584412, the harmonic of which is found in the polar sections of the world grid. Three new elements just recently discovered have atomic numbers of 116, 124 and 126. Do the scientists know something, and are they now looking for numbers 108 and 144.
The circumference remains a constant harmonic of 107766085 giving an electron spacing harmonic of 1347076. By doubling this harmonic to allow for the matter and anti-matter cycle we have a value of 2694 which closely complies with unified field equation (3) 2693645. A full computer program should make these values match exactly.

Harmonic values based on the Hydrogen Atom:
THE PHILADELPHIA EXPERIMENT

by

HARRY OSOFF

Albert Einstein conferring with naval officers in his study at Princeton, New Jersey, July 24, 1943. (National Archives)
Regional Philadelphia Newspaper Article

October 1943
Strange Circumstances
Surround Tavern Brawl

Several city police officers responding to a call to aid members of the Navy Shore Patrol in breaking up a tavern brawl near the U.S. Navy docks here last night got something of a surprise when they arrived on the scene to find the place empty of customers. According to a pair of very nervous waitresses, the Shore Patrol had arrived first and cleared the place out but not before two of the sailors involved allegedly did a disappearing act. "They just sort of vanished into thin air... right there," reported one of the frightened hostesses, "and I ain't been drinking either!" At that point, according to her account, the Shore Patrol proceeded to hustle everyone out of the place in short order.

A subsequent chat with the local police precinct left no doubts as to the fact that some sort of general brawl had indeed occurred in the vicinity of the dockyards at about eleven o'clock last night, but neither confirmation nor denial of the stranger aspects of the story could be immediately obtained. One reported-witness succinctly summed up the affair by dismissing it as nothing more than "A lot of hooey from them daffy dames down there." Who, he went on to say, were just looking for some free publicity.

Damage to the tavern was estimated to be in the vicinity of six hundred dollars.
The "Philadelphia Experiment" is the name that has commonly been given to an alleged Top-Secret experiment conducted by the United States Navy in 1943 in which the Destroyer Escort U.S.S. Eldridge, outfitted with several tons of specialized electronics equipment capable of creating a tremendous pulsating magnetic field around itself, was first made invisible and then transported, in a matter of moments, from the Philadelphia Navy Yard, to the Norfolk Docks and back again, a total distance of over 400 miles (640 kilometers).

The United States government for the last 43 years has officially denied that this experiment ever took place. Challenging this statement, however, are several unanswered questions: What caused the death of some of the crew members aboard ship in a safe and secure harbor? Why was the remainder of the crew discharged as medically unfit? If one concludes that the Philadelphia Experiment did really occur, then was the untimely death of an independent researcher investigating the alleged experiment really suicide? How could the Navy possibly accomplish such a fantastic experiment? In any case, the story begins with Morris Ketchum Jessup, an astronomy and mathematics Professor at the University of Michigan.

Morris Ketchum Jessup was born in Rockville, Indiana, March 20, 1900 and named after his uncle, a railroad and financial baron (who also had a Cape in the northernmost tip of Greenland named after him). In the late 1920s while a Doctorate student at the University of Michigan, the young Jessup's research was responsible for the discovery of many physical double stars now catalogued by the Royal Astronomical Society of London.

While the country was in the firm grip of the Depression and jobs were hard to find, Jessup, like so many other highly technical people, took work wherever he could. He was first assigned by the U.S. Department of Agriculture to go to the Amazon to study sources of crude rubber. From there he became a photographer on an archaeological expedition to the Mayan ruins in Central America. Then Jessup went to Peru to study pre-Incan culture. It was in Peru that Jessup, after studying these massive ruins with their incredible exactness and implicit construction skills, speculated that they could have been built only with the aid of levitating devices from sky ships of some sort. This theory places Jessup among the first
of modern scientists to believe in the "Ancient Astronauts" theory. This view, naturally, did not put him in high regard among his employers and colleagues, and he was soon on his own.

Jessup continued his research at his own expense. He found some very interesting craters in Mexico that were similar in structure and type to the mysterious craters on the Moon. Further research disclosed that the United States Air Force had highly classified photos of the Mexican craters. Running out of money, Jessup returned to the U.S. in 1954 to raise funds for further research. When the flying-saucer craze ran rampant in the late 1940s and early 1950s, Jessup became interested, first casually, and then quite seriously. His major focus was the possible propulsion power for these sky ships.

From what he had learned in Central America, Mexico, and Peru, Jessup was convinced that UFOs were a real possibility, and he had enough foundation to prove it. Jessup moved to Washington, D.C. and devoted the next year to extensive research. On January 13, 1955, he gave his publisher the completed manuscript of his book, *The Case for the UFO*. The book sold well enough such that in the fall of 1955 Bantam issued a paperback edition. Shortly after this book was published, Jessup received a most unusual letter. It was written in several different colors of ink and the spelling and punctuation were most odd. The subject of the letter, however, was even stranger than its grammatical oddities. The correspondent, a Mr. Allende (who signed his letters "Carl Allen") was markedly interested in Jessup's ideas about levitation and went to great lengths to agree with Jessup's theory—that many of our megaliths were built using the technique of levitation. In fact, he assured Jessup that levitation was not only scientifically possible but was commonplace on Earth in our recent past. Jessup was so fascinated by the style of the letter and the agreement with his own theory that he wrote back to Allende asking for more details.

These events concurred with several other pressing matters. At this time Jessup was doing the publicity and lecture circuit and was also preparing his second book, *The UFO and the Bible*. He soon forgot about the mysterious letter.

During the next year Jessup pushed for research into the unified field theory, something Einstein had worked on during the last twenty years of his life. It was this consuming interest that brought the "Philadelphia Experiment" back into the limelight. On January 13, 1956, exactly one year after his
Carlos Allende (alias Carl Allen) is the single most important individual in the story of the Philadelphia experiment. He it was who claimed to have seen the Eldivose – or 173 – disappear at sea in 1943. He also claimed to have read that it had been made to vanish from its docks in Philadelphia, materialise in the Norfolk area of Virginia and then return to Philadelphia a total distance of over 400 miles (640 kilometres). Many years later Allende recalled the experiment at sea: ‘I watched the air all around the ship ... turn slightly, ever so slightly, darker than all the other air ... I saw, after a few minutes, a foggy green mist arise like a thin cloud ... I watched as thereafter the DT 173 became rapidly invisible to human eyes’.

The Philadelphia naval docks, Pennsylvania, USA, where, said Allende, the Eldivose was the subject of a strange scientific experiment, being teleported to Virginia and back again.
My Dear Dr. Jessup,

Your invocation to the Public that they move en masse upon their representatives and have thusly enough pressure placed at the right & sufficient number of places where from a law demanding research into Dr. Albert Einsteins unified field theory may be enacted (1925-1927) is not at all necessary. It may interest you to know that the good doctor was not so much influenced in his retraction of that work, by mathematics, as he most assuredly was by humanics.

His later computations, done strictly for his own edification & amusement, upon cycles of human civilization & progress compared to the growth of man's general over-all character was enough to horrify him. Thus, we are told today that the theory was "incomplete."

Dr. B. Russell asserts privately that it is complete. He also says that man is not ready for it & shan't be until after W.W. III. Nevertheless, "results" of my friend Dr. Franklin Reno, were used. These were a complete recheck of that theory, with a view to any & every possible quick use of it, if feasible in a very short time. There were good results, as far as a group math re-check and as far as a good physical "result," to boot. Yet, the navy fears to use this result. The result was & stands today as proof that the unified field theory to a certain extent is correct. Beyond that certain extent no person in his right senses, or having any senses at all, will evermore dare to go.

I am sorry that I mislead you in my previous missive. True enough, such a form of levitation has been accomplished as described. It is also a very commonly observed reaction of certain metals to certain fields surrounding a current. This field being used for that purpose. Had Farraday concerned himself about the mag. field surrounding an electric current, we today would not exist or if we did exist, our present geo-political situation would have the very timebombish, ticking off towards destruction, atmosphere that now exists. Alright, alright! The "result" was complete invisibility of a ship, destroyer type, and all of its crew, while at sea. (Oct. 1943)

The field was effective in an oblate spheroidal shape, extending one hundred yards (more or less, due to lunar position and latitude) out from each beam of the ship. Any person within that sphere became vague in form but he too observed those persons aboard that ship as though they too were of the same state, yet were walking upon nothing. Any person without that sphere could see nothing save the clearly defined shape of the ship's hull in the water. Providing of course, that that person was just close enough to see yet, just barely outside of that field. Why tell you now? Very simple; if you choose to go mad,
then you would reveal this information. Half of the officers and the crew of that Ship are at Present, Mad as Hatters. A few are even Yet confined to certain areas where they may receive trained Scientific aid when they, either, "Go Blank" or "Go Blank" & Get Stuck." Going-Bland IE an after effect of the Man having been within the field too Much, IS Not at all an unpleasant experience to Healthy Curious Sailors. However it is when also, they "Get Stuck" that they call it "HELL" INCORPORATED The Man thusly stricken can Not Move of his own volition unless one or More of those who are within the field go & touch him, quickly, else he "Freezes".

If a Man Freezes, His position Must be Marked out carefully and then the Field is cut-off. Everyone but that "Frozen" Man is able to Move; to appreciate apparent Solidity again. Then, the Newest Member of the crew Must approach the Spot where he will find the "Frozen" Mans face or Bare skin, that is Not covered by usual uniform Clothing. Sometimes, It takes only an hour or so Sometimes all Night & all Day Long & Worse it once took 6 months to get the Man "Unfrozen". This "Deep Freeze" was not psychological It is a Result of a Hyper-Field that is set up, within the field of the Body, While the "Scorch" Field is turned on & this at Length or upon a Old Hand.

A Highly complicated Piece of Equipment Had to be constructed in order to Unfreeze those who became "True Froze" (Editor’s Note : This could be "Free Freeze") or "Deep Freeze" subjects. Usually a "Deep Freeze" Man goes Mad, Stark Raving, Gibbering, Running MAD, if His "freeze" is far More than a Day in our time.

I speak of TIME for DEEP "Frozen Men" are Not aware of Time as We know it. They are Like Semi-comatoese person, who Live, breathe, Look & feel but still are unaware of So Utterly Many things as to constitute a "Nether World" to them. A Man in an ordinary common Freeze is aware of Time, sometimes acutely so. Yet They are Never aware of Time precisely as you and I are aware of it. The First "Deep Freeze" As I said took 6 months to Rectify. It also took over 5 Million Dollars worth of Electronic equipment & a Special Ship Berth. If around or Near the Philadelphia Navy Yard you see a group of Sailors in the act of Putting their Hands upon a fellow or upon "thin air", observe the Digits & appendages of the Stricken Man. If they seem to Waver, as tho within a Heat-Mirage, go quickly & Put YOUR Hands upon Him, For that Man is The Very Most Desperate of Men in The World Not one of those Men ever want at all to become again invisible I do Not think that Much More Need be said as to Why Man is Not Ready for Force-Field Work. Eh?

You Will Hear phrases from these Men such as "Caught in the Flow (or the Push) or "Stuck in the Green" or "Stuck in Molasses" or " I was "going" FAST", These Refer to Some of the Decade-Later after effects of Force-Field Work. "Caught in the Flow" Describes exactly the "Stuck in Molasses" sensation of a Man going into a "Deep Freeze" or Plain Freeze" either of the two. "Caught in the Push" can either refer to That Which a Man feels Briefly WHEN he is either about to inadvertently "Go-Blank" IE Become Invisible or about to "Get Stuck" in a "Deep Freeze" or "Plain Freeze."

There are only a few of the original Experimental D-E's
Crew Left by Now, Sir. Most went insane, one just walked "throo" His quarters Wall in sight of His Wife & Child & 2 other crew Members (WAS NEVER SEEN AGAIN), two " Went into "The Flame," I.E. They "Froze" & Caught fire, while carrying common Small-Boat Compasses, one Man carried the compass & Caught fire, the other came for the "Laying on of Hands" as he was the nearest but he too, took fire. THEY BURNED FOR 18 DAYS. The faith in "Hand Laying" Died When this Happened & Mens Minds Went by the scores. The experiment Was a Complete Success . The Men were Complete Failures.

Check Philadelphia Papers for a tiny one Paragraph (upper Half of sheet, inside the paper Near the rear 3rd of Paper, 1944-46 in Spring or Fall or Winter, NOT Summer.) of an item describing the Sailors Actions after their initial Voyage. They Raided a Local to the Navy Yard "Gin Mill" or "Beer Joint" & caused such shock & Paralysis of the Waitresses that Little comprehensible could be gotten from them, save that Paragraph & the Writer of it, Does Not Believe it, & Says "I only wrote what I heard & them Dames is Daffy. So, all I get is a "Hide-it" Bedtime Story."

Check observer ships crew, Matson Lines Liberty ship out of Norfolk, (Company MAY Have Ships Log for that Voyage or Coast Guard have it) The S.S. Andrew Furnseth, Chief Mate Mowsely, (Will secure Captains Name Later) (Ships Log Has Crew List on it.) one crew member Richard Price or "Splicey" Price May Remember other Names of Deck Crew Men, (Coast Guard has record of Sailors issued "Papers") Mr. Price Was 18 or 19 then, Oct. 1943, and Lives or Lived at that time in His old Family Home in Roanoke, VA. a small town with a Small Phone book. These Men Were Witnesses, The Men of this crew, "Connally of New England, (Boston?), May have Witnessed but I doubt it. (Spelling May be incorrect) DID witness this. I ask you to Do this bit of Research simply that you May Choke on your own Tongue when you Remember what you have "appealed to be Made Law"

Very Disrespectfully Yours,
Carl M. Allen

Days Later

Notes in addition to and pertaining to Missive.
(Contact Rear Admiral Ransom Bennett for verification of info Herin. Navy Cheif of research. He may offer you a job, ultimately)

Coldly & analytically speaking, without the Howling that is in the Letter to you accompanying this, I will say the following in all Fairness to you & to Science. (1) The Navy did Not know that the men could become invisible WHILE NOT UPON THE SHIP & UNDER THE FIELDS INFLUENCE. (2) The Navy Did Not know that there would be Men Die from the odd effects of HYPER "Field" within or upon "Field." (3) Further, They even yet do Not know Why this happened & are not even sure that the "F" within "F" is the reason, for sure at all. in Shot The Atomic bomb didn't kill the experimenterors thus the expieriments went on-but
Left: the ss *Andrew Furuseth*, which Carlos Allende (using the name Carl Allen) joined in August 1943. In the photograph of the ship's officers and crew (above), the man standing immediately to the left of the right-hand ventilator is thought by some researchers to be Allende, who served on the ship until January 1944.
ANTI-GRAVITY AND THE WORLD GRID 119

eventually one or two were accidentally killed But the cause was known as to Why they died.

Myself, I "feel" that something pertaining to the Small-boat compass "triggered" off "The Flames." I have no proof, but Neither Does the Navy. (4) WORSE & Not Mentioned When one or two of their Men, Visible-within-the-field-to- all-the-others, Just Walked into Nothingness AND Nothing Could be felt, of them, either when the "field" Was turned on OR off, THEY WERE JUST GONE! Then, More Fears Were Amassed. (5) Worse, Yet, When an apparently Visible & New-Man Just walks semingly "throu" the Wall of his House, the surrounding area Searched by all Men & thoroughly scrutinized by & with & under an Installed Portable Field developer AND NOTHING EVER found of him. So Many Many Fears were by then in effect that the Sum total of them all could Not ever again be faced by ANY of those Men or by the Men Working at & upon the Experiments.

I wish to Mention that Somehow, also, The Experimental Ship Disappeared from its Philadelphia Dock and only a Very few Minutes Later appeared at its other Dock in the Norfolk, Newport News, Portsmouth area. This was distinctly AND clearly Identified as being that place BUT the ship then, again Dissappeared And Went Back to its Philadelphia Dock in only a Very few Minutes or Less. This was also noted in the newspapers But I forget what paper I read it in of When It happened. Probably Late in the experiments, May have been in 1956 after Experiments were discontinued, I can Not Say for Sure

To the Navy this Whole thing was So Impractical due to its Morale Blasting effects Which were so much so that efficient operation of the Ship was Drastically hindered and then after this occurrence It was shown that even the Mere operation of a ship could Not be counted upon at all. In short, Ignorance of this thing bred Such Terrors of it that, on the Level of attempted operations, with what knowledge was then available It was deemed as impossible, Impracticable and Too Horrible.

I believe that Had YOU then been Working upon & With the team that was Working upon this project With yourself knowing what You NOW know, that "The Flames" Would Not have been so unexpected or Such a Terrifying Mystery. Also, More than Likely, I must say in All fairness, None of these other occurrences could have happened without some knowledge of their possibility of occurring. In fact, They May have been prevented by a far More Cautious Program AND by a Much More Cautiously careful Selection of Personnell for Ships officers & Crew.

Such Was Not the case. The Navy used whatever Human Material was at hand, Without Much, if any, thought as to character & Personality of that Material. If care, Great Care is taken in selection of Ship, and officers and crew AND If Careful Indoctination is taken along with Careful watch over articles of apparel Such as rings & Watches & Identification bracelets & belt buckles, Plus AND ESPECIALLY the effect of Hob-Nailed shoes or Cleated-shoes U.S. Navy issue shoes, I feel that some progress towards dissapating the fearfilled ignorance surrounding this project Will be Most surely & certainly accomplished. The Records of the U.S. Maritime Service HOUSE Norfolk, Va. (for Graduated Seamen of their Schools) Will reveal who was assigned to S.S. Andrew Furuseth for Month of either Late Sept. or Oct. of
1943. I remember positively of one other observer who stood beside me when tests were going on. He was from New England, Brown Blond Curly Hair, blue eyes, don't remember name. I leave it up to you to decide if further work shall be put into this or not, and write this in hopes there will be.

Very Sincerely,
Carl M. Allen

So here was a mysterious correspondence from a man who talked like he knew intimately about levitation, disappearing ships, and invisible men. He wrote in different color inks and with a style of writing that would not win any good grades anywhere. Jessup, meanwhile, was being pushed around by his agents in New York to run the publicity circuit and to get a new book out while the interest was still hot on his last one. But all he wanted was to make some cash and get back to those craters in Mexico. It would have been easy to just forget the whole Allende matter, but Jessup sent him a postcard asking for more details and five months later he received the following reply. (Once again, this is reprinted as it was received by Jessup)

Dear Mr. Jessup:

Having just recently gotten home from my long travels around the country I find that you had dropped me a card. You ask that I write you "at once" and so after taking everything into consideration, I have decided to do so. You ask me for what is tantamount to positive proof of something that only the duplication of those devices that produced "This Phenomenon" could ever give you. At least, were I of scientific bent, I presume that, were I of such a curiosity about something, the which has been produced from a theory that was discarded (1927) as incomplete, I am sure that I would be of such dubiousness towards those devices that produced such a curious interaction of forces & fields, in operation & their product.

Mr. Jessup, I could NEVER possibly satisfy such an attitude. The reason being that I could not, nor ever would the Navy Research Dept. (Then under the present boss of the Navy, Burke) ever let it be known that any such thing was ever allowed to be done. For you see, it was because of Burkes Curiosity & Willingness & prompting that this experiment was enabled to be carried out. It proved a white-elephant but His attitude towards advanced & ultra-advanced types of research is just THE THING that put him where he is today. (Or at least, to be sure, it carries a great weight). Were the stench of such an Experiments results ever to come out, He would be crucified.

However, I have noticed, that throo the ages, those who have had this happen to them, once the vulgar passions that caused the reaction have cooled-off AND further research OPENLY carried
A: The theoretical transfer position of the experimental ship when projected from the Penn's Landing area. The position would be further to the west if projected from the point adjacent to the Philadelphia College of Science.
You say that this, "is of the greatest importance". I disagree with you Mr. Jessup, not just whole heartedly, but vehemently. However at the same time, your ideas & your own sort of curiosity is that of mine own sort and besides my disagreement is based upon philosophical Morality and not upon that curiosity which Drives Science so rapidly. I can be of some positive help to you in myself but to do so would require a Hypnotist, Sodium Pentathol, a tape recorder & an excellent typist-secretary in order to produce material of Real value to you.

As you know one who is hypnotized cannot Lie and one who is both hypnotized AND given "Truth Serum" as it is colloquially known, COULD NOT POSSIBLY LIE, AT ALL To boot, My Memory would be THUS enabled to remember things in such great detail, things that my present consciousness cannot recall at all, or only barely and uncertainly that it would be of far greater benefit to use hypnosis. I could thus be enabled to not only Recall COMPLETE names, but also addresses & telephone numbers AND perhaps the very important Z numbers of those sailors whom I sailed with or even came into contact with. I could too, being something of a Dialectician, be able to thusly talk exactly as these witnesses talked and imitate or illustrate their Mannerisms & Habits of thought thus your psychologists can figure IN ADVANCE the Surefire method of dealing Most Successfully with these. I could NOT do this with someone with whom I had not observed at length & these men, I lived with for about 6 months, so you are bound to get good to excellent results.

The mind does NOT ever forget. Not really. As you know. Upon this I suggest this way of doing this with Myself but further, the Later usage of Myself in Mannerisms & Thought pattern illustration is suggested in order that the Goal of inducing these Men to place themselves at & under your disposal (HYPNOTICALLY OR UNDER TRUTH-SERUM) is a Goal, the Which could Have Far greater impact, due to co-relation of Experiences remembered Hypnotically by Men who have not seen or even written to each other, at all, for Nearly or over TEN years. In this, with such Men as Witnesses, giving irrefutable testimony It is my belief that were, Not the Navy, but the Airforce, confronted with such evidence, (IE Chief of Research) there would be either an uproar or a quiet and determined effort to achieve SAFELY "that which" the Navy failed at.

They did NOT fail to, I hope you realize, achieve Metallic & organic invisibility nor did they fail to, unbesoughtedly, achieve transportation of thousands of tons of Metal & Humans at an eyes blink speed. Even though this latter effect of prolonged experimentation was (to them) The thing that caused them to consider the experiment as a failure, I BELIEVE THAT FURTHER EXPERIMENTS WOULD NATURALLY HAVE PRODUCED CONTROLLED TRANSPORT OF GREAT TONNAGES AT ULTRAFAST SPEEDS TO A DESIRED POINT THE INSTANT IT IS DESIRED throu usage of an area covered by: (1) those cargoes and (2) that "Field" that could cause those goods, Ships or Ship parts (MEN WERE TRANSPORTED AS WELL) to go to another Point. Accidentally & to the embarrassed perplexity of the Navy THIS HAS ALREADY HAPPENED TO A WHOLE SHIP, CREW & ALL. I read of this AND of THE OFF-BASE AWOL ACTIVITIES OF THE crew-Men.
who were at the time invisible in a Philadelphia NEWSPAPER. UNDER NARCO-HYPNO-HYPNOSIS I CAN BE ENABLED TO DIVULGE THE NAME, DATE & SECTION & PAGE NUMBER of that Paper & the other one.

Thus this papers "Morgue" will divulge EVEN MORE POSITIVE PROOF ALREADY PUBLISHED of this experiment. The Name of the Reporter who skeptically covered & wrote of these incidents (OF THE RESTAURANT-BARROOM RAID WHILE INVISIBLE & OF THE SHIPS SUDDEN AWOL) AND WHO INTERVIEWED the Waitresses CAN THIS BE FOUND, thus HIS and the Waitress' testimony can be added to the Records. Once on this track, I believe That you can uncover CONSIDERABLY MORE evidence to sustain this— (what would you call it—SCANDAL or DISCOVERY?) You would Need a Dale Carnegie to Maneuver these folks into doing just as you wish. It would be cheaper than paying everyone of all these witnesses & Much more Ethical. The Idea Is, to the Layman type of person, utterly ridiculous. However, can you remember, all by yourself, the Date of a Newspaper in which you saw an interesting item more than 5 years ago? Or recall names of Men, their phone #’s that you saw in 1943-44.

I do hope you will consider this plan. You will Progress as Not possible in any other way. Of course, I realize that you will need a Man Who can cause people to want to have fun, to play with Hypnotism, one that can thusly dupe those he-you need to: #1 come to His Demonstrations & thus call on them to be either both "Honored" as Helping with the show & doing Him a Great favor, & if being part of the act for the mite of a small fee He would HAVE to be a Man of such an androit ingenuity at Manufacturing a plausible story on the-instant-he-sizes-up-his-*personality-to be dealt with THAT had cost PLENTY. The ability to convince people of an outright Lie as being the absolute truth would be one of his prime prerequisites. (Ahem.) Yes, some such skulduggery would have to be thought well out & done. THE ULTIMATE END WILL BE A TRUTH TOO HUGE, TOO FANTASTIC, TO NOT BE TOLD. A WELL FOUNDED TRUTH, BACKED UP BY UNOFUSCATIVE PROOF POSITIVE.

I would like to find where it is that these Sailors live NOW. It is known that some few people can somehow tell you a mans name & His Home address UNDER HYPNOSIS EVEN THOUGH NEVER HAVING MET OR SEEN THE PERSON. These folks have a very high or just a high PSI factor in their make-up that can be intensified under stress or strain OR that usually is intensified under extreme fright. It also can be RE-intensified by Hypnosis, thus is like reading from the Encyclopedia Brittanica. Even though that Barroom- Restaurant Raid was staged by invisible or partly invisible men, those men CAN SEE EACH OTHER THUS NAMES, in the excitement, were sure to have been Mentioned, whether last or first Names or Nicknames. A check of the Naval Yards Dispensories or Hospital or aid stations or prison RECORDS of that particular day that the Barroom-Restaurant occured May reveal the EXACT NAMES OF PRECISELY WHO WERE THE MEN, THEIR SERVICE SERIAL NUMBERS & THUS THE INFORMATION ON WHERE THEY ARE FROM BE SECURED & by adroit "maneuvurings" of those still at Home, THE NAME OF THE PLACE

where they are at present can be secured.
HOW WOULD YOU LIKE TO ACTUALLY SPEAK TO (or some of THE MEN) A MAN WHO WAS ONCE AN INVISIBLE HUMAN BEING? (MAY BECOME SO IN FRONT OF YOUR VERY EYES IF HE TURNS OFF HIS HIP-SET). Well, all this fantastically Preposterous sort of rubbish will be necessary. Just to do that, the Hypnotist-psychologist & all that. Maybe I suggest something too thorough & too Methodical for your taste but then, I, as first subject, Don't care to be Hypnotised at all. But too, feel that certain pull of curiosity about this thing that, to me, is irresistible. I want to crack this thing wide open. My reasons are simply to enable more work to be done upon this "Field Theory."

I am a star-gazer Mr. Jessup, I make no bones about this and the fact that I feel that IF HANDLED PROPERLY, I.E. PRESENTED TO PEOPLE & SCIENCE IN THE PROPER PSYCHOLOGICALLY EFFECTIVE MANNER, I feel sure that Man will go where He now dreams of being—to the stars via the form of transport that the Navy accidentally stumbled upon (to their embarrassment) when their EXP. SHIP took off & popped-up a minute or so later on several Hundred sea travel-trip miles away at another of its berths in Chesapeake Bay area. I read of this in another newspaper & only by Hypnosis could any Man remember all the details of which paper, date of occurrence & etc., you see? Eh. Perhaps already, the Navy has used this accident of transport to build your UFO's. It is a logical advance from any standpoint. What do you think??
forth between three people. The comments suggested a knowledge of UFOs, their method of propulsion, and the origin and background of the beings operating them. The book at that time fell into the possession of Major Darrell L. Ritter (U.S.M.C. Aeronautical Project Officer at O.N.R.) who took a great interest in these comments. It was obvious that a great deal of time and effort had been put into this book.

Major Ritter was also aware of the government's momentary interest in anti-gravity research, and felt that the comments about undersea cities built by two groups of extra-terrestrials (called the LMs and SMs) were quite intriguing. There were explanations for mysterious ship and plane disappearances in the Bermuda Triangle. Also included was an extensive commentary on the origins of odd storms and clouds, of objects falling from the sky, of strange marks and footprints that Jessup had written about, and many odd words (such as: "mothership", "home ship", "dead ship", "great ark", "great bombardment", "great return", "great war", "little men", "force fields", "deep freeze", "measure markers", "scout ships", "magnetic fields", "gravity fields", "sheets of diamonds", "cosmic rays", "force cutters", "inlay work", "clear talk", "telepathing", "nodes", "vortices", and "magnetic net") that were used throughout the book and which might be of some value for later research. Afterwards, Major Ritter passed the book on to two other O.N.R. officers, Commander George W. Hoover (Special Projects Officer) and Captain Sidney Sherby. These men were intimately involved in the Navy's Project Vanguard, the code name for the U.S. effort to develop the first artificial earth satellite.

Commander Hoover and Captain Sherby, reviewing the book, and the mysterious comments within it, invited Jessup to come to O.N.R. and discuss his book. By this time it was the spring of 1957 and 18 months had passed since the book had first arrived at the O.N.R. As Jessup read the annotated book he reportedly became more and more distressed, because the comments referred to subjects he had heard about but which had not been mentioned in his writings. The person or persons who had written these comments had a good understanding of the current "myths" of UFOs, extraterrestrials, and other subjects mainly the concern of psychics, cultists and mystics. Jessup became confused as to why the United States government was so interested in the scribblings from such an apparently cluttered mind. As he read further he came across a comment concerning a secret Navy experiment in 1943 and immediately he knew who had been responsible for the crazed and disjointed comments.
Jessup then shared his discovery with the Naval Officers and they in turn asked if the O.N.R. could have the letters. Next they informed Jessup that a special edition of his book was being produced by them and it would include all the additions. Jessup consented to the new edition and made three additional trips to the O.N.R. concerning this matter.

Shortly after these meetings Jessup was involved in a car accident. At the same time he began experiencing marital difficulties; close friends say he was never quite the same after that. He seemed quite disturbed by the Navy experience and after receiving the promised copies of his own book he spent considerable time adding his own comments. Hoover and Shelby would, in the days to come, make many attempts to find the elusive Allende (Carl Allen) but with no success. Jessup was still confused as to why the Navy was so interested in this matter, and spent considerable time researching the details of the operation known as the "Philadelphia Experiment".

In the meantime all his efforts to get back to Mexico had come up blank, and he now devoted himself to writing and publishing. He moved back to his native Indiana and started publishing a small astrological journal. During October of 1958, Jessup left Indiana for New York on publishing business and around the 31st paid a visit to a friend, Ivan T. Sanderson, founder of the Society for the Investigation of the Unexplained (S.I.T.U.). Over dinner Jessup gave Sanderson the copy of the book he had been making notes in; Jessup, being visibly disturbed, asked Sanderson in great sincerity to read it and then lock it up for safe keeping—"In case anything should happen to me."

Jessup was scheduled to return to Indiana within a few days. When he failed to return, his publisher became concerned and contacted one of Jessups' associates concerning his whereabouts. His associate related that he had no information. Six weeks after his New York departure Jessup, was located in Florida; apparently, he had gone there from New York and had been involved in another major car accident from which he was still recovering. Jessup, during those next months, was in terrible spirits. His publisher rejected his manuscripts as being "not up to par." His writings were drawing considerable criticism from all around the country. On April 20, 1959, two years after meeting with the O.N.R., Jessup was found dead in his car close to his Florida home: a victim of carbon-monoxide poisoning. A hose had been attached to his car exhaust and passed into the passenger side window.

Jessup had killed himself. Or had he? Jessup's death has
been the subject of substantial speculation. Some of his friends have said that Jessup was not the type to kill himself. Others have suggested he was murdered when he refused to abandon his UFO research. Rumors were then circulating about the "Men In Black", the name given to government agents who allegedly visited several UFO researchers and "persuaded" them to cease and desist their work. Other friends said that Jessup was depressed about personal problems and that he had sent a suicide note to a close friend. However, the handwriting was not checked to see if it matched with Jessup's.

The truth about Morris K. Jessup will probably never be known, placing him in that same file cabinet along with Karen Silkwood, John F. Kennedy, Martin Luther King, and other humans regarding whom certain factions in our society would have an easier time of things if they were invisible or dead.

So we might ask, Did the Navy really make a Destroyer-class ship disappear and transport itself over four hundred miles of ocean in a matter of moments, or is this just some fantastic story? And if this is not just a story, why did they do it? We know by the results why the Navy might have wanted to keep things quiet. Governmental cover-ups are not new; they seem to come with the institution. Maybe we can reach a conclusion more easily if we learn more about the last day of Jessup's life.

Dr. J. Manson Valentine, an oceanographer, archaeologist, and zoologist, had been a friend of Jessups' for the last fourteen years of his life while he resided in Florida. Jessup, as we know, was very upset during the last months of his life and was reaching out more than ever to talk with someone. Dr. Valentine was that someone. It was during these last months that Jessup shared his innermost feelings about the Philadelphia Experiment with him. It's very probable that Dr. Valentine was the last person to talk with Jessup. He had spoken to Jessup on April 20, 1959, and had invited Jessup to dinner; Jessup accepted his invitation, but never showed up.

When asked, "Why do you think Jessup killed himself?", Dr. Valentine's answer was: "If he committed suicide it was probably due to extreme depression. He had been approached by the Navy to continue working on the Philadelphia Experiment or similar projects, but had declined, as he was worried about its dangerous ramifications... Perhaps he could have been saved. He was still alive when he was found .... Perhaps he was allowed to die." Dr. Valentine went on to say that Jessup had researched the question of the Philadelphia Experiment, "pretty thoroughly. You must remember that he was not a crank writer, but a distinguished and famous scientist."
Dr. Valentine remembers Jessup relating some strange things he had learned concerning the Navy's experiment. Jessup said the invisibility effect had been accomplished by using magnetic field generators, called degaussers, which were "pulsed" at resonant frequencies to create a huge magnetic field around the Destroyer. In Dr. Valentine's opinion Jessup was well informed of the alleged experiment and had met with the Navy officers and scientists several times. He had said to Dr. Valentine: "The experiment is very interesting but awfully dangerous. It is too hard on the people involved. This use of magnetic resonance is tantamount to temporary obliteration in our dimension but it tends to get out of control. Actually, it is equivalent to a transference of matter into another level or dimension, and could represent a dimensional breakthrough if it were possible to control it."

According to Valentine, Jessup believed he was "on the verge of discovering the scientific basis for whatever was happening." Jessup explained: "An electric field created in a coil induces a magnetic field at right angles to the first, and each of these fields represents one plane of space. But since there are three planes of space, there must be a third field, perhaps a gravitational one. By hooking up electromagnetic generators so as to produce a magnetic pulse it might be possible to produce this third field through the principle of resonance." Jessup thought the Navy had discovered this by accident.

This brings up the interesting possibility of a fourth dimension. It is known, by abstract mathematics, that it is possible to have as many as fifteen dimensions. If they exist as a mathematical concept, they exist in fact (according to Pythagoras). It is a widely held belief among scientists that basic atomic structure is essentially electric in nature rather than material. A vast interplay of energies is involved. This concept gives us great flexibility in visualizing the universe such that if multiple phases of matter don't exist it would be quite surprising.

The transition from one phase (our world), to another world would be equivalent to the passage from one plane of existence to another in a sort of interdimensional metamorphosis. It is a case of worlds within worlds. Magnetism is thought to be the key factor in the control of these dimensional changes. Magnetism is the only phenomenon for which scientists have no mechanical explanation. We can visualize electrons travelling along a wire to create electric current, and we can envision waves of different frequencies to create heat, light and radio.
But a magnetic field defies mechanical interpretation. In addition, when UFOs do their materializations/dematerializations, intense magnetic disturbances are always present.

With these thoughts in mind let's see how the concept of a "World Grid" could be a key factor in the location and function of the alleged Philadelphia Experiment.

The Philadelphia Experiment is fantastic because it disturbs our sense of what we think exists in a particular time and space. And when we speak of space and time, we invariably think of Einstein. Jessup believed Einstein's theories held the key to UFO propulsion; after all, Carl Allen had confirmed that it not only was the key but full scale research and experimentation of Einstein's mysterious mathematical concepts was already a reality.

Researching Naval employment records we find that Albert Einstein was hired as a Scientist for the Office of Naval Research (O.N.R.) on May 31, 1943, a post he maintained until June 30, 1944. Also on July 24, 1943, Einstein met with Naval Officers in his Princeton study—just three months prior to the Philadelphia Experiment.

One way to cross the tremendous distances of space would be to alter the structure of space itself. This could be accomplished by modifying the space-time geometric matrix. It is this matrix that gives us the illusion of form and distance.

One method of changing the matrix is through the modification of frequencies controlling the matter-antimatter cycles. These in turn control our perceptions of things existing in apparent space-time. Einstein's premise is that time is a geometric concept; therefore, if this could be altered, then all of the universe would become available to us at any single moment.

In one second we could travel great distances, for at that point distance would be revealed as an illusion. According to a prevalent view, Time is the factor that keeps objects apart in space. With the possibility of moving from place to place in what is called "Zero Time", then both places exist in the same place according to our perception. By speeding up the geometric of time we are able to bring distant objects closer together. This is the secret of extra-terrestrial spacecraft; they travel by altering the space dimension by bringing time to zero.

Einstein believed that physical matter was nothing more than a concentrated field of force. What we see visually as a physical substance is in actuality a combination (or four-dimensional matrix) of frequencies. Different frequencies combine in different ways thus creating different physical masses. These masses seem solid to us because we are also
Position A: Theoretical experimental site in the vicinity of the Philadelphia College of Science.

Position B: Theoretical experimental site in the vicinity of Penn's Landing.

Latitude A — B= 143795.77 seconds of arc north. The speed of light harmonic at the earth's surface.
made up of similar wave-forms which vibrate within a defined band-width, and this band-width makes up the limited perspective of our visual, physical world.

In the famous equation $E = MC^2$, $M$, the value for mass, can be replaced by a value representing a specific waveform. According to Bruce Cathie's mathematics of the world grid, the substituted term is a function of the velocity of Light.

\[
\text{Einstein} \quad E = MC^2
\]

\[
\text{Cathie grid} \quad M = C + \sqrt{1/C}
\]

Therefore \( E = (C + \sqrt{1/C}) C^2 \) (Harmonic equation 1)

Within this unified field equation, expressed in terms of pure electromagnetic energy, lies the key to the universe: the whole of existence, the seen and unseen, forms, solids, liquids and gases, the stars and the blackness of space itself. All is perceived 'to consist of visible and invisible waves of light. All of creation is Light.

The earth is simply a huge magnet wound with magnetic lines of force. The coils are 1,725 cm\(^2\) in one direction and 1,850 cm\(^2\) in the other. These lines of force form a grid pattern due to the spin of our planet. At any given point there are a trillion lines of force crossing and creating small vortices. Each vortex manifests as an atomic structure and creates within itself a gravitational field. The gravitational field is nothing more than the effect of relative motion in space. Matter is drawn towards a gravitational field, just as a piece of wood is drawn into a whirlpool. The gravitational fields created by the vortexual action of every atom combine to form the complete field of our planet Earth. The lattice matrix of the world grid is the natural grid formed by these interlocking lines of force.

(\textit{Editor's Note}: Actually, the magnetic field density at the surface of the Earth, in gauss, is approximately 0.5 lines per cm\(^2\))

The basic unit for harmonic calculation in relation to this grid is the \textbf{geodetic inch}, or 0.172 minutes of arc, one minute of arc being 6,000 geodetic feet. By taking the values of 1,725 and 1,850 per cm\(^2\) and calculating the field strengths for one square geodetic inch, the field density is found to be 8,326.71764 and 12,255.08864, respectively. When the fields are in opposition, the combined field density is 20,581.80628
Navy has lots of tricks to make carriers disappear

WASHINGTON, D.C. (AP) — U.S. Navy aircraft carriers, despite their incredible size, are becoming adept at a form of magic.

Utilizing weather, speed, advanced logistical planning and high-tech tomfoolery, several carriers in recent months have managed to vanish from antagonists' eyes into the vastness of the oceans, reappearing only at the moment of attack.

Last April, dogged by airplanes rested by American television networks and by Soviet intelligence vessels, the carriers Coral Sea and America dropped from sight off the coast of Sicily. Less than 24 hours later, their planes bombed targets in Libya.

And just over a month ago, a much lengthier case of a "missing" carrier occurred during an exercise named RIMPAC 86. The USS Ranger, although the target of an intense search that included satellite reconnaissance, escaped detection for two weeks while sailing across the Pacific.

The performance was considered all the more remarkable by an Australian admiral who monitored the exercise because the carrier's planes were flying sorties throughout the period, staging mock attacks against surface ships, submarines and land targets.

Rear Adm. I.W. Knox of the Royal Australian Navy disclosed recently the "orange" forces in RIMPAC could not locate the Ranger "from the time it departed Southern Californian exercise areas until it steamed into Pearl Harbor some 14 days later."

Reports of such exploits delight Navy brass, who must answer critics who think carriers are sitting ducks in an age of nuclear-powered submarines and cruise missiles.

Modern-day carriers have yet to be tested in combat against Soviet weaponry. But they are practicing hard at what the Navy calls "maneuver strategy" — if the enemy can't find you, you have surprise. And with surprise, you can win.

Navy spokesmen decline to discuss the war-fighting tactics, citing military secrecy. But several officers interviewed recently, who asked not to be identified, say the idea of a "stealthy carrier" is not so far-fetched. Consider:

- The Coral Sea and America accomplished their feats through a variety of tricks, but the most important were "masking" and "EMCON." The details of masking are classified, but essentially it involves making another ship — a destroyer, for example — look and sound like a carrier and a carrier look like something else.

Please see CARRIERS, page A5
CARRIERS

The process normally begins when a carrier is under radar surveillance, but beyond visual sight. The decoy ship maintains the carrier's previous course, while the carrier speeds away.

"We can make the Soviets believe another ship is the carrier," says one official. "The radar image, broadcasting pilot talk and the radio sound of flight operations, the lighting at night: it looks like a duck and sounds like a duck so it must be a duck. So they follow the duck and make a mistake."

The carrier, meantime, can employ lighting at night that makes it look like a tanker.

- Also employed by the Coral Sea and America, and the key to the Ranger's disappearing act, was EMCON. This is the equivalent of a submarine "rigging for silence" or a convey traveling under blackout conditions.

EMCON is a Navy acronym for emission control. Emission, in this case, refers to the electronic signals that are radiated by such equipment as radars, sonar, and radars. When a carrier goes to EMCON, it literally shuts down much of its electronic gear to avoid detection.

Navy officials say a carrier can operate for long periods in EMCON "because we go mute, but not deaf or blind."

The procedure works by utilizing E-2C Hawkeye radar planes, flying at some distance from the carrier. Everything the Hawkeye sees is relayed electronically to the carrier and its escorts, providing a picture of aerial activity as well as surface forces.

While transmitting, the Hawkeye is far from the carrier, which gets the plane's signals passively without any transmission of its own. The Hawkeye also takes on the role of air-traffic controller for the carrier's planes.

Replenishment oilers, meantime, are told well in advance to make their own way to a specific position in the ocean. Again, radio silence is maintained.

- Aviation tactics. Even if radar can't pick up a carrier sailing beyond the horizon, the ship's location can be betrayed by jet aircraft scrambling into the air. The Navy's answer is called "offset vector."

"To be simplistic, the planes don't climb," says one officer. "They catapult off and literally hit the deck. If planes are suddenly popping up 100 miles from the ship, you have no idea where they came from."

- Speed. Publicly, the Navy says its carriers can make speeds "in excess of 30 knots." Privately, officers acknowledge the floating cities can approach 40 knots.

"We can literally outrun the Soviet tattletales (intelligence ships)," says one. "And in (heavy) weather of any kind, there's no contest. The carrier can outgun its own escort."

- Weather and Satellites. Anyone who's been caught in the rain after the weatherman forecast sunny skies has his own thoughts on meteorology. But there have been solid gains made within that science in recent years.

"Although really heavy weather can hurt flight operations, these guys know how to follow weather patterns and use rain storms and above all, cloud cover," says one official. "The carriers can receive weather data via satellite, passively, without portraying their position."

"And we know the orbital parameters of Soviet reconnaissance satellites as well as our own," adds another. "If there's a recon bird coming by and you can duck into some weather, you duck into the weather. Or if you know there's a blind spot in coverage, you sail there."

"Once you succeed in slipping away," summarizes one officer, "the odds shift in your favor. Most people don't have any conception of how big the oceans are. You can be lonely if you want."
for one square geodetic inch. The difference in field strengths is calculated to be 12,255.08864 minus 83,26.71764 which equals 3,928.371. From this we can say that the resultant field density one way is field $A$ minus field $B$ or 3,928.371 lines of force per cm$^2$. This value is the reciprocal of 1/2 the distance of the polar grid square size.

We can now formulate another equation in order to demonstrate the association of the Earth’s magnetic field with the speed of light.

Please note that 144,000 is a speed of light harmonic value in free space. The figure of 143,900 minutes of arc grid per second will be explained below.

\[
\text{Harmonic Equation 2}
\]

\[\text{Field (A - B) = (2C + \sqrt{1/2C}) (2C) = 3,928.371} \]

Where $C = 144,000 - 90.9345139 = 143,909.0655$

The value of 90.9345139 is of interest because $90.9345139 = \frac{3,928.371}{432}$

The reduction in the speed of light is equal in harmonic terms to the resultant field strength divided by the radius of the spherical mass. In this case the radius is equivalent to the distance in minutes of arc, from the Earth's center to the average height of the atmosphere (432 being a harmonic of 4,320 minutes of arc).

We can now generate another equation by inserting the value for the speed of light at the Earth’s surface. By mathematical conversion this was found to be 143,795.77 minutes of arc per grid second, where one grid second was 1/972,000 part of the time taken for one revolution of the Earth.

\[
\text{Harmonic Equation 3}
\]

\[2,693,645 = \sqrt{(2C + \sqrt{1/2C}) (2C)} \]

Where $C = (144,000 - 204.23) = 143,795.7$

(Harmonic of the speed of light at the surface of the Earth.)
Theoretical geometric pattern for the Philadelphia Experiment.

Longitude 75° 00' 13.8" west

A

B

Latitude 39° 56' 35.72" north

C

Pens' Landing Area

D

Norfolk Naval Docks

Latitude 39° 56' 35.72" = 143795.77 minutes of arc north, which is equal to the harmonic of the speed of light at the earth's surface.

Displacement of Norfolk position from North Pole = 53.089935 degrees
Displacement of Norfolk position from Equator = 36.910065 degrees
Difference = 16.1687 degrees
Divided by 66 = 0.246365 harmonic
Distance B = C = 189.7368596 minutes of arc = 3.1627766 degrees. This number group has its own mirror image reciprocal. The circular area swept out by a wave-front of this radius would be harmonically equal to Pi, or 3.141592654.

Latitude displacement A = C = 181.452266 minutes of arc. The square root of this number equals 13.45942 which is a harmonic of electron spacing in the atomic nucleus.

1. magnitude displacement C = D = 1.8403288 degrees. The reciprocal of this value equals 0.5472215.

Double this value equals 1.094443 harmonic.
Now, let's surmise that as the harmonic of light decreases, the energy which is being released converts its form into physical matter. You wouldn't think that the universe would leave to chance the physical stuff we call reality. As Einstein once said, "God does not play dice with the universe!"---invisible ships, disappearing men, reality, notwithstanding.

Bruce Cathie has spent considerable time studying the latitudes and longitudes of the Philadelphia and Norfolk Navy Yards in a search for the two points that were harmonically correct for the movement across space-time.

The latitude of the Philadelphia Naval Base, namely, 39° 56' 35.77" North, set up a prime harmonic of the speed of light, which was 143,795.77 seconds of arc. It is an interesting coincidence that the College of Science was established at this latitude. This latitude is equivalent to 143,795.77 seconds of arc North. The latitude in the Norfolk area is 36° 55' 08" North.

Distance from the North Pole = 53.080935 degrees
Distance from the equator= 36.919065 degrees
Difference = 16.1618 / 60 = 0.2693645 harmonic

The longitude of the Philadelphia site is 75° 08' 55.8" West
The longitude of the Norfolk site is 76° 19' 45.0" West

The direct great circle track between the two sites is 189.7366596 minutes of arc, which is equivalent to 3.1627766 degrees. The circular area swept out by a wave of this radius would harmonically be equal to $n$.

The latitudinal displacement is 181.452266 minutes of arc. The square root of this number equals 13.47042, which is a harmonic of the electron spacing in the atomic nucleus.

The longitudinal spacing would equal 1.1803288 degrees. The reciprocal of this number is 0.8472215; when doubled this number yields the 1.694443 harmonic.
Another interesting coincidence exists here. Line B-C in the diagram is very close to and parallel with grid line #18 on the Becker-Hagens world grid system (See their chapter "The Planetary Grid: A New Synthesis," above). This line connects the Philadelphia docks and the Norfolk docks with the Bermuda Triangle. Could it be that the vessel in its dematerialized state was actually on this grid line? Could it be that the energy that makes all this possible is a magnetic field transmitted at the correct frequency by the powerful field generators aboard the ship?

Maybe it is true that the Navy scientists didn’t expect what resulted from their unique experiment; maybe, in fact, the results were terribly counter to the desired effects. If indeed the goal had been just to make the ships invisible to radar (similar to modern day Stealth systems), or to magnetically repel torpedos, perhaps instead the Navy found something of much greater import than anyone had ever imagined.

It seems to me that the experiment was just that—an experiment. We will never know what the true purpose of this experiment was. The purpose of the last experiment in the series was most likely the actual transport of the ship, a possibility the Navy might have learned of through earlier tests. But originally they were looking for radar invisibility or a magnetic torpedo/mine shield. The War was going to be won on the sea and thus the opportunistic Navy exploited Einstein's misgivings about the rise of Nazi Germany to persuade him to assist the U.S. government in developing a passive protection device. In the process they found incredible mysteries regarding pulsating magnetic fields, and through the course of their experimentations, literally led themselves into matter
transport. Perhaps the most incredible coincidence is that the presumed matter transport apparently happened along a world grid line.

I can hear it now: "Philadelphia—Norfolk physical matter transport now leaving on grid line #18 at 1400 Greenwich Mean Time. Visitors please board the vehicle at this time." The answers to the many puzzles of the Philadelphia Experiment will some day be known. Or perhaps they are already known by a few. Anyway the mystique persists. The following article appeared in *The Pantagraph* on August 21, 1986, published in Bloomington - Normal, Illinois.

(Editor's Note: The Philadelphia Experiment has been a mystery for many years. We welcome the reader's comments on this subject and any new facts or speculations they might have so that this continuing enigma can finally be solved.)
LEY LINES AND
THE MEANING OF ADAM
by
Richard Leviton and Robert Coons

“As Above, So Below”—Hermes Trismegistos
Hermes' Geomancy

Looming behind all concepts of the planetary Grid stands the ancient magus, Hermes Trismegistos, Thrice-Greatest Master Geomancer of Earth, with his Smagdarine Emerald Tablets, the keys to Gaia's (Earth's) energy body. That same master Grid engineer, the Gods' messenger for Earth, later passed the flame of his mastery, for our time, to the Archangel Michael with his solar initiatory sword. Michael, say the Hebrews, is the Keeper of the Secrets of the Relations between Heaven and Earth—the nurturing bond of geomancy. The message of both Hermes and Michael to us today as neophyte Grid engineers is this: The Grid is the paramount spiritual phenomenon of Earth.

Our Ariadne’s thread out of this bewildering maze of physical life on Earth is the ley line. The rediscovery of ley lines in this century is only a fragment, however, of the eventual unveiling of the secrets of Nature. Ley lines are the luminous strands that many are pulling at today, hardly suspecting what riches lie at the end of these subtle light lines. All ley lines lead to the planetary Grid, the primary light and energy matrix, creating, enveloping, and maintaining planet Earth, our Gaia.

The Grid has been variously described by poets and clairvoyants in recent times. Ley lines are "the radial threads on a spider's web." Ley lines form the "focal points in a vast multilayered cobweb somewhat reminiscent of a micrograph of nerve cells and their ganglia" as "the circulation and nervous system of the body of earth." The Grid is "a geometrically precise web" punctuated with "Grids of Light, focal points," a "receptor web complex with nexi of entrance." The British novelist Doris Lessing writes intimately of the Grid as "the enclosing web of subtle light (that) touched the earth globe...All over the globe ran these pulses or lines" which make "a colored spinning membrane" and "a great web of patterning oscillations and quiverings." A personal acquaintance of mine in England summed it up lucidly: "I saw the Earth as a fishnet web of light lines. My body was the same, and there were lines of light radiating from the intersections of the planet's surface to link with the web network surrounding other planets."

The Hermetic Keys to the planetary Grid are inscribed on the
Messenger's mythical Emerald Tablets, which summarise the 7 Hermetic Principles underlying all manifestation. These are the keys to Hermes' Geomancy: The Principle of Mentalism (The Universe is Mental, the All is Infinite Mind, which is the fundamental reality and the womb of all universes). The Principle of Correspondence (Whatever is Below is like unto that which is Above, and whatever is Above is like that which is Below, to accomplish the miracles of The One). The Principle of Vibration (Nothing rests; everything moves and vibrates). The Principle of Polarity (Everything is dual, has poles, and pairs of opposites). The Principle of Rhythm (Everything has its tides, its rise and fall, its equal pendulum swings to the right and left, its peaks and troughs). The Principle of Causation (Every effect has its Cause, every Cause has its Effect, all proceeding by Law, never by chance). The Principle of Gender (Everything has its "masculine" and "feminine" aspects).  

Experiential knowledge of Hermes' principles through meditative interfacing with the Earth Grid leads us into the secrets of geomancy. The Grid is not something out there, away from us, safely, abstractly separate from our daily lives. Our molecular bodies and human consciousness as we walk on Earth live within the Grid. The Grid is like a unified tuning fork vibrating with our Light/Life/Electromagnetic spectrum for Earth as we receive it daily from our specific Star Evolution paradigm, the Sun, the astrophysical center of our local solar system Grid. Our King Sun is an evolving star, and our lives as humans on Earth are breathed within the Grid-mediated parameters of "His" body, our familiar solar system.

The Grid is the forgotten nexus between humankind, as embodied, Earth-walking consciousness, and the starry heavens. The Grid is the spiritual link for the blending of cosmic and terrestrial energies in the consciousness experiment known as Humanity; it is the pervasive means for the harmonious fusion of the energies of the solar system in human consciousness. The Grid actually predates physical Earth and is more like Mother Gaia's exterior skeletal energy structure, her prototypical design and predetermined matrix of energy and light from which her physical body was manifested. Our relations as embodied humans with the Star Evolution we call the Sun is mediated through the Grid enveloping Earth.

The key word here is homologous. The human body is conical, rectangular, while the Earth's body is spherical; yet Hermes speaks truthfully when he says, As Above, So Below. What exists in Heaven is embodied on Earth and in the Human but in specific manners appropriate to the morphology. This is
the meaning of "equal Logos" (homo-logous), i.e., the same Word. Just as the human has an intricate subway system of acupuncture meridians, carrying chi, the life force, so has the Earth a myriad weblike matrix of ley lines and focal points.

Geomancy and somamancy are two more pivotal Grid-explicating words. **Geomancy** initially means "divination of the Earth's secrets" (From the Greek, Gaia-mantos), but after a meditative experience with the planetary Grid, the word emerges for us into its larger meaning as "divinization of the Earth," because positive, loving human consciousness interfacing with the Heaven-bestowed Grid completes its intended divinization process. **Somamancy** (Greek: body-mantos) is the equivalent word operating in the human dimension. As we breathe meditatively with Love from Above, which is the fundamental energy behind light and matter, at focal points on the Grid, not only do we bring the Earth's light lines into clarity, we manifest our own inherent divinity, perceive our own bodily ley lines, and come to embody, knowingly, somantically, this inseverable nexus between the Earth, cosmos, and human. Another name for this nexus is the Grid. Thus geomancy and somamancy are two sides of the same coin. When we harmonise and enlighten geo, we do reciprocally the same for soma.

Eastern esoteric yoga informs us that the human has not only the apparent physical body, but a series of overlapping, multidimensional bodies which form a kind of Jacob's Ladder away from the familiar body of bones and flesh into the Body of Light. These bodies are variously described according to different traditions, but essentially they include the etheric/electromagnetic body (seat of the meridians and chakras), the emotional body (or astral body, the basic formative dimension for emotions as polarised expressions), the mental body (the sphere of abstract knowledge and concrete thinking, the realm of Forms), and the causal body (seat of the Soul, the timeless, spiritualized agent behind sequential human incarnations).

These 5 Bodies form an interpenetrating consciousness grid, like a series of Chinese boxes, or like the layers of an onion, with always another inside. The Earth, similarly, has this multidimensional overlay of grid bodies. This convenient, linear abstraction of what is indivisible, whole, simultaneous, and synchronous, is nonetheless useful as a model in explaining the different functional aspects of the planetary Grid. Thus we begin with an examination of Gaia's 5 Grid Bodies.

Human Acupuncture Chart Showing Meridians and Points

(From: Acupuncture, Marc Duke, Pyramid House, New York, 1972, p. 127)
The Electromagnetic 1746 Grid

This grid, the first dimensional expression away from the physical Earth, is the foundation of the material Earth and what Ecclesiastes called "the Golden Bowl." It is an etheric energy duplicate, though more subtle, of the physical, whether human or planetary, and it is here that most contemporary geomancers, dowsers, and ley hunters are conducting their investigations. This body vitalises and energises the physical. It is the clearinghouse for all in-coming energy fields and transmits them intelligently to the organic body matrices (organs or power points). It is the channel for physically-focussed consciousnes to register the subtle worlds of energy and influence.

Through the electromagnetic body course the acupuncture meridians, the yin (negative, feminine) and yang (positive, masculine) polarised channels for the "two breaths of ch'i," the pervasive life energy, as catalogued by the ancient Chinese. These meridians traverse the physical Earth and human body in an intricate though rationally precise matrix, visually resembling something like the New York City subway system at its most obtuse (Diagram 1). Acupuncturists speak of 10 organ-related (and 2 affiliate) channels, 15 Luo that connect these major meridians, the 8 Strange Flow channels, the 12 muscle meridians—such that as many as 59 "rivers of ch'i" are documented in advanced Chinese medical texts, with a minimum of 365 treatment points (or subway stops) but with up to 1000 points potentially available and sometimes used.

Correspondingly the venerable Chinese geomancers, practing feng shui, the elusive landscape science of "wind and water", delineated the terrestrial lung mei ("dragon paths" or ley lines) which flowed either as a white yang tiger in the high mountains or as a yin blue dragon in the low hills and valleys. Where the two lung mei (the "two breaths of ch'i") met and became one, this was a power point node, full of ch'i and suitable for a royal grave or temple. The masters of feng shui then intelligently placed their acupuncture "needles of stone" at these key power fusion points to clarify, harmonise, energise, and distribute the terrestrial ch'i in the Grid in accordance with daily, weekly, monthly, seasonal, and yearly calendars—which is precisely what the acupuncturist does with her assortment of tiny needles and treatment maps of the human body.

This is our conceptual background for entering the Electromagnetic 1746 Grid. The first key aspect of this grid is
the treatment nodes, or power points, in the meridian system. These have been variously described by "Earth Mysteries" writers as energy cells, coordination points, exit points, energy vortices, time portals, subtle digestive systems. A more accurate name is domes because this clearly, though controversially, reflects the origin and purpose of these landscape energy centers.

There is on the Earth, state proponents of the Dome theory, a system of dome centers, or etheric energy canopies, occupying the space over sacred enclosures (creating them, in fact), from which extend numerous short-distance straight-running and spiralling dome lines of light radiating out over the landscape. The dome lines link the dome centers with each other in a subtle communications grid. The subtle landscape is characterized as an intricate pattern of spirals, straight lines, and pulsing circles of light, like a couple thousand blinking thimbles of multihued Light dotting the Earth in a geometric web of ribbony filaments flowing outwards in all directions. The Domes made the etheric structure of Earth what it is by imposing a conscious matrix upon the planet to make Earth a place for possible human conscious evolution.

According to Dome theory, when the Domes appeared on Earth they activated lines of light and energy already present in the etheric skeletal web of the planet. The Domes were Ships brought here as a response from what is called the Architect of Cosmic Destiny and in line with past proposals and future events for Earth. Technically, it's not accurate to say the Domes came and went because they exist spatially in between spirit and matter. However, they were present on Earth three times in planetary history. It is also not accurate to construe the Domes as mechanical material vehicles according to our customary understanding; they are more like transdimensional magnetic/energy facilitators overlaid on the physical landscape. In the first Dome Presence, there were no humans on Earth; in the second Dome Presence there was primitive human life; and during the third Dome Presence there were some humans who could clearly see the Domes and understand their function. What these early humans saw is recounted in various ancient mythologies (notably the Irish and Sumerian) as the Houses of the Sky Gods.

When the Domes were present, which by our reckoning, was for a very long time, they imparted immediate energy/consciousness imprints (1/4 to 1 mile in diameter) on the Earth's surface. These were permanent resonance patterns shaped like domes (or like lampshades set over hills and
mountains). This is an oscillating pattern which will persist until the Earth ceases to exist or until they are reaffirmed or altered by another Dome visit. Although clairvoyants today describe these etheric energy canopies resident over many hundreds of sacred mountains and past megalithic religious enclosures (e.g., Stonehenge, Machu Picchu, Palenque, Mt. Shasta, among many examples), these are actually etheric energy memories of the once quasi-materially present Domes. Though the Domes have "left", their powerful electromagnetic energy impressions remain in place, like the persistent retinal image of a light bulb held in front of our eyes in a dark room. The simultaneous presence and nonpresence of these Domes is a paradox of energy as created by the inadequacies of our language.

Morphologically, however, the Domes were of varying sizes, capacities, and functions, arranged around the planet in a predetermined, numerically-fixed matrix according to star formations above. Their precise distribution patterning on Earth was a microcosmic reflection of esoteric macrocosmic star geometries. The "Captain" Domes, for example, distributed Love, Light, and Energy to the smaller Domes. The overriding intention of the Domes was to bring Earth to biological, sentient life. Even today, millions of years later, etheric traces of their silvery energy pipework (different from ley or dome lines)are still clairvoyantly visible on the landscape in such geomantically heightened places as Glastonbury, England. Visually, we can imagine nearly 2000 huge spherical, kinetic lampshades simultaneously descending like twinkling party hats over mountains, hills, and plateaus around the world, fitting down snugly and brightly, electrifying the Earth with their incredibly brilliant light and distributing this light through a spinning pin wheel matrix of Dome centers.

The Domes were the originating homes of ley lines, or more accurately, within this conceptual model, the dome lines. These exist in two forms. Straight-running dome lines (averaging in length 5-30 miles) are lines of energy connecting one dome with another making an angular light matrix around the planet. An example of this pattern is found in California with Mt. Diablo (Contra Costa County) and Mt. Tamalpais (Marin County); both of these sacred mountains (as the native Indians originally perceived them), are just outside San Francisco, domed, about 25 miles apart, and are connected by a straight dome line. The dome lines, incidentally, are pulsating energy channels with marked variations in seasonal intensity.

Each Dome had the capacity to initiate up to 48 affiliate
Diagram 2

Engineering Model for Domes and Dome Lines

Key:
A = Dome Cap, one of 48 potential terminating points
B = Spiralling dome line from Dome, creating dome cap
C = Dome
D = Straight-running dome line, connecting Domes
E = Line Node, from dome line or Oroboros Line intersection
F = Oroboros Grid Line
energy centers, or smaller domes, through a series of spiralling dome lines with a smaller dome cap at the end. These became affiliate, spiritualized power points in the landscape, but directly related, like child to parent, with the initiating Dome. Potentially there are 83,808 such dome caps on Earth, a figure that amply explains the near planetary ubiquity of ancient religious sites. The specific radiating pattern for the spiralling dome lines was heliocentric, according to the phi ratio (or Golden Mean, Golden Proportion, Golden Section of sacred geometry, expressed as 1.618034, which is an asymmetrical spiral exemplified in the patterning whorls of the sunflower and the leaf distribution pattern for many plants and described as the Fibonacci Series). For example, Mt. Tamalpais sends out at least two dome caps into urban San Francisco, spiritually energizing the areas of the Palace of Fine Arts and Lincoln Park. The Dome at Mt. Diablo similarly sends dome caps into what are now urban Oakland and Berkeley.

Moreover, whenever any spiral or straight dome lines intersect, they form minor power points called line nodes (Diagram 2). These are copious, far more so than the considerably abundant dome caps, and are characterized as variously solar/positive, lunar/negative, some centrifugal, some centripedal, in effect. Domes, dome caps, and line nodes were sequentially marked by ancient geomancers with stone circles, major temples, barrows and stone chambers, and single standing stones, then afterwards in the Christian ecclesiastical ascendency, by churches. The entire geomantic panoply was once positioned carefully as a set of Grid engineering instruments of spiritual science within this precise web of Domes, dome caps, and line nodes, energy remains of which are today being detected, increasingly, by Earth Mysteries researchers (e.g., the British Dragon Project, directed by Paul Devereaux, editor of The Ley Hunter). Remembered vaguely in myth, folklore, and local custom, these landscape temples, animated by Domes, linked by dome lines, may be forgotten, but they haven't been closed down.6

Furthermore, according to Dome theory, on a planetary basis all the Domes are linked by way of interwoven gold and silver lines which emanate like cords from their crowns, and these are joined together at one specific planetary node which is the Grid's umbilicus and Master Dome. The gold and silver cords represent the balanced energy inputs of positive/negative, or male/female entering each Dome. In popular mythology, this umbilical point is called King Arthur's Round Table of Camelot. The Domes were brought to Earth to create a Paradise for
humankind. Each carried a light form, or seed crystal, of what was to be, both locally and globally, through the Grid. Of these Paradise crystals, some have been activated, but otherwise humankind has either not been aware of this divine potential or not bothered to make use of them to create the intended Earth Paradise. The option, however, still remains.

Because of their heightened electromagnetic fields, the Dome enclosures were like immaculate, high consciousness meditation halls where human awareness could be healed, uplifted, even interdimensionally transported through the domed exit points in the Houses of the Gods, facilitated by megalithic engineering. The Irish Brugh na Boinne (the House by the River Boyne) known today as the Newgrange tumulus, was the home of the Tuatha de Danann, the Irish deities, and often visited by intrepid humans seeking an audience with their Gods.

The domed coordination points in some cases contain psychic maps to the local esoteric geography. "These maps are used to provide points of resonance, release, and deflection " and include details of the local layout of Domes, dome caps, line nodes, and dome lines and their energy/consciousness ratings. The Domes facilitate meditatively-acquired insight into the planetary thought matrix (what Teilhard de Chardin calls the "noosphere") which is present like a hologrammic library in the energy field of each Dome. This is why the Biblical Moses received the Pentateuch, or Torah Or, on Mt. Sinai, which was a pre-eminent sacred domed mountain. Furthermore, true to Hermes' Principle of Correspondence, and in a process of reciprocal inevitability, when the Domes arrived, their terrific heat brought up a dome of water from underground, with its multidirectional web of water veins, both to cool the searing Earth and to mirror the Light Dome above. Thus, even today, there are yang/centrifugal light lines and domes above ground, and yin/centripedal water lines and domes underground, etheric above, physical below. This is behind the phenomenon, constantly reported by dowsers of anomalous, copious water networks coincident with sacred enclosures.

Thus the Domes, metaphysically speaking, distributed the vibrations of Love and Light from Above through this imposed Grid system, thereby spiritually irradiating the landscape and, by extension, human consciousness, with these positive', evolutionary energies. This is the key: Before Adam, the Elohim. The meaning of this gnomic statement will emerge as we move through the Grid. However, the doorway for this key is expressed in a single number, i.e., the number of planetary

   der Marck Editions, New York, 1986, p. 65)
Domes: **1746.** In the mystical science of Qabala and its mathematical language of gematria, this is a number of profound significance, for it is the fusion of the primary solar (666) and lunar (1080) the bipolar energies behind manifestation. In Qabala symbolism 1746 is the "grain of mustard seed" which the Christ likened to the Kingdom of Heaven; it is also, symbolically, the Divine Man, the Spirit of God on Earth, the Mysteries of Jesus, the Divinity of the Spirit, and others of similar import.

The second key aspect of the Electromagnetic 1746 Grid is **chakras.** According to esoteric Hindu yoga, in the human etheric body there are 7 major subtle energy centers called chakras (Sanskrit for "spinning wheels") ranged linearly along the vertical spinal axis from the scrotum to the crown of the head. There are anywhere from 7 to 22 minor chakras as well, distributed throughout the body. The major chakras are like electrical junction boxes, or energy transducers, for the physical body, mediating higher plane energies through the material form. The chakras are functionally affiliated with the 7 principal endocrine glands and thereby with specific organ regions of the body and with specific ascending consciousness states as well. For example, the throat chakra, called *Visuddha* (meaning "cleansed, clarified, perfectly pure.") is related to the thyroid gland and the mastery of clairaudience (intangible hearing, as in the "voices" of the Gods; see Diagram 3). The 7 chakras are energetically interdependent and activated sequentially, beginning with the 2nd, proceeding to the 7th, then returning to the 1st, the Root, the seat of *Kundalini*, the fundamental creative cosmic evolutionary energy.

Similarly in this model, the Earth, homologously, has a chakra system, arranged not in anatomical but energy sequence at 7 key Dome centers (Diagram 4). An **Earth chakra,** such as at the Great Pyramid of Giza, Egypt, or at Glastonbury Tor, England, is a huge energy vortex, several miles in immediate diameter (and extending much further in area of influence), like a two-way swinging Grid door. It is a subtle electromagnetic interface between higher, nonphysical stellar energies and the material embodiment of them in the Earth or human body. An Earth chakra may be pictured like this: Picture tiny flowers all over the Earth. Some form larger flowers and some of these form even larger flowers. Chakras are energy in one form flowing into another, like flowers opening as parts of another flower, each independent yet interdependent, similar yet dissimilar. Alternately, we can visualise a mighty wheel with many spokes. At each spoke there is a point of light. The wheel

Major chakras
Minor chakras
has a hub and each spoke has two ends. Each spoke is connected to the hub and to the wheel. The center of the hub is connected to neither the spokes nor the wheel; it is the still center. The wheel turns into the head of a white opened dandelion—this is the Earth. The spokes leave from every direction from the hub and the patterns of light emerge on the surface and extend beyond it. These points at the end of each spoke are the flowers, or nodes, or energy centers called chakras.

Curiously, the geographical arrangement of the planetary chakra system is not immutable, although the changes occur very slowly and according to a predetermined plan, like a preset timer. The 2nd chakra, for example, now at Machu Picchu, Peru, was formerly at Delphi, Greece, site of the famous oracle; Mt. Kailas in Tibet was once Earth's 4th, or heart chakra, but this has since been "moved" to Glastonbury in England. The activation, operation, and cessation of planetary chakras, as well as dome centers, was originally calibrated for a definite time/evolutionary sequence based on a fundamental clairvoyant understanding of the vast reaches of planetary destiny. The 6th chakra, (the Brow, or Ajna, discussed below) changes focus every 200 years and is called the Mobile Focus; it operates like a consciousness beam moving purposefully over the planet according to a pre-arranged schedule of activations. Presently it is focussed on Glastonbury, but at one time in its long eventful history, it was resident in Jerusalem.

Although the Domes have, technically, paradoxically, left, they are still resident as powerful energy imprints, as the Mothers of all sacred Earth enclosures. The Electromagnetic 1746 Grid, furthermore, is still operational, though at a somewhat reduced Light intensity compared to what it would be like if the Domes were materially present again. Gaia's etheric energy body remains sentiently active, just as Her living physical form breathes through its biosphere. This level of the Grid can be likened to a radio carrying the whole range of frequency transmission capabilities. The various parts of the radio band are assigned to the Dome receptor matrix, which are like individual antenna or radio towers. This is a system of Grid sonics, of tone modulations. The various Dome centers are energised as sonic receptor sites according to a graduated dial of master transmissions'. In many cases stone devices, electromagnetically-adjusted, were positioned at the Dome antenna sites to facilitate sonic reception. Not only were the Dome sites, according to this theory, calibrated planetarily in terms of radio beam receptivity, they were also calibrated in terms of a master electromagnetic spectrum geared to the
consciousness and life support needs of humans and biosphere. Each Dome was like a specially-set tuning fork; when struck by the incoming beam it then resonated this tone through its local web system as a uniform vibration.

In recent years, many believe, the Grid has been undergoing a gradual, site-specific reactivation by the same agencies, the Elohim, that originally engineered and installed the system in accordance with Hermes’ Principles. The Earth was made as a Home in Man’s image. The Electromagnetic 1746 Grid anchors and differentiates the next dimensional Grid matrix called the Oroboric 15 Line Grid, which forms and maintains the biosphere and makes these higher energies available for human consciousness and technology interactions and for mutually-supportive human and Earth evolution.

The Earth is enveloped in a lace doily of electromagnetic fields and pulsing points of light which move the incoming intelligent cosmic/stellar energy streams through the matrix, always tending towards balance. The role of the geomancer, intelligently manipulating and cooperating with the Electromagnetic 1746 Grid, has been to harmonise these incoming streams against the chaotic entropic energy fields created by negative thought forms of resident humans, and to maintain the health of both human and Gaia. The geomancer has always been the Earth doctor and human metaphysician.

The Oroboric 15 Line Grid

The ancient Chinese geomancers had a comprehensive understanding of the manifold harmonious relations between Heaven, Earth, and the Human. They stated there was first the Wu Chi, the one primal vibration or Cosmic Sound (called OM in Sanskrit, the Logos in original Christianity) that differentiates into the Tai Chi, or Two Tones (yin/yang polarity), which then manifests as the 12 Tones, the Lu. The 12 Lu are the 12 fundamental pitches within the octave, related to each other by specific ratios. In the West this twelvefold differentiation of the octave is known as the Zodiac; this is another topology of the basic cosmic modulations of celestial harmonics. Moreover, the Chinese stated that the vibratory modulations influence Earth in a regular oscillation according to hourly, semi-daily, daily, weekly, biweekly, monthly, seasonal, yearly, and meta-annual cycles, all catalogued in astronomical/astrological tables. The geomantic year was apportioned into 12 Notes, 6 yin, 6 yang, each assigned to one of the 5 Elements (wood, fire, metal, water, soil).
Meanwhile the acupuncturists had charted the 12 primary energy meridians in the human body, assigning to each a yin/yang polarity (e.g., Absolute Yin, Lesser Yang), an organ (e.g., spleen, heart, liver, lungs), an element (e.g., Heart/fire, Liver/Wood, Kidneys/water), and a yearly-daily time of heightened activity, propitious for treatment (e.g., Heart/Summer/Noon-2 p.m.). And they tied the system conceptually together with a set of 4 Laws of Ch'i, which basically operate in alignment with Hermes' Principle of Rhythm, including Mother-Son, Husband-Wife, Noon-Midnight, and the 5 Elements. These govern and describe the oscillating energy movements in both the human and Earth meridians (Diagram 5).

In the West the twelvefold permutations of the One energy were catalogued in terms of our familiar Zodiacal attributions (e.g., Sagittarius/fire, Taurus/earth, Gemini/air), each "ruled" by a planet (e.g., Venus rules Taurus, Mercury rules Gemini), and associated with particular body regions (e.g., Taurus with the throat, Gemini with the ears, arms, hands, chest, lungs, and Sagittarius with hips and thighs). In mythology this circuit of 12 has found expression in the image of King Arthur's Round Table of Grail Knights, each Knight representing one station of this spinning Zodiac House.

The Chinese acupuncturists further discovered that in addition to the 10 organ-related meridians and their two affiliate channels (Heart Governor/yin and Three Heater/yang), there were two additional regulatory channels, namely, the Governing Vessel (yang/solar/front of the body/directing) and the Conception Vessel (yin/lunar/back of the body/responding). Meanwhile the Indian yogis had described the three (related) subtle nadis, or channels of Kundalini through the chakras. These are the pingala nadi (solar/right side), ida nadi (lunar/left side), and sushumna nadi (neutral/central fusion pathway; see Diagram 3). The pingala carries the Fire of Matter; the ida channels the Fire of Manas; and through the sushumna courses the Fire of Spirit—from the Root to the Crown chakra, according to the evolutionary sequence of chakra awakenings. For the purposes of this model, we will consider the pingala nadi and Governing Vessel meridian to be homologous and the ida pingala and Conception Vessel to be similarly related.

This is all necessary conceptual foundation for appreciating the Oroboric 15 Line Grid. This is Gaia's emotional body, Her interactive sphere of formation for the biosphere which is the matrix for all life on Earth. This Grid makes differentiated
Diagram 5
A Human-Earth Oroboros Line

(From: *Acupuncture*, Michio Kushi, East West Foundation, Boston, MA, 1973, p. 11)
sensation possible (expressed as emotions, ruled, as described in astrology, by the planets and stars "in their courses"), and is the bridge between Mind and physical matter.

The Oroboric Grid, with its balanced Tai Ch'i of, alternatingly, 6 yin and 6 yang lines, is the foundation for the magnetic polarities of the Electromagnetic 1746 Grid and thereby for physical Earth. Magnetic energy, with its north/south poles operating in a charged biofield about matter, is concerned with establishing polarity or the balancing of the energy flow between two defined points. "Without magnetics there would be nothing to hold the universe together for it...contains the flow of vibrations back and forth within the theoretical limits of this universe." 8

Thus the Oroboric Grid is comprised of 15 Earth-traversing Dragon Lines, broad avenues of solar-differentiated Light, that, like the mythic Oroboros serpent, link their tails with their mouths, making a complete energy circuit, or Great Circle, about the planet. These are not radiations from the Domes or dome caps, like dome lines, though they do intersect and interact with Domes and dome caps (See Diagram 2). Nor do these Oroboros Lines oscillate but they are, rather, consistent lines of energy surrounding the planet and containing the organic film of Earth life. They run somewhat above the Earth's surface, often parallel with the straight-running dome lines. Twelve major Oroboros Lines encircle the globe making 12 Great Circles; each has a different solar energy, ordinarily denominated by the 12 Zodiacal attributes (e.g., a Taurus Oroboros Line). There are three minor lines, ordinarily denominated by the qualities of male, female, and neutral. Basically the 12 Oroboros Lines correlate with the 12 Chinese Lu and 12 organ meridians, while the 3 minor Oroboros Lines correspond with the 3 nadis (and Governing/Conception Vessels).

The Great Circles each have different and varying levels of vibration, or color, but they do not involve all the colors of the spectrum. Gold is a principal color while lilac is found on occasion. The Oroboros Lines are primary energy tracks. After the birth of a biological being, such as Gaia, the primary energy lines determine the nature of its growth and environment, i.e., the biosphere. We can visualise a sphere with 15 golden, white, and lilac lines encircling it at geometric intervals, making a total of 62 points of intersection and 120 equal-sized triangles. Within each of these intersections is a positive and negative line running across the surface. These two are represented by pale blue lines which form the recessed side of
the 120 triangles. The forward lines of these triangles are golden or white, and the positive/negative lines are not fixed but oscillate in a rhythmic pattern. This overall Oroboric figure incorporates the dodecahedron and icosahedron, two of the Platonic Solids (described below) forming the biosphere; in fact, the form for Earth is a combination of all 5 Platonic Solids (abstract forms of the 5 elements, which form the next dimensional Grid). This is the energy lattice covering the Earth; it is what produced Earth's environmental structure.

A well-known example of an Oroboros Line is the St. Michael Dragon Ley in England. Dowsers trace its course for 380 miles, extending from southwest Cornwall at Michael's Mount (at 62 degrees East of North, aligned with the May 1, or Beltane, sunrise, one of the Celtic quarterly calendar days) to northeast Suffolk at Bury St. Edmunds. Along the way it is dotted with numerous eponymous Christian Church and earlier megalithic dedications. The St. Michael Oroboros Line, however, is much longer than 380 miles; nor is it the exclusive property of Michaelic Britain. It extends entirely around the planet, joining itself again after a circumferential journey of some 24,000 miles. Its width varies at different points, being at some areas as narrow as 4 feet, while at others measuring several hundred yards in width. There are actually many Grid lines above the Earth, with the final one being two miles above the ground. Oroboros meridians particularly vary in width and intensity at nodal points (Domes, dome caps, line nodes, and Oroboric intersections) and may have thousands of major and minor treatment points arrayed along their length.

There is a specific site on Earth where the Michael/solar and Oroboros/Lunar Lines actually touch down, beginning and ending their planetary circuit and consequently activating the other 12 Zodiacal Oroboros Lines. This is also the site of the Master Dome, the original Round Table of Camelot, the Zodiacal Court of the Sun. This place is Avebury Circle, in central Wiltshire, England. Avebury, according to this model, is the planetary umbilicus. Avebury is Earth's primary cosmic/electrical socket. It's where the Earth plugs into the cosmos. Avebury is Grid Central, the planetary geomantic switchboard (See Diagram 6).

Each of the Earth's 1746 Domes has two vertical light cords—one gold, one silver—rising out of its top like an insulated lampshade cord. All these dual-weaved cords are joined together into one master interwoven cable at the Avebury Master Dome.

Moreover, Avebury is, to borrow another term from esoteric
yoga, the planetary sutratma. The sutratma is the channel through which the direct stream of life from the Spirit flows through the lower spiritual bodies and Soul to the personality and physical body; it is anchored in the etheric heart chakra. The life stream controls the circulation of the human blood and the planetary ch'i. For the Earth Avebury is the inner etheric heart, called Ananda-kanda, and operates in tandem with Glastonbury, the outer etheric heart, called Anahata (See Diagram 4). The sutratma at Avebury as the planetary tie-down for the basic solar/pingala and lunar/ida Oroboros Lines is also what is known in Ecclesiastes as "the Silver Cord, the thread that binds all the selves in the human being with the divine."

Thus the primary Tai Ch'i, or energy/consciousness polarity, enters the Earth Grid through her inner heart chakra at Avebury where it is then distributed throughout the Oroboric Grid as Gaia's emotional life blood. Each Grid line, vertical and horizontal, connects with the whole pattern covering the globe. Each of the two lines entering Avebury is connected at other points with each of the other 13 Oroboros Lines. The solar Oroboros comes in as a burst of pure Spirit, fiery, almost deadly, carrying absolute, eternal consciousness; it is assigned the gematria 666 by Qabala. The lunar Oroboros is cool, moist, refreshing, like a revivifying draught, carrying incarnate consciousness, subject to temporal cycles of birth and death, time and space; it is assigned the gematria 1080.

The two energies are fused at Avebury (just as they are within the dual human heart chakra), their currents sent coursing through the Grid. The number of their fusion is 1746, which is the sum of 1080 and 666. The dynamics of their interactive fusion, as a ratio of 666/1080 is the phi spiral of unfolding Light, namely, 1.618034. This is a fact fundamental to the nature of Light (described below) and at the heart of the Grid and the Human. While the solar and lunar lines are tied down at the planetary inner heart at Avebury, the Neutral Oroboros Line (equivalent to the sushumna nadi, carrying the Fire of Spirit) is anchored at Earth's crown chakra, Mt. Cook in western New Zealand, through which the dual Avebury-originating lines pass in their Great Circles.

What is at play here is that the primary yin/yang polarity of the Oroboros 15 Line Grid produces the balanced phi-described fusion of the 1746 Electromagnetic Grid, which is to say, Light finding balanced manifestation in the Earth Body. As Doris Lessing writes, "The outer web of musical light created the inner earthy one and held it there in its dance of tension." It is
"a connecting feeding mesh (like an electric grid of humanity)"

The Oroboric 15 Line Grid is Gaia's emotional body, her personality, expressed twofold as the Zodiacal archetypes of the 12 $L_2$—and thus ours, too, as human residents upon Gaia.

This dimension of the Grid is our home on Earth such that, as Lessing says, "In the great singing dance, everything linked and moved together. My mind was the facet of a mind, like cells in a honeycomb."

Each of the Oroboros Lines was originally at some point anchored down to Earth by agency of special physical **Vibrating Stones** which came with the Domes. They were apparently material stones, as we know stones, about the size of a spherical suitcase. They were brought here by Plan of the Cosmic Chaplains and Elohim geomancers appearing here in the Domes; the stones were activated by the Domes, then positioned at key sites around the Earth to form what is called a Global Hermetic Megalithic Calendar, for the benefit of all living forms. Each Vibrating Stone had its time of significance, in accordance with all the synchronously overlapping Zodiac schedules of activity, from the 12-hour cycle to the Great Year of 25,920 years. All 12 stones resonated in harmony and in resonance with each other.

One such Vibrating Stone was placed, according to several geomancers, at Beckery Island, a small hill just outside the center of Glastonbury, Somerset, and tied down the Taurus Oroboros Line as it was intersected by the Michael/Solar Oroboros passing through the town. This particular site was also known in ancient Welsh myth as one of Britain's Three Perpetual Choirs (the Choir of Afallach, or Avalon). These were continual geomantic resonators, established on the landscape as reflections of a heavenly model related to three different aspects of consciousness translated to Earth. Activated long ago from a divine source, the Choirs were originally far more active than at present, and were related to healing. The Vibrating Stone from Beckery was subsequently removed but remains conspicuously visible though totally anomalously, elsewhere in Glastonbury. Thus in geomantic terms, the Taurus Stone was the primary receptor for the Taurean tone/vibration for the Oroboros Grid. It was the main reservoir, amplifier, disperser, and transducer/transmuter of this 1/12th differentiation of cosmic energy entering our biosphere. The 12 stones acting in concert formed the foundation of the Global Hermetic Calendar.

The central coordination point for this Global Stone Calendar of Zodiac energies is Avebury, the condensed planetary
Round Table of the Sun. The Round Table is a model for understanding the interdependent activities of the 12 Tones of the one Sound. The planetary Round Table is in effect the central receptor complex for the composite energies and consciousness of our solar system, for our particular Star Evolution paradigm of Light/Life/Consciousness whose King is our Sun.

Our solar system, ideally, is comprised of 12 revolving, rotating, inter-relating bodies (This figure includes the Sun and its reflector, the Moon, and the energy shell of the supposedly destroyed planet called Maldek or Marduk, now present as an asteroid belt between Mars and Jupiter). This was the original ideal solar octave of 12 planetary notes. Just as our Gaia is a living sentient being, so is our solar system a larger unified consciousness entity whose point of awareness is called by esotericists the Solar Logos. Each planet is directly related, in terms of "ruling" influence, to one of the 12 Zodiac Houses thereby producing a triangular pattern of influence of stars, planets, and Earth coordinates, mediated to this planet through the Oroboros Grid and Avebury Round Table of the Sun.

The planetary Round Table is the means by which Gaia can experience the differentiated energies of the Solar Logos, of which She is an integral part. The Oroboros Grid represents the 12 Knights of Gaia's Round Table, the means by which these 12 oscillating influences are distributed to Her body and eventually to the consciousness of Her human, Zodiacally-attuned residents. Gaia's Grid body is the personality of the Sun expressed twelvefold. As Above, So Below, said Hermes. We have, then, the Oroboros Grid interfacing the energy dynamics of the solar system and its organising consciousness, the Solar Logos, for embodied humanity. By meditative mastery of the Round Table we penetrate to the essence of our Star Evolution paradigm, of which we are biophysical miniatures, chemical holograms, and thus we stand on the threshold of transcendence, of attaining in consciousness that fourth dimensional quality called anti-gravity.

There are, of course, inherent limitations to our Grid conceptualizations through Zodiacal archetypes. Much of this descriptive symbolism is manmade and homocentric, and thus not necessarily truly accurate with respect to the realities of the Grid as the Elohim would describe them. From their vantage point, things are more cyclical and interdependent. It is not so much constellations and stones, but matter vibrating in synchronicity. Things are synchronously resonating in
reciprocal maintenance with each other and thus feed the Earth. The Earth reciprocally maintains this relationship of interdependence.

Each of the 12 Stones resonates at a particular frequency that is in sympathetic harmony with certain astrological constellations. The most relevant point, however, is the relationship. The Earth is an active force as well as a receptive matrix. Each celestial, terrestrial and lunar body is in sympathetic resonance, one with the other, travelling at tremendous speeds through infinite space. As we chart the Oroboros Grid, and particularly the Polyhedronic Crystal Grid (described next) we steadily approach the barrier between third and fourth dimensions, with all the inherent inadequacies and difficulties of Earth-based language and linear conceptualization.

Thus the Earth Grid at this level, through the Avebury umbilicus, is the Round Table as a planetary hologram of the energy/consciousness body of the Solar Logos. It is the receiving/transmitting device expressed at the borderline between third and fourth dimensions. In the context of the Earth we have expressed the energy realities of the Sun's Royal Court, which itself is but a component of the far larger vibrational body of the Galactic Logos. Now, the Grid contains a practical, localised feature that makes the conscious human experience with the Sun's Zodiacal Court possible.

The landscape Zodiac (discussed below) is the local, accessible hologram of the Master Round Table of Avebury and the Solar Logos, and represents an experiential workshop for aligning human with planetary, solar, galactic, and universal energy streams. We could liken the function of the landscape Zodiac (i.e., in which the energy skeletons of constellations around the ecliptic are overlaid on a 30 mile circumferential band on the Earth, as in Somerset, England, with the Glastonbury Zodiac) to that of a geomantic concert hall wherein we hear the Music of the Spheres as played by the local affiliate orchestra.

There is some classical precedent for this musical interpretation of the Grid. Pythagoras and Plato both presented Grid models couched in musical terms. Pythagoras described a Cosmic Ship of Music comprised of our planets and neighboring stars, which sailed through the Heavens emitting rhoizamata, or "rushing sounds", which we could hear when we tuned the seven-stringed lyre of ourselves (the unified chakra system) to resonate with the celestial music (accomplished or played by the Grid). Plato spoke of the Spindle of Necessity which he
envisioned as the solar system rotating about the axis of the universe. On each whorl of this Spindle sits a Siren who sings a single note. In either case the total resonance pattern, the total Sound, the complete concert, is the celestial music of our King Sun, what Doris Lessing calls "the controlling governor of them all... the majestic core of our web... the deep low organ note that underlies all being... God's singing center."

The Polyhedronic Crystal Grid

The Grid now operates in the fourth dimension as a function of crystal geometry, comprising the 5 Platonic Solids. This is Gaia's mental body, the sphere of abstract thinking and concrete knowledge, what Plato recognised as the world of Forms. Here the 15 Oroboros Grid Lines, which in the preceding Grid dimension beribbon the Earth sphere in a kinetic band of light, here are fused together into one unified polyhedron of 120 equal-sized triangles (or 10 hexagons, or 30 diamonds) with 62 intersection points. Grid mappers Bethe Hagens and William Becker call this geometrical Grid dimension the "Earth Star."

Whereas in the Oroboric Grid the 15 Great Circles collectively form and maintain the living biosphere, here in the Polyhedronic Crystal Grid the 5 elements (which are differentiated out in the Oroboros Lines, e.g., Taurus/earth, Gemini/air, Sagittarius/fire), exist in their abstract, more static, crystalline form, as Platonic Solids (e.g., fire/tetrahedron, earth/cube, air/octahedron, water/icosahedron, ether/dodecahedron). The Earth Crystal is the formative agent for the kinetic Oroboros Lines, which represent, in a sense, the elements in motion, manifesting the biosphere. We can visualise the Polyhedron as a multifaceted etheric crystal superimposed over the Earth, like an overcoat, or like a geometric padded hatbox for a most delicate and flowery headpiece. Here the 5 Platonic Solids (as the abstract form of the elements) form a unified etheric crystal, with all the predictable geometrical/consciousness/formative properties of the crystal---such as the containment and patterning of Light.

We can better appreciate how the Earth Polyhedron functions by reviewing the properties of crystals. Crystals are rightly called "windows of Light," as patterning and dimensional-transmitting doorways from the kinetic world of Light radiation down through the more apparently static material world of form—and the reverse. Crystals can amplify
and project thought forms; facilitate interdimensional communication; operate as tuning forks at specific frequencies to key individuals and their environments to desired light harmonics; receive and transmit high energy inputs; maintain unified electromagnetic fields to provide balance and harmony; serve as cosmic batteries, storing and releasing energy on schedule; function as archetypal libraries, holding messages, codes, histories, schedules; work as light modulators; or act as psychic binoculars and telescopes seeing over great time/space distances. These are documented applications of material plane crystals but their enumeration helps us understand the geometry of consciousness and Light at play in this more abstract Grid dimension.

Physical life on Earth is an oscillating dance of the 5 elements, as orchestrated to us through successively more material Grid interfaces, and as played for us by the symphonic interactions of the 11 planets (minus Earth), the 12 Zodiac Houses, and other influential star families (e.g., Sirius, Orion, Arcturus, among others ). The Earth in its higher mental body manifestation is a crystal receptor floating in space, moving through the harmonic web of the stellar Grid, itself a vast unified crystal-polyhedron. We move with the Earth as a facet in the life and being of our King Sun, our Solar Logos, whose body is our solar system, source of our Light, Life, and Consciousness.

We live, through these interpenetrating Grid dimensions, the stellar evolutionary life of our Sun in concert with his (once) 11 satellite planets, his Knights (now minus Maldek) and eclipically-neighboring Zodiac. We are all on the same solar wave-length as mediated through the Polyhedronic Crystal Grid. "Every star evolution is on a valency of Light which determines its own evolutionary program," writes J. J. Hurtak. This represents our Solar Fishnet, the specific conditions of Light, Life, and Consciousness that constitute our home in the solar system.

The fundamental Round Table of the Sun, of which planet Earth is a valiant Knight, is marked by the projected ecliptic our Earth makes through the 12 Houses of the Zodiac (or the apparent path the Sun takes) during a 12 month cycle; it is also described by the Sun's own ecliptic peregrination in 2160 year spurts (following the Precession of the Equinoxes) through these same constellations. Just as the Earth is visualised as this rotating, revolving crystalline receptor, wired for sound to the other planets and stars, dancing to the fivefold tune within the context of the evolutionary possibilities of this single Sun.
system and on the specific dance floor of planet Earth, so, too, is the local solar system a unified, evolving Being functioning within its own Light/Life/Consciousness paradigm within a larger controlling body.

The Sun and the totality of the solar system, when seen from a distance, free of time and space limitations, is a Light Crystal with interpenetrating Grids, surrounding each planet and linking them in a solar web. This is really a question of fundamental limitations. "Man is chained to his geomagnetic cycles," says Hurtak, living in "planetary bondage to its own Light field" or "solar magnetic field paradigm", operating under "the ancient astrophysical status of Light upon Earth." Humans exist on Earth, adds Doris Lessing, within their "terrible bondage, the chains of necessity that grasped them... This web was an iron, a frightful necessity, imposing its design." Our electromagnetic spectrum, dispensed by the Sun and mediated through the Polyhedronic Crystal Grid, is both our familiar home and our frightful jail, depending on our orientation. Gravity holds us rooted to the material Earth and the solar winds blow hard to keep us strapped to the Earth's surface and within Her electromagnetic field. However, at the doorway of the Polyhedron, the place where our evolutionary Light paradigm for Humanity on Earth is molded and transmitted, we have the possibility of lifting off in a rush of anti-gravity.

The Earth Grid represents the geometry of consciousness, the constraints on awareness and fourth dimensional transcendence, our biochemical/evolutionary parameters of expression. The crystalline Star Grid, of which our Earth is a component, is the form-dynamics of our local Star Evolution program, namely, the restrictions on consciousness, or that which upholds what Hurtak calls "the bioconsciousness of the old planetary cycles", or that which maintains "the electromagnetic ordering of the life code." Our interpenetrating Grid system is like a huge solar DNA hologram enveloping, infiltrating, and living us inescapably. It is a particular electromagnetic domain, or frequency/life spectrum, which is a partial expression (tailored for Earth, just as Venus and Mars have their own Grid realities) of the unified Star Evolution Grid, itself but a cosmic DNA hologram of a larger harmonic being. So here we live, as humans on Earth, breathing within and as sentient facets of this resonating matrix. It fits like a primary tuning fork over our noosphere and biosphere such that not one atom or electron or speeding quark escapes its dominant resonance.

Yet this same Crystal Grid represents the possible Grid
Doors out of this Sun-imposed paradigm. It holds the key to anti-gravity; here the stellar Grid restrictions can be transcended, here human consciousness can depart the solar system, soaring off the Earth in a burst of Light into the fourth and fifth dimensions. This is freedom from gravity, which is none other than the *weight* of the mind/body/emotions bounded by the linear time/space fishnet of the Grid. Anti-gravity, as we will see below, is fundamentally a consciousness technology, a transcending mastery of the Grid. Our stellar Grid, after all, is only one of billions of such star evolution crystal grids glittering in what Hurtak calls "the Sea of Crystal", which is our Milky Way seen through mystic eyes. Star systems now are seen as individual, interdependent, inter-resonating geometric harmonic Grids of Light.

Thus the Polyhedronic Grid is like a central distribution warehouse for a supermarket chain. Here all the groceries and produce are received and parcelled out, first for the regional distributors, then the individual units. The Platonic Solids, in this model, receive the abstract energy impulses, or bulk shipments, from the Zodiac Houses, other stars and planets, then parcel them out down through the succeeding 3 Grids to the physical Earth and our daily lives as Grid consumers—all in accordance with the inherent geometric/elemental design.

Here is an example of how this system works. Recently at the moment of the lunar eclipse and full Moon of Libra 1986, the Earth tetrahedron received a major solar activation. The 5 Platonic Solids form what is in truth an indivisible whole; but for the purpose of this illustration, let us envision the tetrahedron alone, as a 3-sided pyramid within a basketball, but with the corners protruding like big toes from old socks. From the apex of the pyramid/tetrahedron, rises a spiralling cone extending far into space, into the starfields. At the moment of activation, first the cone, then the pyramid, blushed an effulgent gold throughout. Momentarily the tetrahedron was radiant and vibrationally jubilant with powerful solar energy amidst the other Solids which formed a clear quartz crystal. Obviously, shortly afterwards the fire-energized pyramid began diffusing its new energies throughout the unified polyhedron. The planetary positioning point (apex up) for this now golden tetrahedron within the Polyhedronic Crystal Grid overlap on Earth is Richland-Balsam Mt. (or The Balsam; or Mt. Balsam Cone; current elevation 6500 feet, ancient elevation 6666 feet) in Western North Carolina, 20 miles south of Waynesville, just off the Blue Ridge Parkway (heading "north").

The Earth Crystal, then, is "wired for sound" with the other
interior crystal organs of the Sun system by way of the Stellar Grid. The Stellar Grid is structured differently than the various Earth Grids. When we visualize a geodesic or other multi-faceted rhomboid solid, we see subtle lines of energy passing from one plane of experience or existence to a similar plane or facet in a rhomboid at another dimension. This is the Stellar/Earth Grid connection. It is linked with forces of an etheric nature. The Stellar Grid may be visualized from Earth as a lace curtain or pattern of interconnected snowflakes stretching across the entire night sky.

The Soul of Gaia

In the theory of Earth's higher bodies, this is Gaia's causal body, the inner Temple of Solomon, the Soul of our sentient planet. This is the prime consciousness Grid for Gaia, centered in a quasi-physical, quasi-etheric domain roughly coordinated topographically with the Kun Lun Mountains and Gobi/Lob Nor Deserts of Mongolia/Northern China. Like the brow chakra of the human, which is the seat of clairvoyance, the Soul of Gaia is an interdimensional realm, essentially hidden and mostly intangible. It can be physically entered, however, occasionally by human adepts or somewhat more easily in the visionary body, through various meditative/geomantic doorways around the Earth.

At this level we encounter the Planetary Logos called Sanat Kumara (The One Initiator) who presides over Earth's inner life as the Soul, mediating through the brow chakra the "Word of God" to the physical Being of Gaia (See Diagram 4). Through the activated brow chakra, one comes to know one's true divine identity and life purpose. This is echoed Biblically in St. John's Revelation where he describes the 144,000 Children of Israel on Mt. Zion, standing with the Lamb (Christ), each with the Name of God written on their foreheads (in their brow chakra). In our time, planetarily, the Soul of Gaia operates by means of the Mobile Focus. This consciousness beam contains the inner Soul awareness and evolutionary program for Gaia and all her residents and is usually mediated to the physical plane through the four succeeding Grids. However, in our special historical moment, the Mobile Focus is coming through the planet's outer heart chakra at Glastonbury.

The Mobile Focus is continually moving, travelling over the Earth's surface with no permanently fixed location. Theoretically it is fully resident in one locality for about 100 years but with an overspill of energy before and afterwards of 50 years each, making 200 years total presence in one locale.
The Mobile Focus, it is believed, was once resident at Jerusalem and Mt. Kailas, but in the course of Earth history, obviously it has been many places.

The Focus operates by means of a predetermined evolutionary activation mechanism. If we wind up a clock, it then proceeds through its mechanism to tell time. As the Domes supposedly came three times, they preprogrammed the matrix of energy lines over Earth to coincide with certain planetary and constellationary exactitudes existing in the far future. The action of the Mobile Focus is much like the effect a living Master, like the 14th Dalai Lama, for example, can have on a receptive human. We can experience a profound change in our consciousness just by sitting in the presence of such a Master, but only to the degree of our receptivity to his/her heightened pure vibrations. The Mobile Focus, as a geomantic Living Master for Gaia, has been moved, therefore, in accordance with a Master Plan, a vast far-seeing tablet of planetary destiny, over Earth's surface, to resonate equally at each culture, for each creed, for 200 year periods—facilitating the implementation of Gaia's Soul programs into the physical domain of human culture.

The Mobile Focus, in this model, is an initiatory energy beam designed by Adepts under guidance of the Elohim, for the transfiguration of consciousness from the human plane to one of angelic resonance. It is like a powerful spotlight of color/sound/vibration/energy shone steadily over a specific region (e.g., a Dome center). It has as its agenda the uplifting of human awareness into knowledge of the Master Plan and that particular bioregion's role in achieving this total Plan for Earth. Here we listen to Gaia's Soul telling Her (and us) the reason and purpose for our existence as an inhabited planet. Here we listen to the wise voice of Her Planetary Logos, Sanat Kumara, as He imparts spiritual qualities through the Grid matrix. Thus we begin to understand why things are precisely the way they are on the physical plane, according to Hermes' Principle of Causation. We begin to appreciate that Gaia's karma is largely the result of our ill-informed actions over the millennia. Indeed, when Gaia is appreciated as a sentient, coherent, living Being, then we will awake in horror at the scope of the injuries we’ve inflicted upon Her.

From the interpretive vantage of the mystical science of Qabala, Earth's 5 interpenetrating Grid Bodies may be seen as part of a basic abstract model for reality called the Tree of Life (Diagram 7). The Tree is composed of 12 spheres (called Sephira [plural; Sephiroth, singular] : 10 manifest, 2 subtle)
Diagram 7

Qabala Tree of Life
and 22 pathways linking these energy/consciousness domains. Earth, at the bottom sphere (Malkuth, 10th Sephiroth) is linked, through the pathways (The group name is Autiot, forming the 22 sacred letters, the later basis for the Hebrew language) to God, at Kether, at the top of the Tree.

Ideally the Tree resonates as one vibrational being with the Name of God, the unpronounceable, ineffable Tetragrammaton. The planets and Zodiac Houses are positioned on the Tree which as a totality operates synchronously in many levels of manifestation and understanding (e.g., human consciousness, the Earth Grid, the Solar Logos). One Grid system is always an interdependent tone in a broader Grid harmonic. The Tree model presents the Grid as a linear sequencing of higher influences mediating downwards to Earth; but in truth, it’s more like an onion made of dozens of onion skins. The reality is the immediacy and integrity of the onion, or Grid—-with all levels synchronously resonating, one within the other (Diagram 8).

The synchronous Grid resonance is finally brought down to the physical Earth—the ultimate Grid theater for this complex drama of cosmic energies within the context of ordinary daily human consciousness on Earth.

The Terrestrial Megalithic Grid

"The whole world was laid out according to a cosmic scheme," explains British doyen of Earth Mysteries, John Michell. The megalithic culture accomplished its spiritual engineering by means of the landscape stone temple. Positioned geomantically at Dome centers, such landscape temples (e.g., in Britain, Stonehenge, Maiden Castle, Arbor Low, Rollright Circle, Maes Howe, and many others) functioned as "a receiving station for direct influences from heavenly constellations and earth energies" thereby uniting Heaven and Earth. Prehistoric Britain was an epicenter of such megalithic consciousness engineering, and was a land of "closely-linked, intercommunicating centers," adds Michell, "engaged in the same scientific program."

Characterizing in part modern Britain, Michell noted, "A great scientific instrument lies sprawled over the entire surface of the globe. The vast scale of prehistoric engineering is not yet generally recognized."

While the sophistication of "prehistoric" megalithic engineering may remain as yet largely unrecognized, certainly its still copious and visible remains do not go unacknowledged. The extent and abundance of extant megalithic sites in Britain alone is staggering. Estimates state there are still 1000 stone
Diagram 8

The Grid as a Function of Interpenetrating Higher Dimensional Bodies for the Living Earth
chambers, at least 30,000 barrows, 900 stone circles, 3000 hillforts, and countless thousands of single standing stones, all in varying states of decay and neglect. The names are multiple and various, too, for the scientific panoply of megalithic engineering: cromlech, dolmen, menhir, quoit, hill figure, fogou, souterrain, cairn, stone row, round tower, pyramid, brugh, gallery grave, causewayed camp, ring-and-ditch. These are best appreciated as some of the many precise geomantic tools for consciousness-technology once employed by the master geomancers of Gaia.

The context for these megalithic engineering applications was the interface between the Earth’s indigenous electromagnetic field and the Electromagnetic Grid, which acted to re-arrange and harness the magnetized Earth field. The Earth is surrounded by a unified magnetic field and within this it behaves as if it were a ball of magnetized iron, with north and south poles (Diagram 9). This is a fluctuating field, with daily shifts in total geomagnetic force (from 0.0002 gauss at the Equator to 0.0005 gauss at the Poles, and a geomagnetic daily intensity variation of 20-50 gammas). Most scientists attribute these changes to the Sun; solar flares and magnetic storms thereby initiating geomagnetically traumatic situations on Earth. Moreover, geomagnetic field polarity, seen over time, switches often, and has done so perhaps many hundreds of times in the Earth’s long history (estimated at every 230,000 years), causing tremendous biospheric and geologic alterations and life form extinctions.

The Earth’s huge, oscillating electromagnetic field is the Mother to our own human biofields, themselves the Mother to our individual organ biofields. It acts as a primal energy womb in which all living forms on Earth have taken their nourishment and continuing energetic sustenance. In a system of magnetic ecology the human energy rhythms take their cue from variations in the Earth’s magnetic field; thus human biorhythms are conditioned by geomagnetic fluctuations which act for us as timers, modulators, regulators, and, if used properly, as healers. The ancient Druids of Britain, as did the old feng shui masters of China, comprehended these manifold energy bonds and knew how to work harmoniously, creatively, with the interdependent, multidirectional flow of electromagnetic pulses to maintain individual health, communal cooperation, and world peace. Their context was the Terrestrial Megalithic Grid and their means was consciousness technology.

The geomantic secret of the Druids was that they comprehended the Grid as a supermagnetic armature.
Diagram 9

Earth's Geomagnetic Field in 1965
True to Hermes' Principle of Correspondence, the modern electric motor is a scaled-down version of the energy conversion mechanism of the Earth Grid. The basic design principles of the electric motor illustrate this reality. The electric motor has three basic parts, relevant to this Grid model: the armature, stationary bar magnet, and commutator.

The armature is that part of an electric generator, dynamo, or motor in which electrical energy is produced. Usually it is a core of soft iron wound with insulated wires which produces an electromagnetic field in response to an incoming electric current. The armature is the main, revolving, current-carrying winding, acting as an induced electromagnet. The coiled armature reacts with the stationary bar magnet, actually creating its magnetic field. When the armature rotates between the newly established poles of the bar magnet, this generates the electromotive force, or power—the whole purpose of the motor. The commutator directs (and changes) the flow of the primary electrical current from the generator, either in a direct-current or alternating-current manner. The electromotive force, which derives from the rotation of the armature through a magnetic field, provides the energy source.

Thus electricity in motion produces a magnetic field which in motion across an electrical field in a magnet yields electromotive force. If the direction of the electric current is changed through the commutator, the poles reverse direction when the armature accordingly changes its rotational direction. A direct-current of constant strength produces an unchanging magnetic field whereas an alternating -current makes the magnetic field reverse itself every time the current reverses.

Thus the Grid is a supermagnetic armature. The Oroboric 15 Line Grid is the coiled armature. The sutratma of interwoven gold/silver Oroboros Lines entering Avebury Circle represents the commutator, the channel for the variously positive/negative electrical current that produces the electromagnet in the Oroboros armature. The Oroboros armature produces the electromagnetic field in the stationary bar magnet of the Earth, in reaction with its indigenous mineral, crystal, and stone conductors. "The Earth's core, composed mostly of molten iron, conducts electric currents which amplify accompanying magnetic fields," explains Hurtak, "when energy wave bombardment pours in through the polar areas of the Earth." The electromotive force is drawn off through the Electromagnetic 1746 Grid centers interfacing with the natural electric/telluric flows of the Earth's magnetic field (See Diagram 9). This interface was the intelligent positioning of
megalithic hardware (e.g., hollow, crystal-tipped, 100 foot-high pyramids) at key Grid junction boxes in a program of applied consciousness technology which re-arranged the indigenous magnetic field pattern into a workable energy Grid from which free and inexhaustible supplies could be drawn. This is the foundation of the Druidic sacred landscape science extolled by Michell.

The Electromagnetic 1746 Grid is the planetary Grid Engineer's energy matrix blueprint, his Con Edison route map. The advanced crystal technology of Atlantis, for example, represented the "home appliance" that plugged into this free energy system drawing off virtually endless reserves of energy to empower civilization (the technological aspect) while furthering the spiritual evolution of humankind (the consciousness aspect).\textsuperscript{10} The electromotive force is not available, either functionally or conceptually, without this spiritual/scientific fusion expressed as consciousness technology and that comes from the proper understanding of the human/Grid interface. The Grid energy appliances were, and remain, a fusion as spiritual engineering. The Master Grid Engineers were, and remain, Knights of the Holy Grail. Thus the Grid is revealed as the context in which consciousness and technology are harmoniously integrated in a planetary \textit{Tai Ch'i} for human and Earth enlightenment.

In accordance with this simple electric motor model of the Earth Grid, the much-prophesised Earth Changes, possible geomagnetic field and pole reversal, even the apocalyptic Second Coming of Christ, are all nested within the function of the Grid commutator.

Between geomagnetic field reversals, the Grid seems to function as a direct-current motor, with its steady stream of one-way electricity. But with the imminence of Earth Changes and field reversal, suddenly it seems that the Grid is actually an alternating-current motor, simply with long pauses between field reversals. A change in the polarity of the electric current flowing through the Grid commutator at Avebury fundamentally means the introduction of a new electromagnetic Light/Life/Consciousness spectrum for Earth, an upgrading of our physical life parameters by a literal electrification of matter---the biosphere, noosphere, and all our Grid bodies---into the fourth dimension, into the realm of anti-gravity. Everything will be vibrationally transfigured—As Above, So Below—from the Star Evolution Crystal to the Earth Polyhedron Crystal to the human molecules of DNA and ATP. It will happen unilaterally, instantaneously,
synchronously.
This is because the primary message the reality of the Grid is telling us is this: We are all one crystalline vibrational body—galaxy, solar system, Earth, human.

The Human/Grid Interface

When the Earth is comprehended as a receiving/transmitting crystal harmonic and a resonant facet in the solar crystal harmonic, a note in the solar octave, then we need a unifying scheduling science with which to orient ourselves within this Grid totality.

The precise science of astrology is the Viewer's Guide for daily Grid programming. The Ephemeris is the *TV Guide* for the Grid. What programs shall we watch as the world turns? What maudlin soaps shall we participate in as our King Sun plugs us into His daily melodrama?

Astrology minutely calibrates the hourly, daily, weekly, monthly, yearly cycles of the planets—the movements of our orchestra. Through astrologically-attuned eyes, which is simply developing the interpretive aspect of astronomy, we can understand our lives, our world, our emotions, our movements, our reasons, habits, difficulties, and exaltations, according to this "web of iron necessity," this whirling elemental energy dance of our interwired human/solar psyche. The Polyhedronic Crystal Grid is like the master crystal chip that receives, through its 120 smooth triangular receptor plates, the myriad, though mathematically rational and orchestrated, energy/consciousness/Sound channellings from our biopsychic disc jockeys. Thus the Ephemeris, with its factual tables of numbers and degrees, when properly applied, represents the Grid Engineer's codebook for predicting, assessing, correcting, interpreting, and transmuting these steady, determining inputs from the solar radio station.

Transmuting is the key. We can change the channel if we choose, turn down the volume, fine tune the specific radio band. The Grid Engineer has the potential for transmuting (freeing the inherent energy by releasing it from its form bondage) the solar/celestial energies by intelligent interfacing with the Electromagnetic 1746 Grid through any of the 144 planetary Round Table holograms, or terrestrial Zodiacs resident on Earth. This Grid, we must remember, is the Golden Alchemical Bowl of electromagnetic differentiation, and the potential alembic of our transfiguration from gravitationally bonded humans to Humans of Light. Just because King Sun, our accustomed disc
jockey, plays his favorite tunes on his radio station, doesn't mean we have to, ultimately, always dance to that rhythm.

The introduction of the reality of the local Zodiac workshops brings us to the crux of the possible interaction between the human and the Grid. This is where the Grid Engineer and Knight of the Holy Grail become one. This unification of seeking the Grail and serving the Grid is played out in the local geomythic theater of the landscape Zodiac. Geomythic means "the living myth in the landscape" and our direct involvement in this terrestrial symbology through a heightened consciousness interaction within a local Zodiac complex.

Our Zodiac conceptual model again operates as an interdependent series of homologous and attuned dimensional systems i.e., Zodias within Zodias. We begin with the Master Solar Round Table of the Earth/Sun ecliptic through the twelve Houses of the Zodiac—every year, every 2160 years, every 25, 920 years. Here we have both King Sun and planet Earth circuiting the heavenly twelve-gated Grail Castle as intrepid, dedicated Grail Knights. This vast cycling, and questing, is translated, homologously, down to Earth, first, through Avebury as Grid switchboard and concert maistro, the master point for the 12 Oroboros Zodiac Lines, and, second, through the expansive planetary distribution of these 12 Dragon Lines, thereby making a Round Table of both Avebury Circle (condensed) and the entire planet Earth (expanded). But how does an individual Grail Knight voluntarily, consciously experience this huge planetary Round Table? And how does the Grid Engineer make intelligent, compassionate, and timely adjustments in the geomantic web of this vast-revolving solar table on Earth? Through the local Zodiac hologram.

In this Zodiac model, an overlay of Qabala's Tree of Life with the mythic Round Table/Zodiac image is most illuminating. The Earth is one of the 12 resonating spheres, one of the 12 Round Table members, one of the 12 Notes in the solar octave, in the Solar Tree of Life. Thus we can picture these relations either in terms of the Tree or Round Table, which are essentially interchangeable for this illustration. Our Body of the Sun is expressed as a 12-sphered Tree of Life, with 12 Knights, or 12 Notes; Earth is Malkuth, the 10th Sephiroth, representing, appropriately, Earth (See Diagram 7; the 7th Sephiroth, Hod, for example, represents Mercury).

Next, and similarly, the Earth Body is expressed as a Tree of Life, and here Mt. Shasta is Malkuth and Root chakra. The Gaia Tree has 12 spheres which in terms of the Grid are 12 Zodiac
**Vortices**, major planetary Zodiac domains which correspond in legend to the camps of the 12 Tribes of Israel. These are primary geomantic sectors each organised into a major Zodiac complex of 12 sub-Zodiac temples. The unification of these 12 Zodiac Vortices is the planetary Round Table, or Tree, as the whole family of Jacob (who was Israel). Next, each of these 12 Zodiac Vortices has a subsystem of 12 **Zodiac Domes**, giving us a total of 144 Zodiac hologram temples on the planet (although all are not always available at one given time because of changing geologic/meteorologic conditions). Each of the 12 Zodiac Dome sub-systems comprises a Zodiac Vortex Round Table, of which there are 12 worldwide.

For example, what I call the Hyperborean Round Table occupies an approximate area ranging from the Orkney Islands of northern Scotland, through Ireland, Wales, and England, to Brittainy and southwestern France. This Domed Zodiac Round Table includes 12 interdependent local Zodiac systems. Each has a dominant myth-system Logos but all are primarily constellated around King Arthur and the Grail. One of these 12 local Zoicdics is the somewhat familiar Glastonbury/Somerset "Round Table of the Stars," as it's often called, or more poetically, *The Region of the Summer Stars* (which includes the famous mystical Avalon). Each local Zodiac (which may measure 10 miles in diameter, 20-30 miles in circumference) is topped and energized by a huge Zodiac Dome.

Each local Zodiac, such as The Region of the Summer Stars, is a hologram of the solar Round Table in the form of 144 quasi-etheric star center effigies dimensionally overlaid like a stellar template on the physical landscape. The landscape Zodiac is a double ecliptic, with one physical ecliptic including 96 star effigies (from the northern hemisphere skies) and one etheric ecliptic including 48 star effigies (from the southern hemisphere skies). The two ecliptics interlock forming a *vesica piscis* with Glastonbury in its cradle.

Within such a local Zodiac temple, a particular constellation, such as Canis Major (the Great Dog), will have an approximate material landscape reference point, a residence often reflected in place names, local legends, or actual landscape sculpturing, within or outside this defining ecliptic.

In central Somerset, for example, within The Region of the Summer Stars, Canis Major is called "The Girt Dog of Langport" and occupies a geographic region about 5 miles long and 1 mile broad, and includes 16 recognizable **star centers** in its geomythic body. Sirius, the brightest star in the night sky, touches down locally at Oath Hill which was once used by King
Diagram 10

15  church, formerly barrow
16  church, hollow hill (stone chamber)
Arthur to obtain oaths and fealty-commitments from his Knights. About 6 star centers are occupied by 600-1000 year old Christian churches, many of which were preceded by barrows or stone circles. Star centers are local geomythically-cast power points, usually marked by a dome cap, or line node, and sometimes with a full-fledged dome. Each of the constellations Above is overlaid, energetically, structurally, as a subtle, miniature star template of landscape star formations Below. Occasionally the landscape, when seen from an airplane, does seem to resemble the morphology of a fish or goat or bull, but this is not essential by any means. The star centers represent dimensional doorways into the geomythic consciousness body of the particular Zodiac effigy whose being has cast an inviting shadow over the physical terrain.

The local Earth Zodiac represents a basic consciousness workshop for human experience of the Grid of solar energies that is the Solar Round Table, which comprises our inner psychic three-dimensionally bounded life. The local Zodiac embodies, in miniature, the astrophysical parameters etched in Earth and ether of the Star Evolution Grid and its 144 permutations, from the basic 12 octaval modulations. Each of the 144 Zodiacs has a different flavor, a different angle of vision, a different nuance and energy coloring. Why there are 144 is explained below.

Through hologrammic miniaturization, the local Zodiac makes the vast solar ecliptic Round Table accessible for human interaction and transmutation. The local Zodiac holds up before our meditative eyes a mirror made of geomancy for inner self-discovery. In circuiting the Zodiac temple we learn we are, psychically, made of the identical resonance pattern as the solar system, and we thank our Zodiac hologram for clearly mirroring this reality for us. The Zodiac is a means for individual attunement with the Music of the Spheres, for hearing the subtle cosmic crystal harmonics, orchestrated daily by the "rushing sounds" movement of planets and stars, the Rhoizamata, as Pythagoras would say, which are always resonating within our atomic/molecular/consciousness environment, but just below the range of common hearing. The local Zodiac radio turns up the volume on this unending solar resonance so we can hear our stellar heartbeat. So, transiting the Earth Zodiac under intelligent astrological guidance, is like having a personalized Sony Walkman strapped to our ears, tuned to the cosmic FM band of fine musical orchestration---Venusian rhapsodies, Martian reggae, Jupiterian
symphonies—all courtesy of King Sun Broadcasting Network.

Each landscape effigy has its own internal templic structure modelled, again, on the Tree of Life. Our Girt Dog of Langport happens to be, geomythically, the canine psychopomp for the neophyte Grail Knight entering the starry Otherworld of the Zodiac temple, the spinning mystical Grail Castle. Mythologically, the Zodiac temple is the theater for the Grail Knight to seek, find, and fulfill the Grail Quest, which is none other than uncovering and opening the divine seed of Light and Spirit buried deep within human consciousness. The landscape Zodiac temple is energetically organised to facilitate this revelation. Our inner nature truly lies among the stars. And Merlin, legendary Enchanter and Bard of Britain and King Arthur's Star Worker, was the master geomancer who dispatched the Grail Knights out to the star centers for visionary/integrative experiences, each according to the coincidence of their individual natal charts, their own spiritual development status, and the larger astrological cycles—as mediated through the landscape Zodiac hologram.

This is the moment in which the Grail Knight and Grid Engineer shake hands and act as one out in the Grid. The field of our psychophysical organism, the electromagnetic and bioplasmic structure, is inherently linked into the Earth's electromagnetic and bioplasmic fields. When a human being inter-relates and unifies (through meditation) at the right point in time and space (according to the Ephemeris time tables) on the surface of the Earth (at the correctly chosen star center vortex), and in themselves (in attunement with their overall program of spiritual unfoldment, as calibrated by their Master), and there is coincidence, then we have individual and planetary resonance. Then we have direct, tangible, experiential knowledge of the human place in the solar system. When we walk through the Zodiac Grid Door into the realm of the Gods, we comprehend our true status in the solar paradigm. And that is to embody and transfigure it all in the Human Body of Light.

But how, exactly, does the meditating Grail Knight also function as Grid technician? Just as the Solar Logos is the Soul of the Being known as the solar system, and just as the Planetary Logos is the Soul of Gaia, so the Grail stands for the potential for humans to know as the Soul. The Grail is an electromagnetic consciousness doorway within the human mind/body complex which opens through individuation of the psyche (i.e., the harmonious integration of the twelvefold Zodiac archetypes of the Sun) into divinity. This is called by Qabalists the Adam Kadmon, the sacred template of human
perfection, the Edenic Light Body.

The Grid, operating through its geomantically symbolic local star configurations, is a series of epiphanies, of harmonic unifications, octaval Notes of Trees within Trees, each sounding their note in a heavenly/terrestrial chorale. It proceeds step-by-step, beginning with the local Zodiac effigies. When Canis Major resonates within the Region of the Summer Stars Zodiac system, and when all 144 effigies within this Zodiac Dome are harmonised, then the system as a whole can resonate properly and fulfill its intended geometric place in the Zodiac octaval choir. When each of the 144 Zodiac Domes is harmonised, when the 12 Zodiac Vortices are resonating, then the global Round Table/Tree of Life through Avebury can sing within the choir of the solar system of which our Gaia is one sweetly singing voice. Thus is Gaia's position as Grail Knight at the King Sun's Round Table fulfilled and the solar harmonic completed.

When the human, myth-living one's true identity as a star-compounded Grail Knight walking through the local Zodiac temple, unifies consciousness at a star center through a variety of means (e.g., meditation, chanting, singing, dancing, crystal focussing, directed breathing, group rituals, channelling higher beings, performing color visualizations), this brings the local aspect of the Electromagnetic 1746 Grid into clarity, focus, and harmony. Human and planetary energies are balanced through aware human participation at Grid nodes.

When we comprehend the Grid as Gaia's immune and digestive system, and when we further consider the ubiquitous ecological disaster we have dumped in Her lap (not to mention the howling delusory human astral plane we've created above the Earth like a permanent brown band of smog), then we can clearly see the urgency for purging, cleansing, and harmonising the Human/Gaia Being again. We are not separate: Gaia's ecology is our spirituality; Her imbalance is our psychosis. It's a question of reciprocal maintenance. As we maintain the Mother, so we maintain ourselves, Her children. As we purify Her body, so we cleanse our own. As we feed Her, so She feeds us. As the British geomancer Reshad Feild notes, "Although this grid system exists in the natural world, it,too, is made for man and woman, and so the necessary work of transformation has to go 'through' the vehicle of the human being." 14

This is true planetary ecology, love for the "Earth Household", because it recognizes the indivisible bond between Earth and Human, House and Resident, Mother and Child, as mediated through our homologous Grid bodies. And we can count
on the assistance of both the Elemental (the supposed "legendary "realm of gnomes, fairies, sylphs, etc.) and the Angelic Kingdoms, in concert with the Elohim, Adam's "parents" on Earth.

The Enlightening of Adam

The landscape temple made of stones and crystal, positioned at Dome centers, divinely empowered by the Elohim in concordance with the Elemental Kingdom, and ritually inhabited by consciously breathing humans, linked Heaven and Earth through Man. The terrestrial temple also functioned as a Grid Door by which human consciousness, initially bounded by the Earth's gravitational/consciousness field, could actually exit this plane and enter "the realm of the Gods." Through this Grid Door, the Gods could also channel their spiritual vibrations and messages.

The ancient ziggurat, for example, was a Grid Door or Heaven/Earth mediator. The Akkadian/Babylonian name was *zekiratu*, which connoted "tube of divine spirit;" while in the Sumerian tongue, ziggurats were called ESH, which meant "supreme" or "most high" or "heat source". Moreover the ziggurat at legendary Nippur (at the northern confluence of the Tigris and Euphrates Rivers) was considered the Gods' headquarters, called *KI.UR* (or *DUR.AN.KI*) which meant "place of Earth's root" and "the place where the bond between Heaven and Earth rose", the place where there was a "heavenward tall pillar reaching to the sky." Clearly such a place was a major Dome center for Sumerian culture.

As the Irish myths attest, the *sidhe*, or raised stone-and-earth barrow, was the home of the Tuatha de Danann, the sanctified, potent residence of the ancient Gods. Domed Newgrange, the *Brugh na Boinne*, was their principal home in old Ireland. The Gods, through their residences, were the source of wisdom for early reverential humankind, and while the Gods may have occupied their etheric palaces at the Dome centers, humans meanwhile, and afterwards, constructed physical temples to mark the spots and serve as a two-way swinging door.

So the Domes which brought Love from Above for Gaia's meridians, also brought wisdom to Adam, the early man/woman inhabitant. The Domes were the source of wisdom, the *wise domes*. Megalithic culture was a sacred milieu best described as *megalithic*, meaning the time of the Magus Stones. But the agents of the Wise Domes, the Stone Magi (or Magicians), after
a time judged it better to not leave their signature too prominently and removed the letter e, leaving us wisdom. But even in their omission did they leave their handwriting, for the e that was removed from the wise domes is the e of Elohim.

The Elohim also left the consciousness technology in place to facilitate the human retrieval of their angelic wisdom through the interdimensional structures positioned at the Dome sites. Stone Age indeed! The Elohim left a major calling card at Avebury, not the least tarnished after many millennia. Just as Avebury is central to the nature and operation of the Earth Grid, so it was, and remains, pivotal in the appearance (and eventual reawakening) of Adam, the first collective manifestation of physically individuated woman and man on Earth. When we understand Avebury a little better, we can begin to answer the fundamental questions underlying all this complexity of life: Why is there a Grid at all? Why is there an Earth? Why is there human life?

Avebury Circle originally had 94 stones, of which 72 were created by the Elohim, and 22 were later imported from elsewhere. Encircling the Avebury Circle is a massive ditch (about 30 feet deep) bordered on both sides by an embankment. The ditch is like a huge groove running around the Circle; it has an intensely feminine vibration, like a river of soft silent light flowing whitely through the earthen channel, like a susurrus between embankments. Walking slowly through the ditch one senses the primal Mother is whispering here to her Children of the Circle.

At Avebury Circle the earth has been taken out of a whole and removed. We can look at the circle as a giant record. The ditch is the groove on the record. If we play the record with the needle of our Spirit, then we hear some "hi fi" angelic music. The 94 stones are the amplifiers for the music. The Stone Circle is thus an outdoor cosmic sound system, the site of the original Rock concerts.

Here we have the concept of geomantic harmonics at work. The stone circle has a specific pre-encoded resonance harmonic, a specific musically-enscribed message, or Song. The composite shape of the circle represents a frozen cymatic sculpture, a permanent landscape stereo record from the Spirit. The stone circle embodies a Tone dropped into the ethers of the Earth then molded terrestrially into a playable record. The ditch is the primary record groove, and the first wave trough emanating from the place where the "stone" tone was originally dropped into the site (i.e., the center of the circle). The Dome overhead is the bell that carries the tone when "struck" from
Above by the musician. The Dome site channels this Tone through its geomantically calibrated musical instrument, the stone circle, and the encircling stones are the "wrap-around sound" loudspeakers. The particular size and structural complexity of the megalithic stone record is directly related to the evolutionary importance of the Sound recorded. The truly biggest hit tunes get the largest diameter stone circles.

Avebury is thus one of Gaia's largest stone records, occupying an area in Wiltshire of 28 1/2 acres, with a ditch circumference of 4/5 mile. The 17th century British antiquarian John Aubrey, writing of Avebury, declared, "Avebury doth as much exceed Stonehenge in grandeur as a Cathedral doth an ordinary Parish Church." The 20th century British scholar Harold Bayley (writing in The Lost Language of Symbolism, 1913) corroborated Aubrey's enthusiasm, announcing "The English Temple of Abury typified not only Time but also the greater Absolute, the all-embracing and more awe-full Soul of time, the axis of Existence." Why is Avebury so important?

All the ley lines, it seems, lead to Avebury. All the energy in the Grid is focussed at Avebury Circle, our planetary Grid umbilicus. The purpose of Avebury is tuning human consciousness to its purpose on Earth. At Avebury resides the Earth-expression of the blazing Seed of divine Light. Within the human body, as the Grail Knight discovers, resides this same Light Seed, this fire of the Spirit, which we call the Nimitta or Blazing Star. This Seed, whether within the human or at Avebury, is the same Blazing Star. It is the same blazing crystal Seed from which both Gaia and Adam were physically born, birthed by the Elohim, whom Genesis, in the standard confusing and exoteric translations, calls God. More properly, the Elohim are God's agents, the Sons of Light, and the agents of our local creation.

This fundamental aspect of the Grid and human life will make more sense when we examine a few key words. Avebury, Adam, and Elohim, are coded symbolic words created by the Elohim through the sacred language of Qabala (which matches letters with numbers, i.e., gematria).

ADAM (1.4.40, technically written as ADM) means "the Aleph (A.1.) buried in the Blood of Earth (DAM, 4.40)." Aleph here means the Blazing Star of the eternal Spirit, the universal flame of the Nimitta, implanted as an imperishable seed of Light within the human body of clay and blood (DAM). In other words, the Kingdom of Heaven blazes within us as this Star (Aleph). AVEBURY is the place (BRY, 2.200.10) where the Aleph was implanted (or buried) in Mother (AVE, 1.6.1) Earth. Avebury
is the Mother's Village, the place of the Mother's berry, or seed. Avebury, as the inner heart of Gaia, was Adam's heart/womb door, the terrestrial place where Adam first came into Earth incarnation from the Garden of Eden Above. Adam arrived with the Blazing Star burning like a blinding furnace within his/her mind/body complex. Adam appeared on Earth through Avebury as a terrific flame of Heaven walking in the form of the human. Avebury remains the place we can go to on Earth to remember our fiery, spiritual arrival on the planet.

ELOHIM, an angelic hierarchy, were the Creator Gods for Adam and Gaia, the master mancers of geo and soma. Elohim implemented the translation of the Blazing Star from the spiritual realms into the sentient, organic, evolving life form of Adam, following the same homology whereby the Aleph was clothed in planet Earth, becoming our sentient, organic, evolving life form of Gaia. Elohim, in a sense, supervised and midwived the co-creation of Adam and Gaia as homologous beings.

Let's examine this still more closely. This will clarify our composite model of the Grid, Earth, Adam, and Elohim. Light, in Qabala, is AWR or 1.62 (Technically, it's 1.6.200, but final zeros are redundant). AVE the Mother is 1.61. The phi ratio of the light spiral is 1.61 (or, precisely, 1.618034, which can be rounded off to 1.62). Earth and Adam have a mathematically homologous relationship whereby ADAM is 144 and Earth, through its Grid (i.e., Electromagnetic 1746 Grid, the Golden Bowl, and Christ Body) is 1746. Both numbers are related through the phi ratio.

The Silver Cord, the primary dual-weaved umbilical electrical cable entering Avebury, is comprised of 666 (the solar Father of Light, the Seed, the Nimitta, Aleph, or Blazing Star, and golden line) and 1080 (the lunar Mother of Forms, and silver line). Their relation as polarised light (666/1080, positive/negative) is expressed as phi 1.61 while their summation is 1746, also a function of phi. We have, then, Light (AWR 1.62) moving through the umbilicus as Electricity (positive/negative charges, expressed as 666/1080) and manifesting as Electromagnetism (the polarised north/south nodes of the 1746 Electromagnetic Grid, as manifested through the yin/yang qualities of the 12 Oroboros Lines). This channelling of Light to Electricity to Electromagnetism births physical Life, expressed as Adam and Gaia, as the bioorganic theater for their interplay, as mediated through the Megalithic Grid.

Earth, incidentally, is written in Qabala as ARTZ (or ERTZ,
1,200.90, or 291, whose digits total 12, the prime number of the Oroboros Grid and Zodiac Temple, in terms of mythology, the Mother of Forms (1080) creates the Holy Grail to contain the Father's Seed of Light (666, Blazing Star), while the Elohim (angelic Grail Maidens) bring the Grail (now 1746, both Seed and Vessel) down to Earth (ARTZ, the 12-sided Grail Castle) for Adam (144), the Grail Knight and Grail Bearer.

But what creates the Light originally? What starts this whole generative procession culminating in Adam walking the Earth bearing the Grail? Undifferentiated, undivided, inexhaustible, unfathomable Love from Above.

Adam is the key to unlocking the secret of this light harmonic. The New Zealand Grid theorist Bruce Cathie speculates that "All the mathematical evidence so far indicates that the maximum number of individual elements to be found in the universe will be 144." Each element can have, theoretically, 6 isotopes, making 864 possible combinations. Cathie proposes "144 octaves of separate substances" in which an octave is comprised of an element family of 6 isotopes each. Each electron cloud, or shell, as it expands outwards from the atomic nucleus, can accomodate a maximum of 8 electrons. Thus each shell expansion is a function of 8 (the original basis of the octave) and forms a new electron shell. This Cathie calls the "harmonic zone" or "light harmonic" totalling 144. "The light harmonic is then equal and the cycle has been completed. The whole series is a repetition of octaves of wave forms" whereby physical reality is "manifested by the concentrated interlocking of harmonic wave-forms."

This is clearly controversial yet keenly intriguing. To date 107 elements have been discovered; this leaves 37 undetected, or should we more accurately say, "as yet unmanifested?" The number 144, we've seen, is pivotal in the Grid and Adam. A closer look at our key numbers will amplify Cathie's suggestions.

How can we arrive at 144 elements? Let's postulate 18 solar octaves, as representing the maximum expressive potential of the solar Father (666, whose digits total 18) acting on the material archetypal Forms of the Mother. From the Mother of Forms, say the Qabalists, issues the heavenly Chariot (The Mother's sphere, Binah, the third Sephiroth, manifests the Hhajt. 8, a downward manifesting pathway called in Tarot the Chariot [See Diagram 7]). The Chariot of Hhajt. 8 refers to the maximum number of electrons in an atomic shell thereby comprising an element as the fundamental form. Now, let's rearrange the Periodic Table of the Elements, momentarily, and
postulate 8 families of elements, each occupying 3 solar octaves. By the mathematics of light (18 x 8) we have the full light harmonic, 144, expressed as Adam, on Earth. Thus Adam 144, as a sentient, organic life form comprises, the full expressive potential for the 144 elements in this universe. The 144 elements, themselves, represent the dramatic interplay (based on phi 1.61, as the unfolding physics of Light) of the Father 666 and Mother 1080. Their combined electrical impulse 1746 (i.e., the Grail with the Blazing Star inside) is the spark within the form of Life, for Adam and Earth. And in either case, the Elohim are the quantum midwives, heavenly benefactors, and, literally, God-parents of this grand astrophysical experiment.

This complex, terrestrial drama all reduces to the number 9, called Tayt in Qabala. All the key numbers in this Light interplay of Earth, Adam, and the Grid, it seems, digitally total 9: 1746, 144, 1080, 666, 864, 83,808 (possible planetary dome caps), 20,736 (number of planetary Zoic multiplied by number of star effigies in each). Even affiliate numbers all point to 9: 86,400 (average human heartbeats/day), 25,920 (number of years in one Great Zodiac Year), 4,320,000 (years in the Mahayuga, the Hindu cosmic time cycle)—not to mention the 9 month gestation time for humans. What, then, is the 9 that pervades the inner structure of the Grid?

We must turn to the Qabala for illumination of the 9. Tayt 9 represents the archetype of the primeval "feminine" formative energy, which draws upon the Hhayt 8 (the storage sphere, or Chariot), of all undifferentiated energy, which derives from Binah (the Sephiroth of the Mother of Forms) to build structures. Tayt 9 is the elementary "Female", the prodigious proliferator of elementary form units, individual cells, expressive composites created from the Mother's electron clusters of Hhayt 8. In Qabala Tarot symbolism (Tarot is a pictorial system directly related to the Tree of Life as a visual/intuitive series of life/drama depictions affiliated, in part, with the 22 pathways) Tayt 9 is the Path of "Strength of the Lion." Each pathway on the Tree is "ruled" by a Zodiac House; Tayt 9 is ruled by Leo, which in turn is ruled by the Sun. Tayt 9 is often depicted in Tarot symbology as the Scarlet Woman (alive with the fire of Life) and is pictured as an ecstatic, nearly drunken, lascivious, scarlet-clothed, and most powerful primal woman astride a Lion/Serpent, holding its jaws open in triumph. In world mythologies, 9 is the number of "the Goddess Mother of the World," the "Great Goddess of Many Names," She who is Matrix of the cosmic life process, and, in Greece, it was
the number of the Nine Muses, Daughters of Mnemosyne (Memory, i.e., Binah).

But what is the Strength of the Lion that our archetypal generatrix is riding triumphantly? Qabala symbolism interprets the Lion variously. Regulus, the heart of the Lion, is the brightest star in that constellation and Leo wasanciently regarded as the beginning of the Zodiac Round. The Lion also represents the first formation of the human individuality projected into the world of Form (Geburah, 5th Sephiroth) from the realm of the Spirit (Chesed, 4th Sephiroth). The Lion, says J.J. Hurtak, represents our Star Evolution, King Sun. Thus the entire solar reality, the Drama of the Nine, of our local Star Evolution system, is mathematically encoded into the light harmonic of Adam, Earth, Grid. The 9 is the Logos of our Sun, his metaphysical calling card, his secret telephone number. We have, then, the physics, geometry, and gematria of the specific light harmonic (the solar octaves) of our King Sun, encoded synchronously and thoroughly throughout all form manifestations in our world, within all dramatis personae (like an ineradicable blood type or permanent thumbprint) of his solar Crystal Theater. Through our human lives as the Mother's Children on Earth, our local Mother, we myth-live, as divinely made holograms, the Light valency, or Mind/Body/Spirit, of our solar system, Tavt. 9, the Strength of the Lion.

This is the Drama of the Nine in short form: The (Love from Above) Light (AWR, 1.61, the Logos of Light, phi) Harmonic (Electricity, phi differentiated as 666/1080, into positive/negative charges) Expressed (through the Elohim, the angelic verb, agents of the implantation of archetypal life into temporal form) as Adam (144, the human electromagnetic fulfillment of all elemental expressive potentiality, as 18 solar octaves x 8 element families) on Earth (ARTZ, 291=12, the 12-fold Zodiac/Round Table/Planetary Grid matrix). Thus do the Wise Domes of the Elohim teach us of the Lion's Play and purpose of Earth, Adam, and our loving bond, the Grid.

Adam's Geomancy

So Hermes throws the ball back to us. As humans we must all become geomancers for our Mother, Gaia, and for ourselves, Adam.

At the beginning of Time on Earth, the great geomancer Hermes arrived with the Elohim, the Sons of Light and Biblical "Giants in the Earth," and established the Global Hermetic Megalithic Calendar—the Grid. The Elohim further arranged for
the human psyche to resonate in harmony with the Music of the Spheres as broadcast through our local twelvefold solar Round Table and as received through many radios of the templic stone grid. This was, supposedly, at the time of the second Dome Presence, just before Adam's Drama of the Nine was about to be staged. The Grid temple was designed to achieve the necessary biopsychic nexus between Heaven and Earth as embodied, as lived, as walked by Adam on Earth.

Thus Adam and Gaia were set in balance in an inextricable bond, as homologous manifestations and groundings of the same fundamental phi spiral of Light. The human psyche was wired into the Grid which itself was wired for sound as a sonic hologram of the Solar Logos. The planetary Grid and its local miniaturizations was the model/blueprint/directions for Home, Enlightenment, and Paradise. Through the Grid, Gaia and Adam were held in living harmony within the greater body of the solar system.

Thus we got off to a terrific start. After a while, the Elohim/Giants and their Domes departed. We were on our own.

Human geomancers, trained under Hermes, and in cooperation with the Elemental Kingdom, assumed responsibility for Grid maintenance (which is to say, really, for individual and communal enlightenment) although they could still rely on assistance from Above—first, from the Elohim, who had returned to angelic form and residence, and second, from the widespread extra-planetary network of benevolent Space Brothers. The presumed high civilization of Atlantis was the site of the Planetary College of Grid Magnetics graduating a succession of expert geomancers. The twelve-tiered Atlantean Temple of Oralin was geomancy headquarters, like a Pentagon for magnetic sciences. Here geomancers and magnetics technicians conducted continual analyses of Grid conditions, monitored terrestrial/solar energy fields, designed and installed various geomantic engineering instruments—all as part of an overall program of maintaining a harmonious and fruitful planetary Grid system for the benefit of all beings.

We might construe these ultrascientific Atlantean Grid technicians as the archetypal computerized Druids, for even in later times, after the collapse of Atlantean high culture, the legendary Druids maintained the wisdom of the Grid and kept it in balance. The Druids fine-tuned the Earth Radio through all Her Dome receptor/dial sites and myriad transmission wires. The Druid geomancers kept Gaia's biosphere humming with a steady stream of life-supporting, life-enriching, life-evolving energy transmissions from Above.
The Druids and Atlanteans understood well the reciprocal agreement. Through Hermes, Adam learned the divination of the Earth, the secrets of geomancy. But through Adam, Hermes expected the reciprocal divinization of the Earth through intelligent, loving application of geomancy. Why? Because, fundamentally, this program of reciprocal maintenance would bring about the mutual enlightenment of Mother Earth and Child Adam, which is what the Elohim intended, as part of the Master Plan, for this particular astrophysical experiment on Earth. Gaia, through Her Grid, maintains our Blazing Star. We, through our geomancy, maintain Gaia's Blazing Star.

But why need we be concerned today in our comfortable Western society of personal computers, credit cards and new Volvos? Why should we bother with all this ancient history and idealistic grandeur from a remote Druidic past? Because many interlocking universal, galactic, solar, planetary, and human evolutionary cycles are all synchronously coming to fruition and conclusion at this the end of the 20th century. Certain basic incarnational obligations all humans willingly agreed to, long ago, as a condition for inhabiting the Earth, have all come due. It's not a question of "the wrath of the Gods" or an "angry, displeased Jehovah". It's simply a matter of cosmic clockwork. A major cycle is nearly finished. New things are about to begin. All old business must be cleared up quickly. This kind of Grid teleology will assume sharper focus when we examine two further aspects of the Grid.

Planet Earth, within the theory of chakras, is the Muladhara Root Chakra in the Body of the Solar Logos. If we picture the solar system as a huge human-like figure, Earth sits very materially in the scrotum as the root energy center. The entire Earth Grid, in fact, is actually an organic multitiered model of the energy dynamics of a solar root chakra, functioning for the Sun just as Mt. Shasta functions for Gaia. What is the significance of the root chakra?

Sleeping within Gaia is the Goddess Kundalini, the tremendous creative, evolutionary spiritual energy that transfigures, when activated, the entire 7 chakra system—of the human, the Earth, the solar system. Kundalini, the Indian Tantric texts inform us, is "She who maintains all the beings of the world by means of inspiration and expiration and (who) shines in the cavity of the root Lotus like a chain of brilliant lights." Moreover, Goddess Kundalini "is the receptacle of that continuous stream of ambrosia which flows from the Eternal Bliss. By Her radiance it is that the whole of this universe and this Cauldron is illumined."¹⁹ The sequence of chakra openings
is reckoned as 2 through 7, then back to the root, from which the aroused Kundalini arises in a fiery burst like the soaring serpent and flames up the sushumna through the chakras illuminating everything with a divine light beyond brilliance. This is Gaia's potential and Her expected role in our local solar system.

Planet Earth is also the final Word in the Secret Name of God, called in Qabala, Tetragrammaton, the Word of Four Letters, i.e., YHWH (Yod-He-Wod-He, or Yahweh, or Jehovah, in translation). The Solar Logos, as we mentioned, can be modelled as a Tree of Life with Earth at Malkuth, the 10th Sephiroth. The Tetragrammaton in part pertains to that composite ineffable resonance, or harmonic, of all levels of expression of this Tree. This includes the Four Elements (fire, air, water, earth) in all their dimensions of subtle and physical expression. The Father of Light (Chokmah) is Yod; the Mother of Forms (Binah/Saturn) is He (pronounced Hay); the Soul of Adam (Tiphareth/Sun) is Wod; and Earth, the Body of Adam (Malkuth/Earth) is the final He.

The Earth is a Perpetual Choir in the solar system orchestra. Just as one stone circle on Earth is a cosmic Record, angelically recorded for Man, and just as individual stone circles are instrumental members of the planetary orchestra and all performing their parts of the overall solar symphony, so Gaia Herself is a planetary Record for those Above. Gaia is one Note singing proudly in the infinite space, finding its intended, necessary, and appropriate niche in the Music of the Spheres. When all the stone circle records are attuned, when the 12 Oroboric Lines resonate in equal measure through Avebury Circle, and when the necessary crystalline spirit needles are positioned throughout the Earth Record, then Gaia can sing He to the angels in Heaven.

This is the meaning of reciprocal harmonics. This is Adam's Geomancy. When Gaia sounds Her He in the Choir of the solar system, then the solar harmonic is completed. Then the solar octave is registered, every note, and altogether. Then everything begins to vibrate at a faster rate and the Solar Logos sounds His Note in the Galactic Choir—and so forth, into Infinity, as far as we're concerned.

This is why all the attention is focussed today on the Earth, on Her Grid. This is why the Space Brothers touch down so visibly into our third dimension, why so much interdimensional channelling (from Ascended Masters and angels, in particular) is happening today, why the Angelic Kingdom is returning to credible human awareness, why the Grid is coming into focus.
Everyone is waiting for us.

The Earth is one note in the solar choir. When Earth sounds Her He in the Choir, the light harmonic of this Star Evolution will be completed, in turn completing a more exalted light harmonic of which it is a part. The Earth and our King Sun are about to receive a major solar/spiritual initiation, one which will inaugurate a new Light valency, a new electromagnetic spectrum, which will be experienced by us as a quantum leap away from materialized consciousness into the free-floating fourth dimension.

This may sound remote, abstract, and unbelievable, too far away from ley lines, and therefore not worthy of our concern. Why should we be concerned, anyway?

Some time ago, it is believed, Hermes handed over his role as Gaia's Master Geomancer to his spiritual brother, the Archangel Michael. Michael, among other responsibilities, is called The Keeper of the Secrets of the Relations between Heaven and Earth; He is also the Tone Bearer for Earth and the Standard Bearer for the Christ, who is Adam's full potential, the source of the hologram of the Human. Michael approaches Gaia now with his Sword of Spirit poised for the initiatory stroke. Already He has touched Gaia at the apex of Her fire/tetrahedron at Mt. Balsam Cone, North Carolina. Gaia's inner heart at Avebury is scheduled for imminent reactivation. The Grid, under structural reassessment, is also about to be "switched back on", full power, but at a higher vibrational rate. Theoretically, the Domes and Elohim will return. The ancient British festival of Michael Mass (known traditionally as Michaelmas, September 29) will be radically enriched in planetary meaning.

Both Gaia and Adam will remember the Blazing Star set as an imperishable Seed of Knowing and Bliss within their planetary and human bodies. We must again embody Adam (as the Blazing Star buried in the Blood of Earth) inhabiting Gaia (as the Blazing Star buried in the Clay of the Mother).

What will happen then? Anti-gravity! There will be a new Light/Life spectrum for Adam and Gaia, resulting in a change in, even transcendence of, the ancient gravitational field holding us down with iron guy-wires to the physical plane of Earth awareness. Recently a new elementary substance was discovered; it was found to have possible anti-gravity properties and was named levitonium. The scientists speculated that levitonium might be capable of powering rockets out of the Earth's gravitational field.

With a small measure of British-earned cheekiness, I now
propose a term to describe the possibilities of anti-gravity within the terms of human experience: levitony. Levitony is a species of giddiness inspired by the angels—Elohim, if you like. It is an attitude, perhaps archetypal, of giggling detachment that lifts us right off the Earth in a free-floating feather of amusement and mirth, defying gravity, defeating the seriousness, the weightiness, the heaviness, of Earth life as we know it—those familiar "astrophysical consciousness parameters".

Levitony, I suggest with a cirrus-like grin, is native to our constitution, something we were naturally born with. With the buoyancy of levitony we will glide in Adam's transfigured Light Body high above dear Gaia and we will note She, too, is again looking pristine and sparkling in Her blazing light. She, too, once again, has become our Garden of Eden.

**About the Author**

Richard Leviton is the author of *Joseph’s Seed*, the first volume of a trilogy about the relations between mythology, the megalithic landscape, and transformations in consciousness—under the general title of *Looking for Arthur*. He is also author of *Fraser’s Angel*, a visionary tale about the adventures of a young boy travelling in the angelic realms. Both titles are published in 1987. Since early 1984 Leviton has lived in Somerset, England, where he has researched firsthand the subjects of geomancy and geomythics. He is also Contributing Editor for *East West* magazine in Boston, Massachusetts. For correspondence, please direct inquiries to: Richard Leviton, 8 Skinner Lane, South Hadley, MA 01075.
INTERNATIONAL HARMONY BASED UPON A
MUSIC OF PLANETARY GRID SYSTEMS

by Barbara Hero
This paper will propose a method of correlating Earth Grid systems with specific musical notes, by a
process of translating length to frequencies which can then be translated to musical notes.

A method of octave expansion and octave reduction was used to determine the specific
frequency of a note.

When this theory is applied to the relationships of countries to sounds, a way of increasing
harmony between
countries can be suggested by knowing a key note of the distance between them.

A correspondence with Pythagorean Lambdoma of seven rays is suggested.

In September of 1983 I received a letter from Governors State University in Illinois requesting
submission of in-
formation or research on a project called THE PLANETARY GRID SYSTEM. I wrote back a note
saying that
perhaps I could help by identifying the musical interval of the modular grid system if there is a module
that has
been determined in length. Then, a year later in December, 1984, Bethe Hagens and William Becker sent
a copy
of the magazine Pursuit which featured their research. And in this article the distances in miles of the
grid
system they devised was given, so that I could get to work to determine certain musical relationships. I
sent a let-
ter detailing these relationships. After receiving my letter Bethe Hagens replied:

Thank you so much for your letter. I wanted you to know that we had received it. I am
kind of
stunned by what you have found in the grid — and your political interpretations. It's one
of the
most fascinating responses we've ever received. I don't know that I told you, but I am a profes-
sional violinist when I am not being an anthropologist. Your work in harmonics begins
to get at
something I have felt intuitively must exist but had no way to express.

... I have not had the time to sit with your letter and really absorb it. I will write again
once I
have something intelligent to say. Again, thanks so much for writing.

The Becker-Hagens report presented a theory of the growing structure of the earth, from the
tetrahedron, oc-
tahedron, cube, icosahedron, and dodecahedron. These are the Platonic solids attributed to
Pythagoras (500
B.C.). The dodecahedron and icosahedron together, Becker and Hagens found to be the grid system of
our pre-
sent age. When the line arrays of each of these solids is overlaid on a sphere, a grid emerges which they
contend
is a pattern the ancient peoples used for becoming one with the earth.2

Briefly, factors to consider when calculating the harmonic implications between countries, cities, or
villages in-
clude the following:

• What is the great circle distance in miles between two points on the grid system?
• What are the major apex points?
• Is the assumption that Giza is the major point valid, or has the energy changed since the building
  of the
  Great Pyramid?
• Are significant places in history nodes of the grid system?
• Are fault lines energy lines?
• Are mountain ranges energy lines?
• What is the difference between the fault lines and the mountain range lines in terms of
  energy?
• Could certain distances portend problem areas in terms of harmonies?

The Becker-Hagens report mentioned the Twelve Devils' Graveyards Around the World (Saga Magazine,
1972)
where magnetic and energy aberrations were located. These are found zig-zaging the equator at 30 degrees
above
and 30 degrees below the equator.

Using an "Atlas" software computer program, Robert Foulkrod found the distance in miles to be 4264
miles
between adjacent "Graveyards." The corresponding musical frequency based on the speed of sound in
air
0.0000502 cps. By octave expansion to the middle "C" octave (multiplying by 2 to the "n" number of
times),
this translates to a musical note of "A". This particular distance or musical note might be an indication
of
disharmony between countries, if, indeed, distance is a factor.
The Becker-Hagens report sets the kite shaped grid dimensions as 1400 miles (short end of the kite), 2200 miles (the outside kite length), and 2600 miles (the brace down the middle of the kite). The musical notes are "E flat", "A flat", and "F", respectively. The latter note represents the distance between Gomel in the Soviet Union and
Sebha in Libya. Therefore the musical sound of "F" at 345 cps might be accentuated for harmony between these two countries.

The Becker-Hagens report mentioned the theory by Sinkiewitz who claimed that the present energy grid system is out of alignment with the ancient grid system, and that New Age Spiritual communities around the globe are rediscovering the new grid and building sacred sites to activate them.

The Aleutian Islands have been predicted to be the new North Pole. See Figures 1, 2, 3, 4, & 5. What is the distance involved when a diamond of a 70 degree apex is overlaid on the new North Pole, and the legs of the diamond terminate at the Equator? This is the shape which some have found intuitively very emotionally responsive as if from a long forgotten past.

Figures 1, 2, 3, 4, 5, & 6. Some Visual Ways of Interpreting musical intervals, as a prelude to applying to planetary grid system.
The method of determining the frequency of a distance is based on formula in physics which is stated in the letter to Becker-Hagens.

\[ v = fw \]

where \( v = (1130) \) the velocity of sound in air at room temperature in ft/sec, 
\( f \) = frequency in cycles/sec or Hertz 
\( w \) = wavelength or distance in feet.

Because of the nature of the inverse properties of wavelength and frequency, the frequency and wavelength can be found if one knows the speed of sound for the material through which the sound travels.

Through the oceans the speed of sound would be faster and hence create a different musical note. The speed could have been taken to be the speed of sound through granite for mountainous ridges, and a different velocity in valleys, which would be of a less dense material. In valleys sound would travel slower than in the mountains, and slower still in air. One could assume that in earthquake faults the sound would travel even faster as the density of the entire earth would be a factor, it would seem, if in fact the earth is denser and not hollow. If the earth were hollow, as has been presented by some, sound would not travel in a vacuum, and would turn to light, since light and sound are on the same spectrum separated only by our measuring sound in frequency and light in wavelength. Light would travel faster in a vacuum, slower in air, slower still in water and become sound in a dense, non-transparent medium.

The note relating two cities or sites can readily be determined by the formula described earlier. When a third city or site is added one can readily determine whether the three are in harmonic accord by using a long forgotten method of determining geometrically and algebraically the arithmetic, geometric and harmonic means.

To illustrate, take the distance from a to b to be a given length in miles, then take a distance from one of these sites to another. Put the resulting lengths end to end, bisect them and draw a circle from the halfway mark. Draw a line orthogonal to the diameter of the circle at the point on the line of the first city or site. Where this line meets the circle determines the geometric mean. Then draw a line from this point on the circle to the center of the circle. This is the arithmetic mean, and the radius of the circle. Drawing a line orthogonal to this radius stretching to the first site defines the harmonic mean. These distances can be translated into sounds which would be harmonious with each one of the cities.

For example, let us take the distance between Gomel and Timbuktu of 1400 miles, and Timbuktu to Great Zimbabwe of 2200. Lets add these in one line making a total of 3600 miles, which bisected equals 1800 miles.
The arithmetic mean would equal 1800 miles a "B" musically. The geometric mean would equal the square root of (2200 x 1400) or 1755 miles, a "C" musically and the harmonic mean 2 x (1400 x 2200) / (1400 2200), which equals 1711 miles, a "C#" musically. The length between the first two cities of 1400 is an "E flat", and the length between the second and third cities of 2200 is an "A flat". The cities exhibit an interval of a fourth between them or "A" to "E flat", which is a common harmonic used musically.
A "key note" of a country could be determined by means of a Lambdoma diagram (a Pythagorean model). See Figure 6, References 3 through 8. The apex of the Lambdoma diagram is divided equally as the diagonal down the center of the x and y axis. The diagonal has a ratio of 1:1, so that whatever the distance is along the diagonal of the grid would be its "key note". For example Gomel in the Becker-Hagens grid has seven rays radiating from the apex point, and the diagonal which represents the "key note" extends from Gomel to El Eglab, 2600 miles, an "F" musically. From Cairo to London is 2183 miles, a "G#".

Each of the rays of the grid would exhibit a unique energy, and much work has to be done to determine the quality of these differing energies. See Figures 7 & 8. In the case of the earth the circumference of the earth should be taken into account as a reference distance and frequency, the circumference is 24,860 miles. This is equivalent to a "D" musically (in air).
This table shows the numerical (ratio) relationships of whole numbers to specific intervals in music. When reading across the rows from left to right an undertone series results. When reading up the columns beginning at the lower left an overtone series results. Superscripts indicate the octave above middle C, and subscripts indicate the octaves below middle C.
Figure 15. Lissajous Figures. Detail of a 5x8 Lambdoma Matrix representing an earth grid evolution as defined by Pythagorean intervals in sounds. The individual patterns shown are "Lissajous" patterns formed by whole-number ratios between a fundamental tone and its overtones and/or undertones. Computer program by Robert Foulkrod, programmed in "Basic" language on an IBM PC Jr.

Envision these Lissajous Figures arrayed on the Lambdoma Diagram matrix (Fig. 12) as a progressive series of grid lines encircling the globe of earth, each shape sounding its specific interval.
In conclusion, if the earth is in transition in terms of developing into a new phase of grid lines, this factor might indicate a shift of energy or frequency at different places on the earth. See Figure 9. The grid patterns would then take on different distances. See Figure 10. We might ask how can we as humans help the earth in this transitory phase?

First, recognizing that harmonies between cities or countries is based upon attunement to each other's energy patterns. Most of all let us attune ourselves to the earth's energies, recognizing the oneness of all things in our material universe, and learning the importance of sound as a manifestation of different realities. Any grid system has to have distance as one of the factors, since wavelength is inherent in all sound vibrations, as the inversion of frequency. Even though we cannot hear the specific frequency of a grid line, the interval quality is present though inaudible. So let's make them audible.

ACOUSTIC LEVITATION OF STONES

by

Bruce L. Cathie

author of

The Energy Grid
The Bridge to Infinity
The Harmonic Conquest of Space
Monastery construction, Tibetan style according to Swedish Designer Henry Kjellson. The steep mountain side is on the right. In the centre is the stone block, and on the left are the priests and musicians. S=big drum, M=medium drum, T=trumpeter. Inset shows method of suspending drum, and gives an idea of its size. As shown here, Kjellson says, the 200 priests are waiting to take up their positions in straight lines of 8 or 10 behind the instruments, 'like spokes in a wheel.' Unlikely as it may seem, this operation has an intriguing precision, made slightly more so by Kjellson's meticulously detailed description.

Tibetan Monks levitate stones by using an acoustic levitation technique with the aid of drams in this 1939 sketch by Swedish aircraft designer Henry Kjellson.
A New Zealand scientist recently gave me an intriguing extract from an article published in a German magazine, relating to a demonstration of levitation in Tibet. After obtaining a translation by a German journalist, in English, I was amazed at the information contained in the story, and was surprised that the article had slipped through the suppression net which tends to keep such knowledge from leaking out to the public. All the similar types of stories that I had read up until now were generally devoid of specific information necessary to prove the veracity of the account. In this case a full set of geometric measurements were taken, and I discovered, to my great delight, that when they were converted into their equivalent geodetic measures, relating to grid harmonics the values gave a direct association with those in the unified harmonic equations published in my earlier works.

The following extracts are translations taken from the German article: ‘We know from the priests of the far east that they were able to lift heavy boulders up high mountains with the help of groups of various sounds... the knowledge of the various vibrations in the audio range demonstrates to a scientist of physics that a vibrating and condensed sound field can nullify the power of gravitation. Swedish engineer Olaf Alexanderson wrote about this phenomenon in the publication. Implosion No. 13.

The following report is based on observations which were made only 20 years ago in Tibet. I have this report from civil engineer and flight manager, Henry Kjelson, a friend of mine. He later on included this report in his book, The Lost Techniques. This is his report:

A Swedish doctor, Dr Jarl, a friend of Kjelsons, studied at Oxford. During those times he became friends with a young Tibetan student. A couple of years later, it was 1939, Dr Jarl made a journey to Egypt for the English Scientific Society. There he was seen by a messenger of his Tibetan friend, and urgently requested to come to Tibet to treat a high Lama.

After Dr Jarl got the leave he followed the messenger and arrived after a long journey by plane and Yak caravans, at the monastery, where the old Lama and his friend who was now holding a high position were now living.

Dr Jarl stayed there for some time, and because of his friendship with the Tibetans he learned a lot of things that other foreigners had no chance to hear about, or observe.

One day his friend took him to a place in the neighbourhood of the monastery and showed him a sloping meadow which was surrounded in the north west by high cliffs. In one of the rock walls, at a height of about 250 metres was a big hole which looked like the entrance toa cave. In front of this hole there was a platform on which the monks were building a rock wall. The only access to this platform was from the top of the cliff and the monks lowered themselves down with the help of ropes.

In the middle of the meadow, about 250 metres from the cliff, was a polished slab of rock with a bowl like cavity in the centre. The bowl had a diameter of one metre and a depth of 15 centimetres. A block of stone was manoeuvred into this cavity by Yak oxen. The block was one metre wideand
one and one-half metres long. Then 19 musical instruments were set in an arc of 90 degrees at a distance of 63 metres from the stone slab. The radius of 63 metres was measured out accurately. The musical instruments consisted of 13 drums and six trumpets. (Ragdons).

Eight drums had a cross-section of one metre, and a length of one and one-half metres. Four drums were medium size with a cross-section of 0.7 metre and a length of one metre. The only small drum had a cross-section of 0.2 metres and a length of 0.3 metres. All the trumpets were the same size. They had a length of 3.12 metres and an opening of 0.3 metres. The big drums and all the trumpets were fixed on mounts which could be adjusted with staffs in the direction of the slab of stone. The big drums were made of 3mm thick sheet iron, and had a weight of 150 kg. They were built in five sections. All the drums were open at one end, while the other end had a bottom of metal, on which the monks beat with big leather clubs. Behind each instrument was a row of monks. The situation is demonstrated in the following diagram:

When the stone was in position the monk behind the small drum gave a signal to start the concert. The small drum had a very sharp sound, and could be heard even with the other instruments making a terrible din. All the monks were singing and chanting a prayer, slowly increasing the tempo of this unbelievable noise. During the first four minutes nothing happened, then as the speed of the drumming, and the noise, increased, the big stone block started to rock and sway, and suddenly it took off into the air with an increasing speed in the direction of the platform in front of the cave hole 250 metres high. After three minutes of ascent it landed on the platform.

Continuously they brought new blocks to the meadow, and the monks using this method, transported 5 to 6 blocks per hour on a parabolic flight track approximately 500 metres long and 250 metres high. From time to time a stone split, and the monks moved the split stones away. Quite an unbelievable task.

Dr Jarl knew about the hurling of the stones. Tibetan experts like Linaver, Spalding and Hue had spoken about it, but they had never seen it. So Dr Jarl was the first foreigner who had the opportunity to see this remarkable spectacle. Because he had the opinion in the beginning that he was the victim
of mass-psychosis he made two films of the incident. The films showed exactly the same things that he had witnessed.

The English Society for which Dr Jarl was working confiscated the two films and declared them classified. They will not be released until 1990. This action is rather hard to explain, or understand. : End of trans."

The fact that the films were immediately classified is not very hard to understand once the given measurements are transposed into their geometric equivalents. It then becomes evident that the monks in Tibet are fully conversant with the laws governing the structure of matter, which the scientists in the modern day western world are now frantically exploring. It appears, from the calculations, that the prayers being chanted by the monks did not have any direct bearing on the fact that the stones were levitated from the ground. The reaction was not initiated by the religious fervour of the group, but by the superior scientific knowledge held by the high priests. The secret is in the geometric placement of the musical instruments in relation to the stones to be levitated, and the harmonic tuning of the drums and trumpets. The combined loud chanting of the priests, using their voices at a certain pitch and rhythm most probably adds to the combined effect, but the subject matter of the chant, I believe, would be of no consequence.

The sound waves being generated by the combination were directed in such a way that an anti-gravitational effect was created at the centre of focus (position of the stones) and around the periphery, or the arc, of a third of a circle through which the stones moved.

If we analyse the diagram published with the original article, then compare it with the modified diagram, we become aware of the following coordinates, and the implications, when compared with my previously published works.

The distance between the stone block and the central pivot of the drum supports is shown as 63 metres. The large drums were said to be one and one half metres long, so the distance from the block to the rear face of each drum could be close to 63.75 metres considering that the pivot point would be near the centre of balance. My theoretical analysis, by calculator, indicates that the exact distance would be 63.7079 metres for the optimum harmonic reaction. By mathematical conversion we find that this value is equal to 206.2648062 geodetic feet, which is harmonically equal to the length of the earth's radius in seconds of arc (relative to the earth's surface) 206264.8062. This also leads us to the following associations:

\[(206.2648062 \times 2) = 412.5296124\]

This number squared:

\[= 170180.68\] which is the theoretical harmonic of mass at the earth's surface.

The four rows of monks standing behind the instruments in a quarter circle added to the production of sound by their loud chanting and must be taken in to account in regards to the geometric pattern. If we assume that they were standing approximately two feet apart, we can add a calculated value of 8.08865 geodetic feet to the radius of the complete group. This gives a maximum radius of:

\[214.3534583\] geodetic feet.
The circumference of a complete circle with this radius would be: 1346.822499 geodetic feet.
Which is a half harmonic of: 2693.645 (unified field)
The distance from the stone block to a calculated point within the cliff face and the height of the ledge on the cliff face from ground level is given as 250 metres. If we can now imagine that the raised stone blocks pass through a quarter arc of a circle during their flight from ground level to the hole in the cliff face, then the pivot point of the radius would be coincident with this position. See diagram.
The theoretical radius was found to be: 249.8767262 metres which very closely approximates the estimate.
This converts to: 809.016999 geodetic feet.
The diameter of the full circle would therefore be: 1618.034 geodetic feet.

A circle with this diameter has a circumference of 5083.203728 units, which can be divided into three even lengths of 1694.4. It therefore appears that the levitated blocks, once resonated to a certain frequency, would tend to carry out a flight path that is coincident to one third of a circle. The spacial distance being equivalent to the mass harmonic at the centre of a light field, 1694443.

The instruments used by the group, in theory, would also have been tuned to produce harmonic wave forms associated with the unified fields. The given measurements are in rounded off parts of a metre but in practice some slight variations from these measurements would be expected in order to create the appropriate resonating cavities within the instruments. The geometric arrangement, and the number of instruments in the group would also be a most important factor.

If the given measurement for each type of drum is modified fractionally and converted to its geometric equivalent an interesting value for the cubic capacity is evident.
The large drums:
1.517201563 metres long, 1.000721361 metres wide
= 58.94627524 geodetic inches long, 38.88 geodetic inches wide.
= 69984 cubic geodetic inches capacity
= 40.5 cubic geodetic feet capacity.
Therefore the cubic capacity for eight drums:
= 324 cubic geodetic feet.
This harmonic value is built into the world grid and is equal to half the harmonic 648.
The medium sized drums:
1.000721361 metres long, 0.695189635 metres wide
= 38.88 geodetic inches long, 27.00948944 geodetic inches wide
= 22276.59899 cubic geodetic inches capacity
= 12.89155034 cubic geodetic feet capacity.
Therefore the cubic capacity for four drums:
= 51.56620136 cubic geodetic feet.
As the dish-shape was focussed upwards towards the stone block to be levitated it would be expected that some type of reaction would take place, which had an effect on the mass. The geometric shape of the cavity does seem to be engineered in such a way that the projected frequency vortex causes a reciprocal reaction to the mass harmonic of each block. The reciprocal of:

\[
0.484813682
\]

\[
= 2.062648055
\]

Twice this value:

\[
= 4.12529611
\]

The square of this value:

\[
= 17.018068 \text{ (the harmonic of mass at the earth's surface, 17018068)}
\]

I believe that there is not much doubt that the Tibetans had possession of the secrets relating to the geometric structure of matter, and the methods of manipulating the harmonic values, but it we can grasp the mathematical theory behind the incident, and extend the application, then an even more fascinating idea presents itself.

In my last book I mentioned the flying machines described in ancient records, that flew through the air with a melodious sound, and theorised that the sonic apparatus was tuned to the harmonic unified equations.

Now the Tibetans have given us a direct indication of how to construct a sonically propelled anti-gravitational flying machine. All that is necessary is to complete the circle of sonic generators, indicated by the drums, trumpets, etc., and we have a disc which creates an anti-gravitational lifting force at the centre, (see diagram 23).

To create this diagram I made four photo-copies of the original illustration showing the arrangement of drums, trumpets etc. and then cut out the 90 degree segments and fitted them together into a circular pattern. This was then photo-copied a second time in the relationship with a disc-shaped vehicle. When the circular pattern was formed it became evident that the Tibetans had placed the drums and trumpets on the arc of a quarter circle, but the placement of the Priests behind the drums tended to form a spiral. This conforms with the concept of the formation of matter due to the spiralling, vortexual, wave motions in space, discussed in my earlier works. Similar wave motions would have to be created in order to manipulate matter.

The inner diameter of the sonic generators in the theoretical vehicle would be 412.5296 geodetic feet, with the previously described harmonic associations. The outer diameter, estimated from the placement of the Tibetan priests, would be 428.7069166 geodetic feet. If we square the inner diameter we have the harmonic of mass 17018068 relative to the earth's surface, and the outer diameter would give a circumference tuned to the unified equation. The lift vectors through the centre would resonate at
harmonic frequencies in opposition to the mass value at the centre of a unified, or light, field = 1694443.

From this it would appear that a vehicle could be constructed that would resonate at frequencies in sympathy with the unified fields demonstrated throughout this work.

It is my opinion that our own scientific establishments are far ahead in this type of research, and that many experimental vehicles have already been constructed. High frequency generators have probably taken the place of the low frequency sonic methods, and electronic systems produced which would allow complete control of movement.

With this type of research going on, I would say that the days of the conventional aeroplane are numbered.

DIAGRAM 22

Showing relationship of Priests, drums and stone blocks, to the hole in the cliff face.
Diagram showing how the geometric pattern of sonic generators created by the Tibetan Monks can be combined in a circular, or disc, shape, the resultant forces of the harmonic fields set up would combine into a doughnut shaped anti-gravitational field which would levitate the disc, or vehicle.

412.5296 squared = 170180.68 = mass harmonic
428.7069166 diameter = circumference of 1346.822499
= half harmonic of 2693.645 (unified equation)

Tesla at his Colorado Springs laboratory, 1899.
SCALAR WAVES AND TESLA SHIELDS: NIKOLA TESLA--FATHER OF STAR WARS?
THOMAS BEARDEN'S DIAGRAMS OF LONGITUDINAL WAVE INTERFERENCE:
ACCORDING TO BEARDEN, THESE RADIO WAVES, KNOWN AS SCALAR WAVES, ARE FAR MORE DISTRUCTIVE, AND EASY TO USE THAN LASERS. IS THIS THE REAL SYSTEM THAT THE USA PLANS TO PUT IN SPACE?
In recent years the proposal of a "Star Wars" system in space has gained a great deal of momentum and controversy. This proposed system is said to be the ultimate system to insure the security of the United States--and the world, at least by those who propose it. Those fighting against it maintain that it is not technically feasible.

Supporters in the Reagan Administration propose a system that would work like this: when Soviet ICBM missiles, loaded with their nuclear payloads, are launched at the U.S., the "Star Wars" system, hovering in space, would fire super-high powered Lasers at the missiles while they are still in the air, thereby disabling them. These super-high powered Lasers would be powered by small atomic explosions within the "Star Wars" satellites themselves.

Critics charge that Laser technology has not advanced enough to enable the United States, or any country, to pull off such a feat. Yet another alternative rarely discussed in the media is available, and it is a technology fifty years old, invented by Nikola Tesla, the electrical genius who lit the world: Scalar Waves!

Scalar Waves are a form of radio waves creating what is known as Longitudinal Wave Interference. Where two Scalar Waves meet, an energy bottle is created which disintegrates all matter within that bottle, producing what is in effect a miniature atomic explosion but without any resulting radiation.

Thomas Bearden, a retired Pentagon war games expert and active consulting engineer to the Defense Department, has written a number of papers on Scalar Wave systems and often lectures on Scalar Waves at Alternative Energy conferences. According to Bearden, the Soviets are way ahead of the U.S. in Scalar Wave technology and are already using it against the U.S.

Scalar Wave technology is apparently very real and deadly. Furthermore, it is a great deal more simple to use than Lasers, far more effective, and does not require mini-atomic explosions to power it. Is it possible that Scalar "Howitzers," as Bearden calls them, is the real system that the Pentagon would like to put into space? What applications might such a system have?

The Pentagon has insisted so far that their proposed "Star Wars" program is entirely defensive, designed to protect the U.S. from a nuclear attack. Incredibly, Ronald Reagan even said in a press conference once that after the United States had built their "Star Wars" system, they would give it to the Russians, who would then build their own system in space, so the world would be theoretically safe from nuclear war for ever more! Reagan later said in another news conference that maybe this
WHERE TWO SCALAR WAVES MEET, AN ENERGY BOTTLE IS CREATED, AND ALL MATTER WITHIN THAT BOTTLE IS DISINTIGRATED. MORE EFFECTIVE THAN LASERS? WHAT IS THE REAL PURPOSE BEHIND STAR WARS?
wasn't such a good idea after all.

When a "Stars Wars" system using Scalar Wave technology is activated, its uses are in fact more "offensive" than "defensive." If Scalar Wave weapons are real, they are a weapon of such incredible power and versatility, then no one on our planet would be safe from them. Given the proper coordinates, the Scalar transmitters located on satellites in space could disintegrate any target on the planet, be it a missile, enemy base, rioting city district, farm house or persons gathering in a park. Such a "Star Wars" system would be a literal "Death Star" in space! Its uses could be population control, extermination, and military domination of an entire planet. George Lucas may be more of a prophet than he realizes.

On the brighter side, Scalar Waves can be warped into a dome around objects, such as cities or houses (publishing companies included). Such a Scalar Wave force field is generally known as a Tesla Shield, and it would be analogous to the "shields" referred to in the popular "Star Trek" series. Tesla Shields have a definite defensive application, and could not in any way be used for offensive purposes (although a platoon of soldiers charging into a Tesla Shield would be instantly disintegrated). The only defense from a blast of a Scalar Wave Howitzer would be a Tesla Shield. Therefore, those persons wishing to use Scalar Waves on an unsuspecting population would rather that they were unaware of this technology, and thereby unable to protect themselves by use of the same technology. Is this the reason that the Pentagon does not discuss Scalar Wave technology, but rather maintains that they are going to use impractical Laser technology instead?

Scalar Wave Technology is straight out of science-fiction, yet it was invented more than fifty years ago by Nikola Tesla (see the article by Nikola Tesla in The Anti-Gravity Handbook). Another interesting application of Scalar Wave technology is its use in "Light Sabers." If a Scalar Wave emanates from a grippable handle and then is bent back on itself, it would become exactly like a "Light Saber" as depicted in the "Star Wars" movies featuring Jedi Knights (written and produced by George Lucas).

Are Scalar Waves a real technology? Do the Soviets have this technology? Assuredly so. The Americans do as well. The secret American base at Pine Gap in Central Australia is said to have two Scalar Wave towers in it already. We urge readers to read some of the biographies of Nikola Tesla. Does the Pentagon really plan to put Scalar Wave Howitzers into space? If so, is it purely for defensive purposes? In the following articles and diagrams, the reality of Scalar Waves will be demonstrated.
BEARDEN'S IDEA OF A SCALAR WAVE-TESLA HOWITZER IN ACTION. IMAGINE THIS SYSTEM HOVERING ABOVE OUR PLANET IN SPACE-THE U.S. MILITARY WOULD RATHER THAT YOU DIDN'T. NOTE THE TESLA SHIELD AT THE BOTTOM OF THE DRAWING. A TESLA SHIELD IS ESSENTIALLY A SCALAR ENERGY BOTTLE WARPED AROUND AN OBJECT, SUCH AS THE SCALAR HOWITZER ITSELF OR EVEN A CITY, CREATING AN INPENETRABLE FORCE FIELD.
Was Edison adversary father of 'Star Wars'?

By James Coates
Chicago Tribune

COLORADO SPRINGS, Colo.—Giants have trod the ground here. Zebulon Pike, legendary explorer of the unknown West, gave his name to the majestic white-capped peak just outside of town.

President Dwight Eisenhower came here to carve America's ultimate nuclear war command center, the awesome North American Aerospace Defense Command [NORAD] bunker, into the granite underneath Pike's Peak's neighboring summit, Cheyenne Mountain.

Most impressive of all, the man who invented radio and who discovered the way that the world transmits its electrical power did much of his creative work here.

But, wait. Weren't we taught that radio was invented by an Italian named Guglielmo Marconi? And that the legendary Thomas Alva Edison devised today's electrical power system in his New Jersey laboratories?

"We were taught wrong," said Toby Grotz, president of the International Tesla Society based here in honor of a little-known but flamboyant genius named Nikola Tesla.

Two years before Marconi demonstrated his wireless radio transmission, Tesla, a naturalized Yugoslavian immigrant, performed identical feat at the 1893 World's Fair in Chicago.

On June 21, 1943, in the case of Marconi Wireless Telegraph Co. vs. the United States the Supreme Court ruled that that Tesla's radio patents had predated those of the Italian genius.

To be sure, Edison invented the incandescent light bulb. But he powered it and all of his other projects with inefficient direct current [DC] electricity.

It was Tesla who discovered how to use the far more powerful phased form of alternating current [AC] electricity that is virtually the universal type of electricity employed by modern civilization.

And now, there are indications that Tesla also discovered many of the devices which the United States military-industrial complex is seeking to develop and build for the Pentagon's controversial Star Wars antimissile defense system.

Grotz and other Tesla experts speculate that recent puzzling reports of immense clouds forming within minutes over Soviet arctic territory are indications that the Soviet Union is testing devices for transmitting energy over long distances developed nearly a century ago by Tesla.

Of particular interest to Tesla researchers, said Grotz, is a widely reported April 9, 1984, event in which at least four airline pilots reported seeing an eruption near Japan that appeared to be a nuclear explosion cloud that billowed to a height of 60,000 feet and a width of 200 miles within just two minutes and enveloped their aircraft.

In late July the Cox News Service reported that all four of these planes had been examined by the U.S. Air Force at Anchorage, Alaska, and were found to be free of radiation despite the fact they had flown through the mysterious cloud in question.

Grotz said that such clouds could form...
that foolish U.S. bureaucrats shipped the secrets needed to build Star Wars that Tesla discovered to communist-controlled Yugoslavia shortly after World War II, thereby allowing the Soviets an enormous head start in the quest for a particle beam weapon that is deemed essential to building any missile shield.

In an interview between sessions at this August's Tesla symposium, Groetz claimed that Tesla was drawn to Colorado Springs because he needed both the dry climate and the famously powerful lightning storms that so often come tumbling down the sides of Pikes Peak and Cheyenne Mountain.

"Tesla dreamed of supplying limitless amounts of power freely and equally available to all persons on Earth," said Groetz.

And he was convinced he could do so by broadcasting electrical power across large distances just as radio transmits far smaller amounts of energy, explained Groetz.

The same energy beams, of course, could be directed at the speed of light to destroy enemy planes and missiles as well as to supply electricity, he noted.

Such investigations take one into the realm of the most complicated question facing science today, the so-called Unified Field Theory. Albert Einstein himself confessed was beyond his abilities, acknowledged Groetz, an engineer for the Martin Marietta Aerospace company in Denver.

Tesla believed that he could broadcast power by producing vibrations in the atmosphere that were perfectly in phase with the natural vibrations that exist in thunderstorms, said Groetz.

Then, anyone with a receiver could simply tap into broadcasts and acquire electricity just as they receive radio or TV broadcasts.

On a hilltop just where the prairies sweep up to the foot of the Rockies, Tesla erected a gigantic version of what is known as the Tesla Coil, a device that produces dramatic arcs of electricity by rapidly changing its resistance.

Nearly every natural history museum and high school physics lab in the world sports a Tesla Coil capable of making delighted students stand on end or of arcing dramatic sparks from the fingertips of someone who, standing firmly on a rubber mat, holds the other hand over the coil's top.

At the corner of Footh and Kowia streets in Colorado Springs, Tesla erected a coil 122 feet high. Tapping into the entire city electric system, the electrical current sent millions of volts of current into the structure and bolts of man-made lightning leaped as much as 130 feet into the brooding sky to mingle with other bolts created in nature.

The first time he threw the switch, the entire city was blacked out...a campaign to discredit AC by emphasizing its dangers, according to Tesla biographer Margaret Cheney in her "Tesla, Man Out of Time.

Edison would force dogs and cats to stand on steel plates energized by AC current and then throw a switch, electrocuting them. He called the process "Westinghousen." Cheney wrote. Ultimately Tesla lost out to Edison and other foes, even though his AC power system prevailed.

The visionary died in 1943 in a New York hotel room he shared with several pigeons that he considered his only friends, the biographer said.

After the war, Tesla's relatives in Yugoslavia petitioned Washington to receive 17 trunks of papers and laboratory equipment that he had stored in a New York garage.

In 1952 these items were sent to Belgrade where they are housed in a Tesla museum. But, said Groetz, "What do you suppose are the chances that everything was first copied by the Red?"

"In the USA we don't even give him credit for inventing the radio and the Soviet bloc is building Tesla museums," said the engineer.

"Why do they respect him so much?"
Artist's conception of "cosmic ray" guns planned by U.S. scientists. Unless we can come up with weapons more advanced even than the Russian N-bomb, we can be subjected to "atomic blackmail" and subjugated by the communists.

TESLA SHIELDS AND SCALAR WAVE BEAM WEAPONS ARE NOTHING NEW. THIS DRAWING IS REPRINTED FROM AN ARTICLE IN THE NOVEMBER, 1961 ISSUE OF POLICE GAZETTE ENTITLED, "WHY U.S. MUST BEAT RUSSIA'S DEATH RAY BOMB." (The article was in fact about Neutron Bombs, a topic that was to surface again more than fifteen years later! Is our technology really that far behind, or is this just what the government would have us believe?)
TESLA SCALAR WAVE SYSTEMS:
THE EARTH AS A CAPACITOR
by Richard L. Clark

Nikola Tesla engineered his communications and power broadcast systems based on the Earth as a spherical capacitor plate with the ionosphere as the other plate. The frequencies that work best with this system are 12 Hz and its harmonics and the "storm" frequency around 500 KHz. The basic Earth electrostatic system and the basic Tesla designs are shown in the figure below. All lengths or circuits must be one-quarter wavelength or some odd multiple of it.

The elevated capacitor has really "two functions. Capacity to Ground (Cg) and Capacity to Ionosphere (Ci). The bottom plate only to ground is Cg, and both plates are Ci. L2 and C3 are a resonant stepdown air core coupling system at the desired frequency. Simple calculations will allow resonant frequency values to be determined from the Tesla Equivalent Circuit diagram. Be extremely careful of the high voltages in this system.

Soviet Union claims it can neutralize U.S. 'Star Wars'

MOSCOW (UPI) — The Soviet Union says it can deploy cheap and effective countermeasures to neutralize the "Star Wars" space-based defense system, a senior Soviet nuclear scientist said today.

"We cannot allow it (an effective 'Star Wars' system)," Vitaly Goldansky, a member of the Academy of Sciences and the Committee of Scientists for Peace, told a Moscow news conference.

"If we want to talk concretely about technical measures to be taken to neutralize this defense, it is very clear first and foremost, that it is much easier to neutralize stationary objects launched into orbit rather than fast moving objects like nuclear missiles," Goldansky said. "This method would include space mines that would in a certain period of time be directed for the purpose of neutralizing the anti-missile space defense. I would say this is a much cheaper way (than 'Star Wars')," Goldansky said.

Although it appeared in the English language interpretation as a direct reference to space "mines," a review of the Russian language tape showed Goldansky used the general term space "mines."

He said while the United States was spending billions of dollars developing the Strategic Defense Initiative, or "Star Wars," the Soviet Union could easily counter without causing any damage to its economy.

"U.S. hopes to make the Soviet national economy bankrupt due to the arms race and anti-missile defense are futile because it is easy to find effective countermeasures to an ABM (antiballistic missile) program, which are cheaper — without the serious economic expenditure of billions of dollars that is planned in the United States," Goldansky said.

The Soviet Union already deploys what U.S. officials have termed a crude anti-satellite device that would take several orbits to catch up with its target.

The Soviet Union has hinted at other ways of reducing the multi-billion-dollar "Star Wars" program to "useless junk" — such as overwhelming it with dummy missiles and coated rockets at a cost of just 1 percent to 2 percent of the U.S. defense program.

Monday, Soviet Chief of Staff Marshal Sergei Akhromeyev said the Kremlin would come up with a surprise response to "Star Wars" that would send Washington scurrying to find another space-based system.

"If it is necessary we will find a quick answer and it will not be the way the United States expects it. It will be an answer that deviates the 'Star Wars' program," Akhromeyev said.

U.S. Contesting Lawsuit Over UFO Radiation

Houston

Three people suing the federal government for $20 million say they do not know to this day what it was that hovered far over their heads and zapped them with radiation almost five years ago.

They claim it was an unidentified flying object that was escorted away by military helicopters. They say they suspect it was a secret U.S. military experiment. In any event, they say, the government should have warned residents that a UFO was in their area.

The military says it had nothing to do with the alleged occurrence Dec. 29, 1980, on a rural road northeast of Houston. Even if there were UFOs, a U.S. attorney says, the government has no duty to warn people about them because the government does not know whether they are dangerous.

With such straightforward arguments, the government is urging U.S. District Judge Ross Sterling to throw out a lawsuit filed here last year by former Dayton, Texas, cafe owner Betty Cash, 56, former waitress Vickie Landrum, 61, and Landrum's grandson, Colby Landrum, 11.

The suit claims that about 9 p.m. on Dec. 29, 1980, while headed for their homes in Dayton along a two-lane road about 30 miles northeast of Houston, the three encountered a brightly glowing craft the size of a city water tower. It hovered at treetop level, had red and orange flames flowing from its bottom, and bathed them in intense heat for several minutes before it was escorted away by at least 23 helicopters, they assert.

Their lawsuit, filed under the Federal Tort Claims Act, claims that the government failed to warn them of the UFO and "negligently, carelessly and recklessly" allowed it "to fly over a publicly used road and come in contact with the plaintiffs."

As a result, all suffered stomach pain, vomiting, diarrhea, radiation burns, deteriorating eyesight, and the women's hair fell out and grew back with a different texture, the suit claims. It also says they became highly sensitive to sunlight, suffered blisters and headaches, and that Cash developed breast cancer.

Despite the plaintiffs' report that there were no markings on the "large, unconventional aerial object" or on the helicopters, the lawsuit has recently moved from simply suggesting that the government merely knew about the UFO to saying that the government owned the UFO.

The government has offered affidavits from high-ranking officials that it had nothing to do with the UFO.
The Incredible Story They Tried to Hide for 28 Years

Ike Met Space Aliens

President Dwight D. Eisenhower met with space aliens from outer space almost 30 years ago, a British high government official reveals.

According to the Earl of Clancarty, a member of Parliament and the author of seven UFO books, the top secret meeting took place in 1954 at Edwards Air Force Base in California.

The incredible story is about the aliens demonstrating their spacecraft to the president and convincing him to make worldwide contact with the people of Earth.

And world-famous UFO expert Charles Berlitz confirmed the astonishing story.

Clancarty, who heads a group in the British government, told reporters that the UFO presentation by the British government released classified UFO information, says he was told of the incredible encounter by a former top U.S. test pilot. "The pilot said he was one of six people at Eisenhower's listening to the briefing."

Clancarty disclosed, "He had been called in as a technician because of his reputation and skill at deprogramming." The test pilot told Lord Clancarty, "There were six aliens at the table. Two of the aliens looked like human being but not exactly," the pilot said. He described the aliens as having humanoid features, although mustaches. They were about the same height and build as an average man and stood about 6 feet tall. The other four were much shorter, about 3 feet tall. The aliens had four limbs and two eyes, he said.

"One of the aliens stated that they were interested in making contact with the people of Earth to make contact with other races of these planets," Clancarty added.

"Eisenhower told them that he didn't think the world was ready for that, and was concerned that this revelation would cause panic," according to the Earl.

"The aliens wanted to understand us and then said they would continue to make contact with isolated individuals, until Earth people got used to them even though we knew they were there. The aliens then boarded their ships and departed. All of us were sworn to keep the secret," Clancarty emphasized.

The Earl claimed that the UFOs had been inspected by President Eisenhower and that they had been told not to panic on Earth.

"The President was very interested in the UFOs and had seen them first-hand at Edwards Air Force Base," Clancarty said. "He was surprised when he saw the UFOs and was told that they were from another planet."

He Inspected Their UFOs & Told Them Not to Panic Earth

map shows area of California where UFOs landed. Ike was in Palm Springs in February 1954, and mysteriously disappeared at time of UFO visit.

"They demonstrated their spacecraft to the President," the Earl said. "They showed him their ability to make manual movements of the spacecraft."

"They were very advanced and demonstrated their ability to control the spacecraft," Clancarty emphasized.

"They showed the President a lot of different things, including the inside of the spacecraft," the Earl added.

"The President was very interested and had made contact with them several times," Clancarty revealed.

16-year-old's own story: I gave birth to a space alien baby

SIXTEEN-YEAR-OLD Magdelena Munoz insisted all along that the fetus of her baby was a monstrous space alien. But only her parents believed her, until they were led to strange-looking objects which were the weapons that were used by the alien that was born.

Family shocked by its pointed ears & claw-like hands

The high school junior, Magdelena Munoz, 16, was unable to believe that a horrifyingly ugly 'alien' attached her womb. She was working from 10 a.m. to 6 p.m. in the library when an intense pain pulsed through her. The birthing police officer dragged the wriggling, 8 pound, 5 ounce baby out of Magdelena's pregnant body. It writhed in Magdelena's arms.

Landed

"I decided to eat through the back window of the car," Magdelena says. "I couldn't fit in the birth center."

Convictions

When Magdelena was examined, she was taken to a hospital run by a group of doctors who were looking for proof that this baby was not human. They counted the fingers and toes of the baby and found that they did not have any limbs.

"Espuma" (space baby) was taken to the hospital, where it was examined by numerous doctors. After the baby was examined, it was pronounced not to be a human being.

UFO alien is captured alive & docs say he's human

AN ALIEN being captured alive from a flying saucer has astounded scientists who say the space creature is human.

A UFO expert has confirmed that a human-like creature has been captured from a flying saucer. The creature was found by UFO researcher Dr. Glenn Raines, who announced the discovery at a press conference.

The creature was captured after it landed in a field. The scientists believe that the creature is a form of human life.

Genetic research

The genetic research team is working on determining the DNA of the alien. They have already begun to analyze the DNA samples.

The case has been described as a major breakthrough in the search for extraterrestrial life. Scientists believe that the alien could provide valuable information about the origins of life on Earth.
Ruins of an ancient city found on Jupiter moon!

It's like finding an alien version of ancient Athens!
UFO SHOCKER IN THE DEVIL'S TRIANGLE!

UFO saved a family from drowning after their pleasure boat sank in the Devil's Triangle.

Dr. Leonard Schmit told a press conference in New York yesterday that he was able to locate the survivors of the shipwrecked family thanks to a spacecraft that landed near the vessel. The spacecraft, which was not identified, contained a verifiable alien entity that communicated in extraordinary ways.

The survivors, a family of four, were rescued and treated for minor injuries. The spacecraft left the area after delivering the family members back to shore. It was later confirmed that the spacecraft was able to communicate with the alien entity, who informed them about a crisis on Earth.

The family, who were initially scared and confused, now believe they have been saved by an extraterrestrial being.

Outer-space rocks found on Earth

They burn & explode if handled

A team of geologists discovered a number of unusual rocks on a remote island near the Pacific Ocean. The rocks, which are unlike any known on Earth, are said to发出 a strange energy when handled. Scientists are currently studying the samples to determine their origins and potential implications.

Nude beer back on shelves

Brewers have reintroduced the popular nude beer brand after removing it from shelves due to complaints about its appearance. The beer is now available in a new package that is considered more appropriate for its content.

Alien spacecraft rises from sea to save a drowning family

An alien spacecraft, believed to be of extraterrestrial origin, was spotted rising from the sea near the Devil's Triangle. The spacecraft, which was not identified, was seen by witnesses who were able to document its appearance.

It is believed that the spacecraft was able to communicate with a family who were in danger of drowning. The spacecraft descended to rescue them and return them to shore.

Detailed accounts of the incident are expected to be released in the coming days.
THE ANTI-GRAVITY FILE

Nazi Flying Saucers
Anti-Gravity and Superconductors
Captured Aliens
Secret Government Research
Homemade Saucers
and more.
Contrasting effects of iron and superconductor in a field of magnetic lines of force. Top: A ferromagnetic material in a magnetic field concentrates the lines of force. Bottom: A superconductor in a magnetic field forces the lines of force to diverge and bypass.
Magnetic memory effect on superconductor in external magnetic field. Top: A ring is made superconducting while resting stationary in an external magnetic field. Bottom: The external magnetic field is removed while ring remains superconducting. Only the outer surface current stops.

A bar magnet "levitates" over a superconducting lead dish. A "mirror image" of magnetic lines of force exists invisibly in the lead surface at just about the position of the shadow. The "mirror image" is of equal strength to the bar magnet.
The Schriever-Habermohl flying disc developed between 1943 and 1945. In 1944, climbing vertically, it reached a height of 12 km in 3.12 minutes and a horizontal flying speed of 2000 km/h.

VICTOR SCHAUBERGER'S FLYING SAUCERS

Victor Schauberger (1885-1958), an Austrian inventor who was involved with Hitler's Third Reich, invented a number of "flying disks" for the Nazis between 1938 and 1945. Based on "liquid vortex propulsion" many of them, according to records, actually flew. One "flying saucer" reputedly destroyed at Leonstein, had a diameter of 1.5 meters, weighed 135 kilos, and was started by an electric motor of one twentieth horsepower. It had a trout turbine to supply the energy for lift-off. According to Schauberger, "if water or air is rotated into a twisting form of oscillation known as 'colloidal', a build up of energy results, which, with immense power, can cause levitation." On one attempt the apparatus "rose upwards, trailing a blue-green, and then a silver colored glow." The Russians blew up Schauberger's apartment in Leonstein, after taking what remained that the American's hadn't taken first. Schauberger supposedly worked on a top secret project in Texas for the U.S. Government and died shortly afterward of ill health. On his deathbed, Schauberger repeated over and over, "They took everything from me. Everything. I don't even own myself."

The first test-model developed between 1941 and 1942. This had the same flight properties as that in fig. (a), but something was wrong with the controls.

The 'Ballenzo-Schriever-Miethe Disc'. The retractable undercarriage legs terminated in inflatable rubber cushions. It carried a crew of three.

Schauberger's models of 'flying saucers'.

260 ANTI-GRAVITY AND THE WORLD GRID
Left: blueprints for a flying saucer. According to the obscure single-issue publication Buscot, in which these diagrams appeared in 1978, they are plans for a disc-shaped spaceship, modified by the West German government to make them ‘safe’ for publication. Although ‘electromagnetic turbines’, ‘laser-radar’ and computers are indicated, the design is not a practical one. The diagrams appear in an article on Rudolf Schriever’s Second World War designs, and may have been inspired by them.

Right: a flying disc designed by Dr Miethe, one of the team of brilliant engineers working on unconventional aircraft designs for the Nazi war effort. This ‘saucer’ was almost ready for operational use in 1945, when the factories in Prague were overrun by the Allies.
the Avro Car, built for the US Air Force and US Army by the Avro-Canada company. It was designed by an English engineer, John Frost. Officially, work on it was dropped in 1960 - despite the early claim that the machine would reach twice the speed of sound.
ABOVE: WHY IS IT THAT FLYING SAUCERS ARE OFTEN SEEN HOVERING AROUND MILITARY BASES?
BELOW: A SO-CALLED SEARLE DISC IN ACTION.
Nobody has yet captured and inspected a Flying Saucer. But, according to the latest scientific theories known to Earthmen, if Flying Saucers exist, this is what they would look like.

Method of operation? From a sophisticated power source they would create their own gravitational field and move by 'falling' into it. Changing direction is simply a matter of changing the field.

The center of the gravitational field would be so close to the spacecraft that small auxiliary generators would have to be placed strategically to avoid distortion of normal gravity effect.

At high velocities, the high intensity field produced by the craft moves the surrounding air molecules along with it. Thus the Flying Saucer behaves exactly the same in the atmosphere as it does in airless space—it is both supported and propelled by its own gravitational field.

Gravitic propulsion—a theory which science-author Leonard G. Cramp expands in his book Piece for a Jigsaw—is simple and efficient. The diagram on the right shows the sort of propulsion we are familiar with in a car or jet plane: the force is applied to the first truck and conveyed to the others by impact. The car driver, for instance, is pushed along by the seat of his pants. Gravitic propulsion, however, is applied uniformly to a spacecraft and everyone in it. Just as an electro-magnet attracts iron filings.
A. Fuel cells and reactor bay for main energy source.
B. Water tanks for reactor coolant, etc.
C. Store room for spares and maintenance.
D. Instrument console for in-flight control.
E. Cabin environment condition unit to maintain IG atmospheric pressure, oxygen content and temperature control.
F. Automatic navigation and homing radar device which takes plots on special co-ordinates, using star readings.
G. Upper crew protection generator, which operates in conjunction with a lower generator. The interplay of the combined double represss the gravitational force of the 'home planet' on crew and cabin content, regardless of ship's acceleration.
H. Special steel port holes for direct visual observation. They can be made transparent by electrical means.
I. One of several TV screens which can display exterior long-range, or close-up telephoto views.
J. Main electrical bay, housing main radio units and main computer.
K. Outer skin of free rotateable flange is stopped to help dissipate large electro-static charge build-up. Note relatively thick skin. Increased weight of ship's structure is an advantage when operating in G-field propulsion.
L. Converter deflector plates, which polarize and focus surrounding spatial grid for propulsion.
M. Rest and eating quarters for crew.
N. Landing/navigation lights.
O. Condenser, which recrystallizes and supplies hot water for services.
P. Heat dispersal cone and crew lower field generator.
Q. Main propulsion generator, which supplies high-voltage pulsed electricity to energize converter plates.
R. Generator plates, which work together with propulsion generator.
S. TV screen showing computerized video navigation chart.
T. Auxiliary propulsion and stabilizing units which can be swivelled in any direction to turn or tilt craft.
The above photocopy (unfortunately of poor quality) purportedly shows a captured alien in the hands of the American military. On May 22, 1950, an unnamed informant turned the original of this photograph over to agent John Quinn of the New Orleans FBI Field Office claiming he had purchased the photograph from another individual for the sum of $1.00 and was "placing it in the hands of the government" because it pictured "a man from Mars in the United States". The picture, supposedly showing an alien survivor of a UFO crash in the custody of two U.S. military policemen, reportedly first surfaced in Wiesbaden, Germany, in the late 1940s allegedly in the possession of a U.S. GI stationed there at the time. How he came into possession of such a picture remains unclear, as do the identities of the two soldiers portrayed, the location of the military base and the nature of the portable respiratory apparatus that is obviously being used to assist the alien's breathing. Receiving some limited publicity in Germany during the late 40s, the photo and story was naturally regarded with skepticism by U.S. officials.
This derelict manmade "flying saucer" was found in a Maryland barn on August 17, 1949. Courtesy of the Modern Military Branch, National Archives, Washington, D.C.

A classic flying saucer photograph purportedly depicting an extraterrestrial vehicle. Courtesy of Daniel W. Fry.
