

What Can You Do As Galactic Warrior?

by Susan

by Michelle Walling, CHLC

Do you feel like you came here as a galactic warrior but don't know what your mission is? Do you feel an impatience in knowing what is happening with the genocide on the planet, but don't know how to stop it?

We are experiencing planned population genocide.

Those of us who have awakened know the population of the planet is being sickened by radiation, chemtrails, GMO food, herbicides and pesticides, viruses, and diseases.

If you have awakened to the state of dire emergency on the planet right now, you know that every aspect of living has been controlled by a small elite group called the Illuminati that have been successful at dominating the planet through an elaborate plan that has its foundations rooted in money and greed. It has seemed like a battle that cannot be won, and will not be solved in the level of consciousness in which it was created.

It has been a battle of light and dark and the prize is planet earth and the energy her humans create

Many people have come forth and have said that they remember that they have come back from the future (around 2040) because future humanity was not successful in pulling away from the control group. There are people who say that they have come here from other galaxies and universes because they heard "the call". The problem is that we are all here, but when we were born we forgot much of what we needed to remember in order to complete our

mission.

With that being said, it seems like things are actually unfolding as we knew it would although it does seem cruel and unfair. While the Illuminati is playing out their genocide, they are also hanging their own necks. Pluto in Capricorn is shedding a light on the truth of what is happening just as it should. The light forces have a trump card that is just waiting to be played, like pushing over the first domino. This will be the end of control over humans on this planet who choose to free themselves.

For many people, the shock of how they have been manipulated will be too much for them to handle and they will choose to leave their bodies. Some will choose to leave their bodies because they have done what they have come here to do. For others, it will be as if a light bulb goes off inside their heads and they will be ready to get to work and do what is needed to create a “New Earth” for their children and grandchildren.

The Events

There will be a series of events that will occur that will undoubtedly serve as an awakening to the rest of humanity as the Illuminati plays their last cards. These events have been just around the corner for many years and are in the final stages of unfolding right now. There are billions of space brothers and sisters of the light that are working together with patience to allow certain events to happen. They are allowing as many people as possible to begin waking up before collectively triggering a shift in consciousness that will tip the scales in the favor of the light forces.

The saving grace planned by the light forces has been described as a shift in planetary vibration that will take those who choose it into another dimension on Earth where the dark forces of the Illuminati cannot touch them. In other words, because of an increase in vibration in the body, your consciousness and experience will be a match to a dimension that is not seen from our current perspective. Those that do not choose this higher vibrational way of living will be allowed to experience the control system in the lower vibrations on another planet, because the planet herself is also shifting to a higher level of existence.

Lightworkers have been working

Some lightworkers have been working on holding the space or level of vibration of the planet and the human consciousness. When a planet shifts in consciousness and vibration it could cause cataclysmic events like volcanoes or earthquakes that could wipe out cities. Thus, some people came here to hold a balance while Earth goes through labor. While many of these people are doing this consciously, some of them are simply living a life here on earth and either complete their work in their sleep state or carry joy and happiness in their awake state which does the balancing for them.

Some people are activists and are out marching against the government or Monsanto. Some people are writing articles, “whistleblowing”, or spreading the truth on the internet in order to provide information for those who awaken from the magic fog that has been placed on people’s minds. Yet there is still that percentage of awakened people that want to do something but don’t know what to do!
