Hello Frank,

I am sure you have heard of chemtrails before, as most of us know about their existence. But how can a simple array of six copper pipes with some crystals stuck in a bucket full of metal filings and resin dissolve them? The simple and straight answer to this question is: We don't know! So this will be a short email, right?

Not so fast, Frank. There is more I can say about this after over fourteen years of gifting orgonite on a large scale and observing the results.

No matter what they say, we see it work

Look at this sequence of pictures. It does not even involve a cloudbuster, only the systematic gifting of all cell phone towers in one area, a very powerful approach:

Chemtrails and HAARP above George, Western Cape, South Africa 2005

HAARP dissolution after 5 min

After approximately 10 min: Cumulus clouds forming from dissolving HAARP-carpet

Another 5 min later

After 20 minutes: Mostly Gone

That was it: One decisive attack with approx 15 TBs has brought along these dramatic changes within 30 minutes.

Where does the toxic residue go?

People who approach this with an "old physics" understanding are often worried that dissolving the chemtrails should lead to massive fallout of toxic substances.

We have observed no such thing – and nobody else has either!

The reality is much more miraculous and exciting. We believe that a real transmutation of the chemical substances contained in the chemtrails is what's happening.

Want to see miracles happen?

You should join the growing community of orgone-gifters and place a cloudbuster in your yard right now. Gift the cell phone towers in your town, city, or region and see the transformations happen.

The best way to initiate this transformation is with a somewhat massive approach: Obtain the "Massive Orgone Starter" and gift your environment. The most powerful effect is achieved when the cloudbuster is supported by full coverage of at least all cell phone towers in the vicinity of at least 30-50 km with tower busters.

Want more information on this process? Contact me direct, and I will be glad to help you.

Next time, I will tell you about the experience of two of my clients in Namibia. Until then, cheers!

Georg
